Aristotelians and Platonists Luigi Morelli, 2015-11-25 At the heart of this book is Rudolf Steiners culmination in the twentieth century or the convergence of the working of Aristotelians and Platonists for the renewal of culture And questions arise Where is the whole of the School of Michael at present How can we characterize and honor one and the other stream and avoid stereotypes and misunderstandings This work approaches the matter in its historical unfolding in three successive steps in which Steiner Aristotle and Plato Schrrers incarnations form a thread The first tableau opens up in the previous Age of Michael in Greece when Plato and Aristotle inaugurated the work of the two Michaelic streams The second addresses the Middle Ages and centers around the contrast between Alain de Lille and Thomas Aquinas between the School of Chartres and Scholasticism Steiners and Schrrers life tasks in the nineteenth century form the prelude to the present The heart of the book and its longest section looks at the present It contrasts the working of Aristotelians and Platonists in the natural sciences in psychology and in the social sciences From the ground of extensive observation and characterization it then turns to pressing questions What can Platonists learn from Aristotelians And how about the reverse Starting from the example of individuals meeting across the streams how can we extend this understanding so that it becomes an ongoing practice and a cultural concern How can Michaelic individuals and institutions work in ways that honor the whole of the Michaelic movement

Visions for a Compassionate America Luigi Morelli, 2015-06-03 This book carries further what was brought in the previous book *Legends and Stories for a Compassionate America* from the present into the future There is a thematic continuity between original Native American impulses of the Iroquois in particular the Declaration of Independence the US Constitution and a twenty first century impulse that strives to radically and peacefully transform American society America is at a crossroads We can choose a culture of denial a growing politics of secrecy and the continual erosion of individual rights or we can open the doors to new possibilities This is both a personal and a national choice which we are continuously facing A new civil culture has emerged and grown progressively over the last sixty years It is now gathering strength and visibility offering America and the world something completely different from an economic globalization run amok This movement is already creating new cultural values promoting a fuller and participatory democracy that meets the needs of all and fostering a sustainable economy All elements of the vision add to each other and form a new paradigm they bring new meaning and possibilities to the American Dream Luigi Morelli is also the author of A

Revolution of Hope Spirituality Culture and Social Change *The Art of Focused Conversation for Schools, Third Edition* Jo Nelson, 2013-08-20 Why don't kids learn? Why can't students do higher order thinking? Why do educators have endless staff meetings with few results? How can parents and teachers communicate better? The pressure upon educators to teach more to a wider range and number of students with decreasing resources and supports makes it urgent to find tools to answer such questions. *The Art of Focused Conversation for Schools* demonstrates how the Focused Conversation method, widely used in organizations and businesses, can effectively be used in a K-12 educational setting. Each section deals with interactions among students, staff, and parents and elaborates with over 100 sample conversations designed to make learning more meaningful, prevent and solve problems, and make communications in meetings more effective. Appendices showcase integrated curriculum examples where conversations have been used in unique combinations and list sample questions for each level of the conversation method. With a bibliography and index included and patterned after its highly successful predecessor *The Art of Focused Conversation: 100 Ways to Access Group Wisdom in the Workplace*, this book will be welcomed by parents, students, educators, and school administrators everywhere. The Institute of Cultural Affairs has over 40 years experience in more than 32 nations. A unique facilitation research and training organization, ICA Canada has provided participatory skills to many thousands of people worldwide.

HRD Perspectives on Developmental Relationships
Rajashi Ghosh, Holly M. Hutchins, 2022-01-04 Developmental relationships constitute interdependent generative connections that promote growth and learning among individuals. While studies reporting the impact of developmental relationships on learning performance and career development leave no doubt about its relevance to the human resource development (HRD) field, we lack an in-depth understanding of how developmental relationships apply to the myriad of topics relevant to contemporary HRD research and practice such as social justice, diversity, and equity, leadership development, career transitions, knowledge sharing, organization development, employee engagement, organizational learning, culture, globalization, national HRD, and technology at work. This book presents a comprehensive collection of evidence-based studies and conceptual articles that explore how developmental relationships that are cultivated within and outside of the workplace apply to those clusters of topics in HRD. Organized around six themes, the chapters examine topics such as knowledge management, critical perspectives on gender diversity and equity, building a learning organization, talent development, and emotional closeness in the context of virtual workplaces. In doing so, the book highlights how research on developmental relationships can be the underlying thread connecting the otherwise disconnected varied topical foci of HRD research and practice, thus broadening our understanding of the relevance of developmental relationships within the HRD field. This volume advances HRD scholarship and will appeal to researchers interested in exploring the nature and benefits of developmental relationships, including mentoring and coaching.
