Court Performance Around the World Maria Dakolias, 1999-01-01 World Bank Technical Paper no 430 QUOTE Many countries are undertaking legal and judicial reforms as part of their overall development programs there is increasing recognition that economic and social progress requires consolidation of democracy as well as respect for the rule of law and human rights without these development is not sustainable QUOTE Many developing countries find that their judiciaries are inconsistent in conflict resolution and carry a large backlog of cases thus stifling private sector growth eroding individual and property rights and perhaps even violating human rights Delays affect both the fairness and the efficiency of the system They impede the public's access to the courts which in effect weakens democracies the rule of law and the ability to enforce human rights This paper aims to describe and explain the performance of court systems in a sample of developing and developed countries in order to provide data to those designing or evaluating reforms The study also seeks to show areas in which international comparison of judicial performance can be fruitful suggesting indicators that can be used in such comparisons Finally it endeavors to provide comparisons of performance within individual countries over time Court Performance Around the World: a Comparative Perspective M. Dakolias, 1999 Increasing importance has been placed on an effective and efficient judiciary by governments and civil society However apart from decisions that they render little is known about court performance trends The judicial reform experiences so far have made it clear that more information is needed to review and compare trends among different countries This paper addresses the efficiency aspect of court performance as it can be quantitatively measured using objective data In addition congestion cost and delay are some of the problems most often complained about by the public This paper reviews data collected from eleven countries on three continents and provides a description of performance The main areas of comparison include the number of cases filed resolved and pending per judge the clearance and congestion rates time to resolve a case the number of judges and the cost of a case The paper also reviews the recent trends within each country and discusses some possible reforms

,2004-05-01 Traditional separation of powers theories assumed that governmental despotism will be prevented by dividing the branches of government which will check one another Modern governments function with unexpected complicity among these branches Sometimes one of the branches becomes overwhelming Other governmental structures however tend to

groundwater is by and large superior to surface water and cheaper to develop However when available data on groundwater is very scanty As a result the World Bank is now paying increasing attention to this valuable resource through both operations and sector work This publication represents the proceeding of the seminar Groundwater Legal and Policy Perspectives that was organized by the Legal Vice Presidency of the World Bank It explains some basic technical aspects of groundwater surveys the regulatory framework for it and discusses the World Bank experience and international law regarding this precious resource It is a timely publication and should also assist in a better understanding and appreciation of this valuable source It will be of interest to Bank staff borrowing country officials international agencies and research organizations working on groundwater
