Countryside Character Volume 2 North West:

Countryside Planning Kevin Bishop, Adrian Phillips, 2012-05-23 Not since the 19th century has the future of the countryside been such a focus of political and public attention nor of profound uncertainty and anguished debate A watershed has now been reached and in this time of unprecedented change new tools are needed for planning and managing the countryside Increasingly the drivers of countryside management and conservation are European and international They aim to provide comprehensive new frameworks for the whole countryside and encourage community driven planning and protection There have been numerous responses at the country and local levels within the UK In this book a broad range of scholars and practitioners review the international drivers affecting countryside policy and practice and through a variety of case studies they assess the value of country and local responses The result is a powerful and coherent volume that provides a fully up to date review and analysis of the pressures on the countryside the policies for the future and the keys to successful implementation Countryside Planning is essential reading for planners local authorities and rural organizations conservationists and environmental groups as well as academics and students in planning rural studies environmental studies and geography

Landscape Interfaces Hannes Palang, G. Fry, 2013-06-29 This book has been initiated by the workshop on Cultural heritage in changing landscapes held during the IALE International Association for Landscape Ecology European Conference that started in Stockholm Sweden in June 2001 and continued across the Baltic to Tartu Estonia in July The papers presented at the workshop have been supported by invited contributions that address a wider range of the cultural heritage management issues and research interfaces required to study cultural landscapes The book focuses on landscape interfaces Both the ones we find out there in the landscape and the ones we face while doing research We hope that this book helps if not to make use of these interfaces then at least to map them and bridge some of the gaps between them The editors wish to thank those people helping us to assemble this collection First of all our gratitude goes to the authors who contributed to the book We would like to thank Marc Antrop Mats Widgren Roland Gustavsson Marion Potschin Barbel Tress Tiina Peil Helen Soovali and Anu Printsman for their quick and helpful advice opinions and comments during the different stages of editing Helen Soovali and Anu Printsman together with Piret Pungas thank you for technical help
