Animals In Danger Rhino Animals In Danger:

Rhinos in Danger Lydia Snyder, 2013-08-01 Don't get in a rhino's way! A charging rhino is one of the most dangerous animals in the world. And it may only attack because it can't see well. Rhinos are named for their horns, but tragically these horns are the reason all rhino species are threatened or endangered today. Poachers kill the huge beasts for these trophies. Only about 50 Javan rhinos are left. Readers will be inspired to take action to keep these and other rhinos from becoming extinct. *Animals in Danger*, 1974. Discusses some animals that have become extinct, describes various animals throughout the world threatened by the same fate today, and examines what can be done to save them. **Animals That Could Kill**
