Animals Disease And Human Society Human Animal Relations And The Rise Of Veterinary Science:

Animals, Disease and Human Society Joanna Swabe,1999 *Animals, Disease and Human Society* Joanna Swabe,2002-09-11 This book explores the history and nature of our dependency on other animals and the implications of this for human and animal health Writing from an historical and sociological perspective Joanna Swabe s work discusses such issues as animal domestication the consequences of human exploitation of other animals including links between human and animal disease the rise of a veterinary regime designed to protect humans and animals alike implications of intensive farming practices pet keeping and recent biotechnological developments This account spans a period of some ten thousand years and raises important questions about the increasing intensification of animal use for both animal and human health Humans, Animals, and U.S. Society in the Long Nineteenth Century: A Documentary History Dominik Ohrem,2025-11-18 Volume III hones in on the relations between humans and domesticated animals in U S society illuminating how these relations were integral to key developments of the long nineteenth century A first section explores the role of domesticated animals in what for most of the nineteenth century remained a predominantly agrarian world albeit one undergoing significant change focussing on the labour and products that could be extracted from animal bodies the education of working animals contemporary attempts at improving animal breeds to increase agricultural productivity and market value the rise of veterinary medicine and other topics The second section demonstrates that the transportation revolution of the antebellum decades notwithstanding animals remained essential for moving around goods and people in both rural areas and the growing U S cityscapes where horses powered everything from carriages to streetcars as well as in other nineteenth century contexts that relied on equine bovine and sometimes canine traction A third and final section is centred on domesticated animals in entertainment and competitive settings ranging from the prestigious if embattled sport of Thoroughbred horse racing to pigeon fancying and the brutal spectacles of dog and cockfighting which quickly became the target of a spirited post Civil War anticruelty movement **The Commodification of Farm Animals** Sophie Riley,2022-02-15 This book examines how the developments in veterinary science philosophy economics and law converged during the nineteenth and early twentieth centuries to entrench farm animals along a commodification pathway It covers two neglected areas of study the importance of international veterinary conferences to domestic regimes and the influence of early global treaties that dealt with animal health on domestic quarantine measures The author concludes by arguing that society needs to reconsider its understanding and the place of the welfare paradigm in animal production systems As it presently stands this paradigm can be used to justify almost any self serving reason to abrogate ethical principles The topic of this book will appeal to a wide readership not only scholars students and educators but also people involved in animal production interested parties and experts in the animal welfare and animal rights sector as well as policy makers and regulators who will find this work informative and thought provoking **The Oxford Handbook of Animal Studies** Linda Kalof,2017 The Oxford Handbook

of Animal Studies tackles the infamous animal question how can humans rethink and reconfigure their relationships with other animals Over the course of five sections and thirty chapters the contributors investigate issues and concepts central to understanding our current relationship with other animals and the potential for coexistence in an ecological community of living beings

Veterinary Epidemiology Michael Thrusfield, 2013-04-24 This successful book now in its third edition continues to provide a comprehensive introduction to the role of epidemiology in veterinary medicine Since the publication of the second edition there has been considerable expansion in the application of veterinary epidemiology more quantitative methods are available challenges such as the epidemic of foot and mouth disease in Europe in 2001 have required epidemiological investigation and epidemiological analyses have taken on further importance with the emergence of evidence based veterinary medicine In this edition Completely revised and expanded chapters Increased attention given to the principles and concepts of epidemiology surveillance and diagnostic test validation and performance Many examples are drawn from both large and small animal medicine and from the developing as well as the developed world This paperback edition includes a new section on risk analysis Veterinary Epidemiology is an invaluable reference source for veterinary general practitioners government veterinarians agricultural economists and members of other disciplines interested in animal disease It will also be essential reading for undergraduate and intermediate level postgraduate students of epidemiology

Video Surveillance and Social Control in a Comparative Perspective Fredrika Björklund, Ola Svenonius, 2012 This edited collection reports the results of a comparative study of video surveillance CCTV in Germany Poland and Sweden It investigates how video surveillance as technologically mediated social control is affected by national characteristics with a specific concern for recent political history The book is motivated by asking what makes video surveillance tick in three very different cultural settings two of which Poland and Sweden are virtually unexplored in the literature on surveillance The selection of countries is motivated by an interest in societies with recent experiences of authoritarianism and how they respond to the global trend towards intensified technical means of control With thorough empirical studies the book constitutes an important contribution to security studies surveillance studies and post communist area studies

