 Campbell, 2025-08-06 Cattle are currently the most important domesticated mammals with populations numbering in the
 hundreds of millions and occupying large tracts of land while the conservation of large mammalian carnivores is becoming a
 dominant discourse in modern geopolitics also claiming large portions of the Earth's land surface Computer based surveying
 and communication systems including geomatics Big Data and Big Tech are becoming an essential part of human
 communication and environmental assessments and are critical to large scale assessments of land conflicts A current critical
 potent but neglected issue concerns the measurement of the interfaces of large carnivore and cattle ecologies in a cross
 continental format This book offers a novel approach to the interfaces of the sciences of conservation biology animal ecology
 agricultural development and geomatics which are increasingly interconnected in modern global development scenarios For
 animal ecology and conservation biology it is about the management systems that have developed from ecological and human
 parameters For agricultural development topics concern ancestral development physiological characteristics ecological
 requirements and predation opportunities and conflicts of cattle breeds For geomatics the topics concern the image based
 and survey based technologies that enable more critical environmental assessments The book takes a novel approach by
 examining the ancestry of cattle including the aurochs and current wild buffalos gaur banteng yaks bison the process of
 domestication into taurine and indicine cattle the semi domestication of yaks and water buffalo the ecologies of ancestral and

modern large carnivores including bears big cats and canids and how the requirements of these large charismatic mammals conflict with the requirements of cattle and agricultural development in Asia Europe Africa North America and South America This integrative approach contributes to the interests of academic researchers students practitioners and policy makers and general readers **Cattle** George Armatage,1842 Advances in organic dairy cattle farming Dr Mette
