Black British Literature Mark Stein,2004 In this fascinating book Mark Stein examines black British literature centering on a body of work created by British based writers with African South Asian or Caribbean cultural backgrounds Linking black British literature to the bildungsroman genre this study examines the transformative potential inscribed in and induced by a heterogeneous body of texts Capitalizing on their plural cultural attachments these texts portray and purvey the transformation of post imperial Britain Stein locates his wide ranging analysis in both a historical and a literary context He argues that a cross cultural and interdisciplinary approach is essential to understanding post colonial culture and society The book relates black British literature to ongoing debates about cultural diversity and thereby offers a way of reading a highly popular but as yet relatively uncharted field of cultural production With the collapse of its empire with large scale immigration from former colonies and with ever increasing cultural diversity Britain underwent a fundamental makeover in the second half of the twentieth century This volume cogently argues that black British literature is not only a commentator on and a reflector of this makeover but that it is simultaneously an agent that is integral to the processes of cultural and

social change Conceptualizing the novel of transformation this comprehensive study of British black literature provides a compelling analytic framework for charting these processes **The Cambridge Introduction to Modern British Fiction, 1950-2000** Dominic Head, 2002-03-07 In this introduction to post war fiction in Britain Dominic Head shows how the novel yields a special insight into the important areas of social and cultural history in the second half of the twentieth century Head's study is the most exhaustive survey of post war British fiction available It includes chapters on the state and the novel class and social change gender and sexual identity national identity and multiculturalism Throughout Head places novels in their social and historical context He highlights the emergence and prominence of particular genres and links these developments to the wider cultural context He also provides provocative readings of important individual novelists particularly those who remain staple reference points in the study of the subject Accessible wide ranging and designed specifically for use on courses this is the most current introduction to the subject available An invaluable resource for students and teachers alike

Unity in Diversity Revisited? Barbara Korte, Klaus Peter Müller, 1998 **Translation of Cultures** Petra Wittke-Rüdiger, Konrad Gross, 2009 The contributors to this collection approach the subject of the translation of cultures from various angles Translation refers to the rendering of texts from one language into another and the shift between languages under precolonial retelling transcreation colonial domestication and postcolonial multilingual trafficking conditions
