in global status      **Giant Pandas** Don Lindburg, Karen Baragona, 2004-08-23 The much loved giant panda a secretive denizen of the dense bamboo forests of western China has become an icon worldwide of progress in conservation and research This volume written by an international team of scientists and conservationists including Chinese researchers whose work has not been available in English tells the promising story of how the giant panda returned from the brink of extinction The most important sourcebook on giant pandas to date it is the first book since 1985 to present current panda research and the first to place the species in its biological ecological and political contexts More than a progress report on a highly endangered species Giant Pandas Biology and Conservation details the combination of scientific understanding local commitment and government involvement that has been brought into play and asks what more needs to be done to ensure the panda s survival The book is divided into four parts Evolutionary History of the Giant Panda Studies of Giant Panda Biology Pandas and Their Habitats and Giant Panda Conservation It combines the latest findings from the field and the laboratory together with panel and workshop summaries from a recent international conference Taken together the chapters highlight how international cooperation has led to better management in the wild and in captivity The volume also shows how concepts such as buffer zones links between forest fragments multiple use areas and cooperation with local people who have a stake in the resources highly relevant concepts for conservation problems around the world have been key to the panda s survival      **Zooland** Irus Braverman, 2012-11-28 This book takes a unique stance on a controversial topic zoos Zoos have their ardent supporters and their vocal detractors And while we all have opinions on what zoos do few people consider how they do it Irus Braverman draws on more than seventy interviews conducted with zoo managers and administrators as well as animal activists to offer a glimpse into the otherwise unknown complexities of zooland Zooland begins and ends with the story of Timmy the oldest male gorilla in North America to illustrate the dramatic transformations of zoos since the 1970s Over these decades modern zoos have transformed themselves from places created largely for entertainment to globally connected institutions that emphasize care through conservation and education Zoos naturalize their spaces classify their animals and produce spectacular experiences for their human visitors Zoos name register track and allocate their animals in global databases Zoos both abide by and create laws and industry standards that govern their captive animals Finally zoos intensely govern the reproduction of captive animals carefully calculating the life and death of these animals deciding which of them will be sustained and which will expire Zooland takes readers behind the exhibits into the world of zoo animals and their caretakers And in so doing it turns its gaze back on us to make surprising interconnections between our understandings of the human and the nonhuman      **The Way of the Panda** Henry Nicholls, 2010-09-30 In a most original book science writer Henry Nicholls uses the rich and curious story of the panda from its discovery 150 years ago in the highlands of China to its present international status as endearing icon of the World Wide Fund for Nature WWF fifty years old in 2011 and shy darling of the world s zoos to do several things to chart the emergence of modern China onto the global stage to examine our
