Courting The Abyss Free Speech And The Liberal Tradition:

Courting the Abyss John Durham Peters, 2010-02-15 Courting the Abyss updates the philosophy of free expression for a world that is very different from the one in which it originated The notion that a free society should allow Klansmen neo Nazis sundry extremists and pornographers to spread their doctrines as freely as everyone else has come increasingly under fire At the same time in the wake of 9 11 the Right and the Left continue to wage war over the utility of an absolute vision of free speech in a time of increased national security Courting the Abyss revisits the tangled history of free speech finding resolutions to these debates hidden at the very roots of the liberal tradition A mesmerizing account of the role of public communication in the Anglo American world Courting the Abyss shows that liberty s earliest advocates recognized its fraternal relationship with wickedness and evil While we understand freedom of expression to mean anything goes John Durham Peters asks why its advocates so often celebrate a sojourn in hell and the overcoming of suffering He directs us to such well known sources as the prose and poetry of John Milton and the political and philosophical theory of John Locke Adam Smith John Stuart Mill and Oliver Wendell Holmes Jr as well as lesser known sources such as the theology of Paul of Tarsus In various ways they all he shows envisioned an attitude of self mastery or self transcendence as a response to the inevitable dangers of free speech a troubled legacy that continues to inform ruling norms about knowledge ethical responsibility and democracy today A world of gigabytes undiminished religious passion and relentless scientific discovery calls for a fresh account of liberty that recognizes its risk and its splendor Instead of celebrating noxious doctrine as proof of society s robustness Courting the Abyss invites us to rethink public communication today by looking more deeply into the unfathomable mystery of liberty and evil

The Collapse of Freedom of Expression Jordi Pujol, 2023-02-15 This book offers a holistic account of the problems posed by freedom of expression in our current times and offers corrective measures to allow for a more genuine exchange of ideas within the global society The topic of free speech is rarely addressed from a historical philosophical or theological perspective In The Collapse of Freedom of Expression Jordi Pujol explores both the modern concept of the freedom of expression based on the European Enlightenment and the deficiencies inherent in this framework Modernity has disregarded the traditional roots of the freedom of expression drawn from Christianity Greek philosophy and Roman law which has left the door open to the various forms of abuse censorship and restrictions seen in contemporary public discourse Pujol proposes that we rebuild the foundations of the freedom of expression by returning to older traditions and incorporating both the field of pragmatics of language and theological and ethical concepts on human intentionality as new complementary disciplines Pujol examines emblematic cases such as Charlie Hebdo free speech on campus and online content moderation to elaborate on the tensions that arise within the modern concept of freedom of expression The book explores the main criticisms of the contemporary liberal tradition by communitarians libertarians feminists and critical race theorists and analyzes the gaps and contradictions within these traditions Pujol ultimately offers a

reconstruction project that involves bridging the chasm between the secular and the sacred and recognizing that religion is a font of meaning for millions of people and as such has an inescapable place in the construction of a pluralist public sphere

Journalism and Eyewitness Images

Mette Mortensen, 2014-12-17 Building on the vast research conducted on war and media since the 1970s scholars are now studying the digital transformation of the production of news. Little scholarly attention has been paid however to non professional eyewitness visuals even though this genre holds a still greater bearing on the way conflicts are fought, communicated and covered by the news media. This volume examines the power of new technologies for creating and disseminating images in relation to conflicts. Mortensen presents a theoretical framework and uses case studies to investigate the impact of non professional images with regard to essential issues in today's media landscape including new media technologies and democratic change, the political mobilization and censorship of images, the ethics of spectatorship and the shifting role of the mainstream news media in the digital age. *Transformations of Religion and the Public Sphere* R. Braidotti, B. Blaagaard, T. Graauw, E. Midden, 2014-11-25 Religion fuelled terrorism and attacks on freedom of expression have recently drawn headlines across Europe either in protest or in support of extreme political or religious persuasions. This book explores interdisciplinary perspectives on public discussions of liberal secular freedoms and their implications in a postsecular world. *Truth in Science, the Humanities and Religion* International Balzan Foundation, 2010-06-14 by the Academies of the two countries to the Italian Swiss University of Lugano for the two day Symposium. The question of the meaning of truth is central to many areas of contemporary debate whether between those subscribing to a post Enlightenment view of the world and those who seek fundamental truth in religious texts or between those maintaining that there are absolute truths and those believing facts to be social constructs. For some the ultimate truth is revealed through religious faith and textual authority. Can this view be reconciled with an evidence based materialist post Enlightenment perspective of the truth as embraced by the natural sciences? If religion holds the key to the truth which religion and which truths? During the five thematic sessions of the symposium all attended by the same audience and by all the speakers and panel members these and many other questions but in particular the one about the meaning of truth were examined and debated. The whole range of perspectives represented on the panels and in the audience came to the fore. After the keynote lecture by Professor Simon Blackburn the five sessions covered the following disciplines: philosophy, mathematics, physics, cosmology, the biological sciences including biodiversity and sustainability history, the social sciences, theology and religion. This volume contains the speakers' lectures, the corresponding reactions of the invited panel members as well as the panel and general discussions of the two day symposium. **The Poverty of Television** Jonathan Corpus Ong, 2015-05-15 Based on an extensive ethnographic study of television and audiences in class divided Philippines this is the first book to take a bottom up approach in considering how people respond to images and narratives of suffering and poverty on television. Arguing for an anthropological ethics of media this book challenges existing work in media studies and sociology that focuses solely on textual analysis and philosophical approaches to the question of representing vulnerable others. Current questions in media ethics such as whether to portray sufferers as humane and empowered individuals or show them at their worst have so far

