

The background of the entire cover is a vibrant yellow with a complex, swirling marbled pattern, reminiscent of traditional marbled paper or perhaps a close-up of certain animal fur. The pattern consists of numerous fine, interlocking lines and swirls that create a sense of movement and depth.

**Meat Planet** Benjamin Aldes Wurgaft, 2020-10-13 In 2013 a Dutch scientist unveiled the world's first laboratory created hamburger Since then the idea of producing meat not from live animals but from carefully cultured tissues

has spread like wildfire through the media Meanwhile cultured meat researchers race against population growth and climate change in an effort to make sustainable protein Meat Planet explores the quest to generate meat in the lab a substance sometimes called cultured meat and asks what it means to imagine that this is the future of food Neither an advocate nor a critic of cultured meat Benjamin Aldes Wurgaft spent five years researching the phenomenon In Meat Planet he reveals how debates about lab grown meat reach beyond debates about food examining the links between appetite growth and capitalism Could satiating the growing appetite for meat actually lead to our undoing Are we simply using one technology to undo the damage caused by another Like all problems in our food system the meat problem is not merely a problem of production It is intrinsically social and political and it demands that we examine questions of justice and desirable modes of living in a shared and finite world Benjamin Wurgaft tells a story that could utterly transform the way we think of animals the way we relate to farmland the way we use water and the way we think about population and our fragile ecosystem s capacity to sustain life He argues that even if cultured meat does not succeed it functions much like science fiction as a crucial mirror that we can hold up to our contemporary fleshy dysfunctions

**Animals and Ethics - Third Edition** Angus Taylor,2009-05-27 Can animals be regarded as part of the moral community To what extent if at all do they have moral rights Are we wrong to eat them hunt them or use them for scientific research Can animal liberation be squared with the environmental movement Taylor traces the background of these debates from Aristotle to Darwin and sets out the views of numerous contemporary philosophers including Peter Singer Tom Regan Mary Anne Warren J Baird Callicott and Martha Nussbaum with ethical theories ranging from utilitarianism to eco feminism The new edition also includes provocative quotations from some of the major writers in the field As the final chapter insists animal ethics is more than just an academic question it is intimately connected both to our understanding of what it means to be human and to pressing current issues such as food shortages environmental degradation and climate change

*Animals and Ethics* Angus Taylor,2003-05-12 A previous edition of this book appeared under the title Magpies Monkeys and Morals The new edition has been updated throughout Substantial new material has been added to the text including discussions of virtue ethics and Rawlsian contractarianism The bibliography has been significantly enlarged and now includes more than five hundred entries

**BOOK JACKET The Ethics of Environmental Concern** Robin Attfield,2011-03-15 First published in 1983 The Ethics of Environmental Concern has become a classic in the relatively new field of environmental ethics Examining traditional attitudes toward nature and the degree to which these attitudes enable us to cope with modern ecological problems Robin Attfield looks particularly at the Judeo Christian heritage of belief in humankind s dominion the tradition of stewardship and the more recent belief in progress to determine the extent to which these attitudes underlie ecological problems and how far they embody resources adequate for combating such problems He then examines concerns of applied ethics and considers our obligations to future generations the value of life and the moral standing and significance of nonhumans Simultaneously he offers and defends a theory of moral principles

appropriate for dealing with such concerns as pollution scarce natural resources population growth and the conservation and preservation of the environment The second edition includes a new preface and introduction as well as a bibliographic essay and an updated list of references incorporating relevant scholarship since the publication of the first edition

**The Machine Question** David J. Gunkel, 2017-09-08 An investigation into the assignment of moral responsibilities and rights to intelligent and autonomous machines of our own making One of the enduring concerns of moral philosophy is deciding who or what is deserving of ethical consideration Much recent attention has been devoted to the animal question consideration of the moral status of nonhuman animals In this book David Gunkel takes up the machine question whether and to what extent intelligent and autonomous machines of our own making can be considered to have legitimate moral responsibilities and any legitimate claim to moral consideration The machine question poses a fundamental challenge to moral thinking questioning the traditional philosophical conceptualization of technology as a tool or instrument to be used by human agents Gunkel begins by addressing the question of machine moral agency whether a machine might be considered a legitimate moral agent that could be held responsible for decisions and actions He then approaches the machine question from the other side considering whether a machine might be a moral patient due legitimate moral consideration Finally Gunkel considers some recent innovations in moral philosophy and critical theory that complicate the machine question deconstructing the binary agent patient opposition itself Technological advances may prompt us to wonder if the science fiction of computers and robots whose actions affect their human companions think of HAL in 2001 A Space Odyssey could become science fact Gunkel's argument promises to influence future considerations of ethics ourselves and the other entities who inhabit this world
