Animals And Psychedelics The Natural World And The Instinct To Alter Consciousness:

Animals and Psychedelics Giorgio Samorini, 2002-08-01 An Italian ethnobotanist explores the remarkable propensity of wild animals to seek out and use psychoactive substances Throws out behaviorist theories that claim animals have no consciousness Offers a completely new understanding of the role psychedelics play in the development of consciousness in all species Reveals drug use to be a natural instinct From caffeine dependent goats to nectar addicted ants the animal kingdom offers amazing examples of wild animals and insects seeking out and consuming the psychoactive substances in their environments Author Giorgio Samorini explores this little known phenomenon and suggests that far from being confined to humans the desire to experience altered states of consciousness is a natural drive shared by all living beings and that animals engage in these behaviors deliberately Rejecting the Western cultural assumption that using drugs is a negative action or the result of an illness Samorini opens our eyes to the possibility that beings who consume psychedelics whether humans or animals contribute to the evolution of their species by creating entirely new patterns of behavior that eventually will be adopted by other members of that species The author s fascinating accounts of mushroom loving reindeer intoxicated birds and drunken elephants ensure that readers will never view the animal world in quite the same way again Cognitive

Psychedelics Erika Dyck, 2024-04-16 A gorgeously illustrated journey through psychedelics and their global history that explores how psychedelic visions have inspired and given meaning to humans throughout time Interest in psychedelics has grown considerably in recent years one might even say psychedelics are experiencing a renaissance But these mind altering plants have always been with us They have a rich and controversial history in fact plumbed from the depths of ancient Greek

culture infused with Christian symbols of sacrament enriched by Buddhist philosophies protected through Indigenous ceremonies and by the latter part of the twentieth century catapulted into cultural consciousness through science music posters blotter art and fashion In *Psychedelics A Visual Odyssey* Erika Dyck takes readers on an epic visual trip through some of the diverse ways that our fascination with psychedelics have been imagined throughout history Blending academic rigor with rich imagery from around the globe *Psychedelics* goes beyond the expected terrain of describing hallucinations It reveals not only how psychedelic plants have been illustrated and understood but also how these plants and chemical synthetics have inspired visual representations of health fear peace colonial resistance creativity and more A stunningly beautiful and comprehensive deep dive into the world of psychedelics *Psychedelics A Visual Odyssey* will inspire everyone from the curious general reader to the seasoned psychonaut

Sacred Drugs Gary Laderman, 2025-09-25 *Sacred Drugs* explores the numerous ways in which psychoactive substances from alcohol to psilocybin cannabis to pharmaceuticals and coffee to tobacco intersect with religious life This cutting edge volume acknowledges the ubiquity of drug use in American society and that in fact being drugged with an altered state of consciousness is a common feature of American life today as it has been throughout human history and across global ancient cultures Its focus is on the undeniable and pervasive evidence that drugs are often consumed for religious purposes *Sacred Drugs* touches on the presence of drugs in a number of religious traditions including Christianity Hinduism and Islam It also delves into the religious textures sensibilities and histories of psychoactive agents sometimes intersecting with these traditions sometimes with Indigenous cultures around the world and sometimes not directly related to any particular religion but instead related to more basic existential religious concerns a mortal body that suffers ages and dies but also yearns for transcendence healing and ecstasy or the desire to uncover and live true to one's identity as well as to find energizing communities that bind individuals together or how to counter chaos meaninglessness and disorder This controversial book will be the go to volume for readers interested in the complex relationship between religious life and psychoactive substances

function and heightened spiritual awareness Our psychedelic future is on the horizon a future that harnesses the full potential of mind and spirit and Thomas Roberts outlines a path to reach it *Drunk Flies and Stoned Dolphins* One R. Pagan,2021-11-16 From the cup of coffee that jumpstarts the day to dangerously addictive drugs the recreational use of plants with psychoactive properties has a long history among humans But as with many things it turns out that other animals got there first From parrots to primates consuming medicinal chemicals is an instinctive behavior that helps countless organisms fight infection and treat disease But the similarities don't end there Like us many creatures also consume substances that have no apparent benefit except for inducing intoxication In fact animals have been using drugs for recreational purposes since prehistoric times We may even have animals to thank for the idea legend says that coffee was discovered by observing the behavior of goats that had eaten it In his previous book *Strange Survivors* author and biologist On R Pagan introduced readers to some of the truly bizarre strategies animals use to survive in the cutthroat world of natural selection Now in *Drunk Flies and Stoned Dolphins* he sheds light on the surprising cravings they indulge when it's time to unwind In this book you'll get an eye opening glimpse into the mind altering behavior of the non human members of the animal kingdom spanning insects to elephants including the dolphin species that apparently likes to pass around an intoxicating pufferfish as if they were sharing a joint Combining fascinating science with humor and enthusiasm Pagan's latest is full of the kind of unforgettable stories and odd facts that you'll find yourself repeating to everyone you meet From fruit fly happy hour to the evolutionary reasons behind nature's drugs *Drunk Flies and Stoned Dolphins* takes you on a trip through the colorful world of animal intoxication and along the way explores what this science reveals about the surprising connections between all the world's creatures **Like a Little Dog** Anthony E. Cartwright,N Anthony Armstrong,2020-04-30 A fascinating account of poultices pills and prescriptions over the centuries and how they've been developed and delivered This lively account follows