Internet and Surveillance Christian Fuchs, Kees Boersma, Anders Albrechtslund, Marisol Sandoval, 2013-06-17 The Internet has been transformed in the past years from a system primarily oriented on information provision into a medium for communication and community building The notion of Web 2.0 social software and social networking sites such as Facebook Twitter and MySpace have emerged in this context With such platforms comes the massive provision and storage of personal data that are systematically evaluated marketed and used for targeting users with advertising In a world of global economic competition economic crisis and fear of terrorism after 9/11 both corporations and state institutions have a growing interest in accessing this personal data Here contributors explore this changing landscape by addressing topics such as commercial data collection by advertising consumer sites and interactive media self disclosure in the social web

surveillance of file sharers privacy in the age of the internet civil watch surveillance on social networking sites and networked interactive surveillance in transnational space This book is a result of a research action launched by the intergovernmental network COST European Cooperation in Science and Technology

Nuclear Disaster at Fukushima Daiichi Richard Hindmarsh,2013-08-21 Nuclear Disaster at Fukushima Daiichi is a timely and groundbreaking account of the disturbing landscape of the Fukushima Daiichi nuclear meltdown amidst an earthquake and tsunami on Japan's northeast coastline on March 11 2011 It provides riveting insights into the social and political landscape of nuclear power development in Japan which significantly contributed to the disaster the flawed disaster management options taken and the political technical and social reactions as the accident unfolded In doing so it critically reflects on the implications for managing future nuclear disasters for effective and responsible regulation and good governance of controversial science and technology or technoscience and for the future of nuclear power itself both in Japan and internationally Informed by a leading cast of international scholars in science technology and society studies the book is at the forefront of discussing the Fukushima Daiichi disaster at the intersection of social environmental and energy security and good governance when such issues dominate global agendas for sustainable futures Its powerful critique of the risks and hazards of nuclear energy alongside poor disaster management is an important counterbalance to the plans for nuclear build as central to sustainable energy in the face of climate change increasing extreme weather events and environmental problems and diminishing fossil fuel peak oil and rising electricity costs Adding significantly to the consideration and debate of these critical issues the book will interest academics policy makers energy pundits public interest organizations citizens and students engaged variously with Fukushima itself disaster management political science environmental energy policy and risk public health sociology public participation civil society activism new media sustainability and technology governance

Information Communication Technology and Social Transformation Hugh F. Cline,2014-02-05 This book argues that information communication technologies are not creating new forms of social structure but rather altering long standing institutions and amplifying existing trends of social change that have their origins in ancient times Using a comparative historical perspective it analyzes the applications of information communication technologies in relation to changes in norms and values education institutions the socialization of children new forms of deviant and criminal behaviors enhanced participation in religious activities patterns of knowledge creation and use the expansion of consumerism and changing experiences of distance and time

Wind Power and Power Politics Peter Strachan,David Lal,David Toke,2009-09-10 The aim of the book is to analyse the factors that have influenced wind power outcomes in a range of countries which have featured significant wind power deployment programmes A central theme is the relationship between patterns of ownership and the outcomes These flow from different social environments but they are associated with different types of planning outcome and deployment rates Grass roots ownership is more widespread than is commonly thought although it is not a panacea for effective wind

power programmes Financial policies used to promote wind power also have important influences of the rates of deployment However what seems to be most important for wind power deployment is a double coincidence of widespread social support for wind power deployment and effective financial support systems for wind power **Food, Science, Policy and**

Regulation in the Twentieth Century Jim Phillips, David F. Smith, 2013-04-15 This highly topical book offers a comprehensive study of the interaction of food politics and science over the last hundred years A range of important case studies from pasteurisation in Britain to the E coli outbreak offers new material for those interested in science policy and the role of expertise in modern political culture **The Globalization of American Infrastructure** Matthew Heins, 2016-01-29

This book gives an account of how the U S freight transportation system has been impacted and globalized since the 1950s by the presence of the shipping container A globally standardized object the container carries cargo moving in international trade and it utilizes and fits within the existing transportation infrastructures of shipping trucking and railroads In this way it binds them together into a nearly seamless worldwide logistics network This process occurs not only in ocean shipping and at ports but also deep within national territories In its dependence on existing infrastructural systems though the network of container movement as it pervades domestic space is shaped by the history and geography of the nation state This global network is not invariably imposed in a top down manner to a large degree it is cobbled together out of national regional and local systems Heins describes this in the American context examining the freight transportation infrastructures of railroads trucking and inland waterways and also the terminals where containers are transferred between train and truck The book provides a detailed historical narrative and is also theoretically informed by the contemporary literature on infrastructure and globalization **Global Public Health Vigilance** Lorna Weir, Eric Mykhalovskiy, 2010-05-17 Describes and analyzes the transformations in global mechanisms for monitoring infectious disease outbreaks that have occurred since the mid