used textual and visual analyses to convey the researcher's own moral position on the matter. In contrast, this book inspired by the anthropology of moralities accounts for the different interpretations and moral positions of audiences who are positioned in various degrees of social and moral proximity to those they see and hear on television. Winner of the 2016 Philippine Social Science Council Excellence in Research Award. **New Directions in Copyright Law** Fiona Macmillan, 2007-01-01. This is an exceptional collection of scholarly contemporary thoughts on the future directions of copyright law. The contributors to this volume come from many jurisdictions and bring with them their respective rich backgrounds and experiences in copyright law. The result is an enlightening collection of papers. Yee Fen Lim. *Journal of Intellectual Property Law and Practice*. **Censorial Sensitivities** András Sajó, 2007. This book addresses the conflict between free speech and religion. Religious authorities have long tried to discipline free speech when it runs counter to religious teachings or dogmas. The reaction to the cartoons about the prophet Muhammad published in the Danish *Jyllands Posten* demonstrated the resonance of the accusation of blasphemy inside Islam. The conflict is not however limited to Islam. The Catholic Church and various Protestant churches have strongly expressed their hostility toward various books, plays, and films that they consider collective defamation. There is an increasing concern about the need to protect religious sensitivities against offensive speech in particular where such speech affects vulnerable minorities and collective identities based on religious affiliation. The thought-provoking essays in this book are a welcome contribution to the current debate on how to deal with the clash between free speech and religion in a world where a growing number of people are committed in a fundamental way to religion in everyday life. **The Literary Life of Things** Babette Bärbel Tischleder, 2014-02-13. Whether in the street or the microcosm of the home, the life of things conjoins human subjects and inanimate objects. This material culture has long played a vital role in the American literary imagination, yet scholars in literary and cultural studies have only recently re-discovered the object world as a subject of critical inquiry. Engaging a great range of American literature from Harriet Beecher Stowe and Edith Wharton to Vladimir Nabokov and Jonathan Franzen, *The Literary Life of Things* illuminates scenes of animation that disclose the aesthetic, affective, and ethical dimensions of our entanglement with the material world. **Environing Media** Adam Wickberg, Johan Gärdebo, 2022-08-22. This edited volume interrogates the role of media technologies in the formation of environments understood both as physical spaces and as epistemological constructs about them. Using the concept of environing media, the book advances a deeper understanding of how media processes defined here as the storage process and transmission of data influence human-Earth relations. Virtually all aspects of the interconnected global ecological crisis can be related to the intensification and acceleration of scaling up the human imprint on the planet by technological means. Combining ideas from the humanities, arts, and humanistic social sciences, *Environing Media* offers a perspective on how we entered the current geological epoch, the Anthropocene. The ten chapters explore colonial, planetary, and elemental environing media with cases including indigenous history, ocean monitoring, computational history, climate

modeling environmental history the air as medium the biosphere and the Earth system Drawing upon a breadth of examples and expertise in history anthropology geography cultural history science and technology studies and media studies the book discovers a novel approach to human Earth histories that demonstrates how technologies have mediated between humans and environments and in the process contributed to a societal feedback loop between knowing and doing environment each impacting the other *Environing Media* is a timely addition for scholars and upper level students in environmental humanities and media studies The Open Access version of chapters 1 2 3 4 5 7 8 and 9 are available at <http://www.taylorfrancis.com/books/e/9781003282891> Chapters 1 2 4 5 and 7 have been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 CC BY NC ND 4.0 license Chapters 3 8 and 9 have been made available under a Creative Commons Attribution CC BY 4.0 license

The Routledge Companion to Freedom of Expression and Censorship John Steel, Julian Petley, 2023-12-11 The Routledge Companion to Freedom of Expression and Censorship offers a thorough exploration of the debates surrounding this contentious topic considering the importance placed upon it in democratic societies and the reasons frequently proposed for limiting and constraining it This volume addresses the various historical philosophical political and cultural parameters of censorship and freedom of expression as well as current debates involving technology journalism and media regulation Geographically temporally and culturally diverse accounts of censorship and freedom of expression are discussed through a broad range of perspectives and case studies This Companion covers core principles and concerns in addition to more specialist and controversial debates including those surrounding hate speech holocaust denial pornography and so called cancel culture The collection pays particular attention to the role of the media in both facilitating and suppressing freedom of expression Comprehensive original and timely *The Routledge Companion to Freedom of Expression and Censorship* is a go to resource for scholars and advanced students of media communication and journalism studies