the development of medicines from traces of herbs found with the remains of Neanderthal man to prescriptions written on clay tablets from Mesopotamia in the third millennium BC to pure drugs extracted from plants in the nineteenth century and to the latest biotechnology antibody products In addition it tells the stories behind historical figures in medicine such as Christopher Wren who gave the first intravenous injection in 1656 and William Brockedon who invented the tablet in 1843 as well as recounting the changes in patterns of prescribing from simple dosage forms such as liquid mixtures pills ointments lotions poultices powders for treating wounds inhalations eye drops enemas pessaries and suppositories mentioned in the Egyptian Ebers papyrus of 1550 BCE to the complex tablets injections and inhalers in current use A typical pharmacy now dispenses about as many prescriptions in a working day as a mid nineteenth century chemist did in a whole year This history sheds light on the scientific progress made over centuries that led to the medical miracles of the modern world Acorns: Windows High-Tide Foghat Joshua Morris,2013-01-23 Acorns delineates the future of humanity as a reunification of intellect with the Deep Self Having chosen to focus upon ego established securely by the time of Christ much more beta brain wave development will destroy our species and others which process has already begun We create our own realities through beliefs intents and desires and we were in and out of probabilities constantly Feelings follow beliefs not the other way around

Native Intoxicants of North America Sean Rafferty,2023-08-18 Though scholarship on intoxicants in regions like Asia Africa Mesoamerica and South America is plentiful *Native Intoxicants of North America* represents the first foray into a study of prehistoric intoxicants throughout North America specifically In this study Sean Rafferty fills significant gaps in existing research with a focus on native cultures of North America and holistic coverage of intoxicants by type Importantly Rafferty anchors his investigation in an easily overlooked question why did early humans use intoxicants in the first place Rafferty begins by discussing the origins of intoxicants and their role in rituals medicine and recreation Subsequent chapters turn to specific intoxicants hallucinogens stimulants alcohol and tobacco making ample use of illustrations across disciplines weaving a tapestry of culture ritual medicine botany artifact and history All the while Rafferty explores the societal significance of narcotics stimulants and hallucinogens on prehistoric North American cultures While *Native Intoxicants of North America* focuses specifically on Native cultures the author s analysis provides the foundation for a valuable broader discussion that in a world where few human behaviors are universal experiencing altered states of consciousness is one that transcends culture and time *Plant Intelligence and the Imaginal Realm* Stephen Harrod Buhner,2014-05-14 A manual for opening the doors of perception and directly engaging the intelligence of the Natural World Provides exercises to directly perceive and interact with the complex living self organizing being that is Gaia Reveals that every life form on Earth is highly intelligent and communicative Examines the ecological function of invasive plants bacterial resistance to antibiotics psychotropic plants and fungi and the human species In *Plant Intelligence and the Imaginal Realm* Stephen Harrod Buhner reveals that all life forms on Earth possess intelligence language a sense of I and not I and the capacity to dream He shows

that by consciously opening the doors of perception we can reconnect with the living intelligences in Nature as kindred beings become again wild scientists nondomesticated explorers of a Gaian world just as Goethe Barbara McClintock James Lovelock and others have done For as Einstein commented We cannot solve the problems facing us by using the same kind of thinking that created them Buhner explains how to use analogical thinking and imaginal perception to directly experience the inherent meanings that flow through the world that are expressed from each living form that surrounds us and to directly initiate communication in return He delves deeply into the ecological function of invasive plants bacterial resistance to antibiotics psychotropic plants and fungi and most importantly the human species itself He shows that human beings are not a plague on the planet they have a specific ecological function as important to Gaia as that of plants and bacteria Buhner shows that the capacity for depth connection and meaning filled communication with the living world is inherent in every human being It is as natural as breathing as the beating of our own hearts as our own desire for intimacy and love We can change how we think and in so doing begin to address the difficulties of our times *Supernatural Selection* Matt Rossano, 2010-06-08 In 2006 scientist Richard Dawkins published a blockbuster bestseller *The God Delusion* This atheist manifesto sparked a furious reaction from believers who have responded with numerous books of their own By pitting science against religion however this debate overlooks what science can tell us about religion According to evolutionary psychologist Matt J Rossano what science reveals is that religion made us human In *Supernatural Selection* Rossano presents an evolutionary history of religion Neither an apologist for religion nor a religion basher he draws together evidence from a wide range of disciplines to show the valuable even essential adaptive purpose served by systematic belief in the supernatural The roots of religion stretch as far back as half a million years when our ancestors developed the motor control to engage in social rituals that is to sing and dance together Then about 70 000 years ago a global ecological crisis drove humanity to the edge of extinction It forced the survivors to create new strategies for survival and religious rituals were foremost among them Fundamentally Rossano writes religion is a way for humans to relate to each other and the world around them and in the grim struggles of prehistory it offered significant survival and reproductive advantages It emerged as our ancestors first health care system and a critical part of that health care system was social support Religious groups tended to be far more cohesive which gave them a competitive advantage over non religious groups and enabled them to conquer the globe Rather than focusing on one aspect of religion as many theorists do Rossano offers an all encompassing approach that is rich with surprises insights and provocative conclusions
