Cpuls Continuous Productive Urban Landscapes Designing Urban Agriculture For Sustainable Cities:

Continuous Productive Urban Landscapes Andre Viljoen, Joe Howe, 2012-05-04 This book on urban design extends and develops the widely accepted compact city solution. It provides a design proposal for a new kind of sustainable urban landscape. Urban Agriculture: By growing food within an urban rather than exclusively rural environment, urban agriculture would reduce the need for industrialized production, packaging and transportation of foodstuffs to the city dwelling consumers. The revolutionary and innovative concepts put forth in this book have potential to shape the future of our cities, quality of life within them. Urban design is shown in practice through international case studies and the arguments presented are supported by quantified economic, environmental and social justifications. Continuous Productive Urban Landscapes André Viljoen, 2003. Second Nature Urban Agriculture André Viljoen, Katrin Bohn, 2014-07-25 Winner of the 2015 RIBA President's Award for Outstanding University Located Research. This book is the long awaited sequel to *Continuous Productive Urban Landscapes: Designing Urban Agriculture for Sustainable Cities*. *Second Nature Urban Agriculture* updates and extends the authors' concept for introducing productive urban landscapes, including urban agriculture into cities as essential elements of sustainable urban infrastructure. It reviews recent research and projects on the subject and presents concrete actions aimed at making urban agriculture happen. As pioneering thinkers in this area, the authors bring a unique overview to contemporary developments and have the experience to judge opportunities and challenges facing those who wish to create more equitable, resilient, desirable and beautiful cities. *Achieving sustainable urban agriculture* Prof Johannes S. C. Wiskerke, 2020-02-18 Strong focus on infrastructural requirements for successful urban agriculture such as public policy and planning frameworks, business models and social networks. Covers developments in key technologies such as rooftop and vertical farming as well as waste management. Includes case studies of particular commodities including horticultural produce, livestock and forestry. **Advances in Human Factors, Sustainable Urban Planning and Infrastructure** Jerzy Charytonowicz, Christianne Falcão, 2018-06-26 This book discusses human factors research directed towards realizing and assessing sustainability in the built environment. It reports on advanced engineering methods for sustainable infrastructure design as well as on assessments of the efficient methods and the social, environmental and economic impact of various designs and projects. The book covers a range of topics including the use of recycled materials in architecture, ergonomics in buildings and public design, sustainable design for smart cities, design for the aging population, industrial design, human scale in architecture and many more. Based on the AHFE 2018 International Conference on Human Factors, Sustainable Urban Planning and Infrastructure held on July 21-25, 2018 in Orlando, Florida, USA, it offers various perspectives on sustainability and ergonomics. As such, it is a valuable reference resource for designers, urban engineers, architects, infrastructure professionals, public infrastructure owners, policy makers, government engineers and planners as well as operations managers and academics active in urban and infrastructure research. *The Elgar Companion to the Built*