1990s This book examines early warning outbreak detection which operates electronically through the Internet to identify infectious disease outbreaks that may lead to international health emergencies *Wired and Mobilizing* Victoria Carty, 2010-09-13 This book highlights how online networking offers potential for new forms of activist mobilizing repertoires participatory democracy direct action fundraising and civic engagement It calls for a re conceptualization of some of the main tenets of contentious and electoral politics which were originally constructed to describe and analyze face to face forms of mobilization in order to more accurately analyze contemporary forms of protest electoral processes and civil society organizing **Biometrics** Joseph Pugliese, 2012-12-06 Biometric technologies such as finger or facial scan are being

deployed across a variety of social contexts in order to facilitate and guarantee identity verification and authentication In the post 9 11 world biometric technologies have experienced an extraordinary period of growth as concerns about security and screening have increased This book analyses biometric systems in terms of the application of biopolitical power corporate military and governmental on the human body It deploys cultural theory in examining the manner in which biometric

technologies constitute the body as a target of surveillance and as a data information object The book thereby provides a comprehensive overview and critical analysis of both the local and global ramifications of biometric technologies **The Fukushima Effect** Richard Hindmarsh, Rebecca Priestley, 2015-12-07 The Fukushima Effect offers a range of scholarly perspectives on the international effect of the Fukushima Daiichi nuclear meltdown four years out from the disaster Grounded in the field of science technology and society STS studies a leading cast of international scholars from the Asia Pacific Europe and the United States examine the extent and scope of the Fukushima effect The authors each focus on one country or group of countries and pay particular attention to national histories debates and policy responses on nuclear power development covering such topics as safety of nuclear energy radiation risk nuclear waste management development of nuclear energy anti nuclear protest movements nuclear power representations and media representations of the effect The countries featured include well established nuclear nations emergent nuclear nations and non nuclear nations to offer a range of contrasting perspectives This volume will add significantly to the ongoing international debate on the Fukushima disaster and will interest academics policy makers energy pundits public interest organizations citizens and students engaged variously with the Fukushima disaster itself disaster management political science environmental energy policy and risk public health sociology public participation civil society activism new media sustainability and technology governance

The Social Life of Nanotechnology Barbara Herr Harthorn, John W. Mohr, 2013-06-03 This book addresses the interconnections and tensions between technological development the social benefits and risks of new technology and the changing political economy of a global world system as they apply to the emerging field of nanotechnologies The basic premise developed throughout the volume is that nanotechnologies have an undertheorized and often invisible social life that begins with their constructed origins and propels them around the globe across multiple localities institutions and collaborations through diverse industries research labs and government agencies and into the public sphere The volume situates nano innovation and development as a modernist science and technology project in a tense and unstable relationship with a fractured postmodern social world The book is unique in incorporating and integrating studies of innovation systems along with a focus on the risks and consequences of a globally significant set of emerging technologies It does this by examining the social and political conditions of their creation production emergence and reception *The Politics of Bioethics* Alan Petersen, 2011-01-25 This book investigates the socio political implications of bioethics discourse and practices in relation to a range of controversial developments It will be of interest to policymakers clinicians scholars and others who are looking for new ways of making sense and evaluating recent developments in the field of bioethics **Thinking Russia's History Environmentally** Catherine Evtuhov, Julia Lajus, David Moon, 2023-07-14 Historians of Russia were relative latecomers to the field of environmental history Yet in the past decade the exploration of Russian environmental history has burgeoned Thinking Russia's History Environmentally showcases collaboration amongst an international set of scholars who

focus on the contribution that the study of Russian environments makes to the global environmental field Through discerning analysis of natural resources the environment as a factor in historical processes such as industrialization and more recent human animal interactions this volume challenges stereotypes of Russian history and in so doing highlights the unexpected importance of Russian environments across a time frame well beyond the ecological catastrophes of the Soviet period

Animals Disease And Human Society Human Animal Relations And The Rise Of Veterinary Science: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels captivating the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the fascinating narratives that have charmed audiences this year. Animals Disease And Human Society Human Animal Relations And The Rise Of Veterinary Science : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Animals Disease And Human Society Human Animal Relations And The Rise Of Veterinary Science : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Animals Disease And Human Society Human Animal Relations And The Rise Of Veterinary Science : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and thrilling novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
