

Animals And People Sharing The World

Linda Kalof

Animals And People Sharing The World:

Animals and People Sharing the World Andrew N. Rowan, 1988 Timely essays by Harriet Ritvo James Serpell Elizabeth Lawrence Stephen Kellert others on the range of interactions of humans animals the environment **The Waltham Book of Human-Animal Interaction** I. Robinson, 2013-10-22 The Waltham Book of Human Animal Interaction Benefits and Responsibilities of Pet Ownership discusses the scientific study of the relationship between man and animals focusing on the behavior of companion animals and how humans and animals affect each other's behavior This first half of this book discusses research on benefits that have been found to accumulate from associations with animals and the role of animals in care and therapy program The responsibilities toward the animals kept and how to enhance their care and welfare are considered in the next chapters The human response to pet loss is also elaborated This publication is beneficial to veterinary students and individuals concerned with the study of human animal interactions *Animal Companions* Ingrid H. Tague, 2015-06-17 *Animal Companions* explores how eighteenth century British society perceived pets and the ways in which conversation about them reflected and shaped broader cultural debates While Europeans kept pets long before the eighteenth century many believed that doing so was at best frivolous and at worst downright dangerous Ingrid Tague argues that for Britons of the eighteenth century pets offered a unique way to articulate what it meant to be human and what society ought to look like With the dawn of the Enlightenment and the end of the Malthusian cycle of dearth and famine that marked previous eras England became the wealthiest nation in Europe with a new understanding of religion science and non European cultures and unprecedented access to consumer goods of all kinds These transformations generated excitement and anxiety that were reflected in debates over the rights and wrongs of human animal relationships Drawing on a broad array of sources including natural histories periodicals visual and material culture and the testimony of pet owners themselves *Animal Companions* shows how pets became both increasingly visible indicators of spreading prosperity and catalysts for debates about the morality of the radically different society emerging in eighteenth century Britain

Animals, Ethics and Trade Joyce D'Silva, Jacky Turner, 2012-05-16 Modern urban life cuts us off from direct connection with the animal world yet daily the lives of millions of animals are affected by what we consume and wear and what we trade in The use of animals for food labour and pleasure pursuits has long been justified with the assumption that unlike humans animals aren't fully sentient beings In recent years however science has revealed an astonishing array of complex animal behaviour and scientists and policy makers now accept that the animals we make use of are indeed conscious with preferences and intentions The implications for our culture of factory farming fast food and rainforest liquidation are staggering In this powerful book internationally renowned experts on animal behaviour and agriculture such as Jane Goodall Tim Lang and Vandana Shiva are brought together with ethicists religious scholars international industry and regulators for the first time to debate these critical issues and tackle the profound implications of animal sentience The first sections

discuss scientific and ethical perspectives on the consciousness emotions and mental abilities of animals Later sections address how human activities such as science law religion farming food production trade development and education respect or ignore animals sentience and welfare and review the options for changes in our policies our practices and our thinking The result is nothing less than a stark and necessary look into the heart of humanity and the ethics that govern our animal powered society

Pets, People, and Pragmatism Erin McKenna, 2013-03 This book examines human relationships with pets without assuming that such relations are either unnatural and to be avoided or benign We need to find ways to relate respectfully For respectful relationships to be a real possibility though humans must make the effort to understand the beings with whom they live work and play

Animal Passions and Beastly Virtues Marc Bekoff, 2006 An engaging thoughtful look at the science and ethics of research into animal behavior

Animal Geographies Jennifer Wolch, Jody Emel, 1998-09-17 Each year billions of animals are poisoned dissected displaced killed for consumption or held in captivity usually for the benefit of humans The animal world has never been under greater peril and this broad ranging collection contributes to a much needed fundamental rethinking about our relation with it *Animal Geographies* explores the diverse ways in which animals shape the formation of human identity Essays on zoos and wolves for example reveal how animals figure in social constructions of race gender and nationality From questions of identity and subjectivity it moves to a consideration of the places where people and animals confront the realities of coexistence on an everyday basis by way of case studies of species such as mountain lions and the golden eagle It then examines the ways in which animals figure in the ongoing globalization of production and mass consumption illustrated by essays on the US meatpacking industry and meat production in the Indian state of Rajasthan and finally takes up legal and ethical approaches to human animal relations *Animal Geographies* compels a profound rethinking of the nature of human animal relations and offers a series of proposals for reconstituting this relationship on a progressive basis Contributors Kay Anderson Glen Elder Andrea Gullo Unna Lassiter William S Lynn Suzanne M Michel Chris Philo James D Proctor Paul Robbins Frances M Ufkes James L Wescoat Jr

Between Pets and People Alan M. Beck, Aaron Honori Katcher, 1996 Since the first edition of *Between Pets and People* in 1983 the authors then startling contention that pets benefit our mental and physical health has found wide acceptance Evidence in our daily lives in television pet food ads in doctor s offices outfitted with aquaria attests to how widely the belief in pets therapeutic influence is now held This revised edition of *Between Pets and People* with additional data and case studies and expanded references including a listing of Internet resources and a foreword by Elizabeth Marshall Thomas analyzes the surprisingly complex relationships we have with our pets This book contains an important lesson for everyone to accept ourselves and others in the uncritical way that pets accept us and come to terms with our own animal nature

