encuentra la realidad profesional repleta de incertidumbres y contradicciones. Equivocadamente la arquitectura ha encaminado sus pasos en una dirección contraria a los principios fundamentales y funcionales que le brindan sustento, estableciendo como casi exclusiva prioridad el manejo estético de sus obras. De esta manera se desestiman cada vez más los aspectos tecnológicos, ambientales, económicos y desde luego la correcta supervisión y control de calidad de la construcción. Al ser considerada una de las Bellas Artes, la arquitectura ha abandonado paulatinamente responsabilidades que le corresponden al Arquitecto, ocasionando no solo un problema técnico sino también de índole técnico al subestimarse la funcionalidad, confort, costo y mantenimiento de los edificios. La teoría dictada en los claustros universitarios es la misma desde hace muchos años. No ha sido actualizada dadas las nuevas demandas sociales del siglo XXI, creando una desconexión entre los conceptos impartidos y la realidad. Como acabar de una vez por todas con la Arquitectura, conforma un itinerario llamado de atención. A partir de reflexiones no exentas de humor, el arquitecto Gustavo Di Costa revisa una serie de temas en los cuales se verifican problemáticas precisas. La formación universitaria del Arquitecto, el ejercicio de la profesión, el diseño, la dirección de obra y la construcción son analizados por el autor con su particular mirada. Risuea pero sumamente comprometida. **Catálogos de documentos de arte** Margarito Sandoval Pérez, 1998
