Early Modern England Kinship Gender and Coexistence explores the lived experience of Catholic women and men in the post Reformation century Set against the background of the gendered dynamics of English society this book demonstrates that English Catholics were potent forces in the shaping of English culture religious policy and the emerging nation state Drawing on kinship and social relationships rooted in the medieval period post Reformation English Catholic women and men used kinship social networks gendered strategies political actions and cultural activities like architecture and gardening to remain connected to patrons and to ensure the survival of their families through a period of deep social and religious change This book contributes to recent scholarship on religious persecution and coexistence in post Reformation Europe by demonstrating how English Catholics shaped state policy and enforcement of religious minorities and helped to define the character of early models of citizenship formation Theatre, Finance and Society in Early Modern England Theodore B. Leinwand, 1999-02-04 This interesting study examines emotional responses to socio economic pressures in early modern England as they are revealed in plays historical narratives and biographical accounts of the period These texts yield

fascinating insights into the various often unpredictable ways in which people coped with the exigencies of credit debt mortgaging and capital ventures Plays discussed include Shakespeare's *The Merchant of Venice* and *Timon of Athens* Jonson's *The Alchemist* and Massinger's *A New Way to Pay Old Debts* They are paired with writings by and about the finances of the corrupt Earl of Suffolk the privateer Walter Raleigh the royal agent Thomas Gresham theatre entrepreneur James Burbage and the Lord Treasurer Lionel Cranfield Leinwand's new readings of these texts reveal a blend of affect and cognition concerning finance that includes nostalgia anger contempt embarrassment tenacity bravado and humility

*State Formation in Early Modern England, C.1550-1700* Michael J. Braddick, 2000-12-07 This book examines the development of the English state during the long seventeenth century emphasising the impersonal forces which shape the uses of political power rather than the purposeful actions of individuals or groups It is a study of state formation rather than of state building The author's approach does not however rule out the possibility of discerning patterns in the development of the state and a coherent account emerges which offers some alternative answers to relatively well established questions In particular it is argued that the development of the state in this period was shaped in important ways by social interests particularly those of class gender and age It is also argued that this period saw significant changes in the form and functioning of the state which were in some sense modernising The book therefore offers a narrative of the development of the state in the aftermath of revisionism

rivalry policing and war making all belong on the same continuum This volume pursues the idea by revealing how lawbreakers and lawmakers have related to one another on the shadowy terrains of power over wide stretches of time and space Illicit activities and forces have been more important in state building and state maintenance than conventional histories have acknowledged Covering vast chronological and global terrain this book traces the contested and often overlapping boundaries between these practices in such very different polities as the pre modern city states of Europe the modern nation states of France and Japan the imperial power of Britain in India and North America Africa s and Southeast Asia s postcolonial states and the emerging postmodern regional entity of the Mediterranean Sea Indeed the contemporary explosion of transnational crime raises the question of whether or not the relationship of illicit to licit practices may be mutating once more leading to new political forms beyond the nation state