Pets and People Christine Overall, 2017 This work offers 18 ground breaking articles written by an international group of philosophers on companion animal ethics It explores the ethical foundations of our relationships with pets in particular dogs and cats and specific moral

issues including breeding reproduction sterilization cloning adoption feeding training working sexual interactions longevity dying and euthanasia **Human-Animal Studies: Geography** Margo DeMello, Jody Emel, 2010-10-01 One in the series of Human Animal Studies ebooks produced as a result of the printed publication of the definitive HAS handbook Teaching the Animal Human Animal Studies across the Disciplines This chapter focuses on cultural studies includes two course syllabi and has a full resources section covering all disciplines Includes chapter Animal Geographies by Jody Emel and Julie Urbanik

The Oxford Handbook of Animal Studies Linda Kalof, 2017 The Oxford Handbook of Animal Studies tackles the infamous animal question how can humans rethink and reconfigure their relationships with other animals Over the course of five sections and thirty chapters the contributors investigate issues and concepts central to understanding our current relationship with other animals and the potential for coexistence in an ecological community of living beings

Recognising and Responding to Animal Emotion in a Shared World Vicki Hutton, 2023-11-16 How is it that depending on the setting the same cat can be perceived as a homeless annoyance a potential research subject or a thinking and feeling family member The answer is bound up in our perception of non human animals capacity to experience emotions and this book draws on contemporary evidence based research observations interviews and anecdotal case scenarios to explore the growing knowledge base around animal emotion Acknowledging that animals can experience feelings directly affects the way that they are perceived and treated in many settings and the author explores the implications when humans apply or ignore this knowledge selectively between species and within species This information is presented within the unique context of a proposed hierarchy of perceived non human animals emotional abilities often based on human interpretation of the animal s emotional capacity with examples of how this manifests at an emotional spiritual and moral level Implications for specific groups living with caring for or working with non human animals are examined making the book of particular interest to those working studying or researching in the veterinary professions animal ethics law and welfare and zoology biology and animal science This book will also be fascinating reading for anyone interested in simply learning more about the animals with whom we share this planet For some readers it will validate the reciprocal emotional bond they feel for living creatures For others it will raise questions about the moral treatment of sentient non human beings breaking down the human protective barrier of cognitive dissonance and activating a cycle of change **In the Company of Animals** James Serpell, 1996-08-13 What purpose if any do pets really serve Are they simply an outlet for misplaced love Or four legged friends who help us to satisfy vital emotional needs Whatever they are when we elevate pets to the status of social companions we undermine the distinction between human and non human In other words pets force us to confront the moral contradictions inherent in our treatment of animals in general Pursuing this idea to its logical conclusion the author uncovers a fascinating and disturbing trail of myths evasions and double standards which humans have used since earliest times to justify their subjugation of nature and other life forms Through an exploration of the phenomenon of pet keeping

across history and between cultures this thought provoking study reassesses our relationships with animals and the natural world This new edition of *In the Company of Animals* has been substantially revised and updated to take into account developments in research since the first edition was published in 1986 **Teaching the Animal: The Social Sciences** ,

Understanding Dogs Clinton Sanders,1999-04-30 Behavior they often teach us how to more thoughtfully enjoy physical warmth a nourishing meal a walk in the woods or the simple joys of the immediate moment Book jacket Current Bibliographies in Medicine ,1988 **The Domestic Dog** James Serpell,1995 A scientific analysis of dogs their behaviour and their relationships with humans **Learning Love from a Tiger** Daniel Capper,2016-04-19 Learning Love from a Tiger explores the vibrancy and variety of humans sacred encounters with the natural world gathering a range of stories culled from Christian Muslim Hindu Mayan Himalayan Buddhist and Chinese shamanic traditions Readers will delight in tales of house cats who teach monks how to meditate shamans who shape shift into jaguars crickets who perform Catholic mass rivers that grant salvation and many others In addition to being a collection of wonderful stories this book introduces important concepts and approaches that underlie much recent work in environmental ethics religion and ecology Daniel Capper s light touch prompts readers to engage their own views of humanity s place in the natural world and question longstanding assumptions of human superiority The Oxford Handbook of Evolutionary Family Psychology Catherine Salmon,Todd K. Shackelford,2011-05-27 The Oxford Handbook of Evolutionary Family Psychology focuses on the psychology behind people s familial behavior an understanding of which can illuminate our understanding of modern ancient and animal families *Shared Lives of Humans and Animals* Tuomas Räsänen,Taina Syrjämaa,2017-04-21 The book focuses on animal agency and interactions between humans and animals It explores the reciprocity of human animal relations and the capacity of animals to act and shape human societies The chapters draw on examples from the Global North to explore questions of how industrialization urbanization and human life in modernity have been a
