research shows that educational change and improvement must come from the inside Here is a practical road map for improving the climate and culture of schools in ways that are meaningful and enduring We must be open to new ideas new strategies and new opportunities School transformation is something you do with educators not to them This book will show you how Dennis Van Roekel President National Education Association *Enacting Equitable Global Citizenship Education in Schools* Sarah Lillo Kang, Shona McIntosh, 2022-09-29 Offering contributions and vignettes from teachers school leaders and scholars this volume purposefully dismantles practitioner academic divides to invite dialogue around diverse understandings of global citizenship education GCE Recognizing that the field of GCE is often explored and conceptualized by educators and academics in silos this book confronts this issue by focusing on how schools educators and researchers can together support the enactment of GCE in international and national settings In doing so issues of westernization inequality access and divergence between GCE policy and practical implementation can be overcome The novel dialogical format links together theory practice and lived experience to create discourses between voices that are rarely connected Ultimately this volume offers important insights for those aiming to make equitable GCE a reality in schools worldwide and illustrates the value of collaborative dialogic exchange This text will benefit scholars academics and students in the fields of international and comparative education the sociology of education and citizenship more broadly Those involved with multicultural education policy and citizenship in the context of political sociology and social policy will also benefit from this volume *Courage, Interdisciplinary Thematic Unit: Challenging , Military Ethics and Virtues* Peter Olsthoorn, 2010-09-21 This book examines the role of military virtues in today's armed forces Although long established military virtues such as honor courage and loyalty are what most armed forces today still use as guiding principles in an effort to enhance the moral behavior of soldiers much depends on whether the military virtues adhered to by these militaries suit a particular mission or military operation Clearly the beneficiaries of these military virtues are the soldiers themselves fellow soldiers and military organizations yet there is little that regulates the behavior of soldiers towards civilian populations As a result troops trained for combat in today's missions sometimes experience difficulty in adjusting to the less aggressive ways of working needed to win the hearts and minds of local populations after major combat is over It can be argued that today's missions call for virtues that are more inclusive than the traditional ones which are mainly about enhancing military effectiveness but a convincing case can be made that a lot can already be won by interpreting these traditional virtues in different ways This volume offers an integrated approach to the main traditional virtues exploring their possible relevance and proposing new ways of interpretation that are more in line with the military tasks of the 21st century The book will be of much interest to students of military ethics philosophy and war and conflict in general *Teaching Thinking* Cathy Collins, John N. Mangieri, 2012-12-06 Comprehensively addressing the development of thinking from a wide variety of perspectives this volume presents original work from cognitive psychologists curriculum specialists federal government and business leaders

politicians educational theorists and other prominent figures specializing in this complex field These experts provide directives for teacher education textbook development classroom activities administrative policies publication procedures business connections community education strategies and whole school projects as sample plans of action Designed to spark adoptions of the solutions it proposes this book suggests significant steps that can be taken to move toward more advanced thinking instruction in our educational systems Subject Guide to Books in Print ,1997 Handbook of Health Behavior Research IV David S. Interdisciplinary Strategies for English and Social Studies Classrooms Joseph John Nowicki, Kerry F. Meehan, 1997 With today's growing emphasis on creating educational situations which are collaborative and inclusive particularly in junior and senior high schools there is a strong push to involve students in their learning to let them create their own understandings to encourage critical thinking and to increase student responsibility for their schooling And while there is much said in the literature about this point as theory this is one of the first hands on books to link theory with practice This terrific new

resource is written in a very inviting style and format for teachers adjusting to the effects of inclusion and heterogeneity in classrooms and for teachers and administrators looking to break the barriers erected by subject area isolation in junior and senior high schools In it you get nearly 50 interdisciplinary strategies to link social studies and English classes around common themes to provide the highest quality educational experiences for all students The authors identify the common strengths gained by sharing areas of study while maintaining the unique character and integrity of English and social studies classes To aid in lesson planning the authors identify subject and shared facts skills and concepts between English and social studies lessons and how these relate to theme They also identify obstacles to interdisciplinary activity because of perceived differences between English and social studies teachers and offer suggestions for overcoming those obstacles
