Annals Of Theoretical Psychology Annals Of Theoretical Psychology:

Annals of Theoretical Psychology Hans van Rappard, Pieter J. van Strien, Leendert P. Mos, William J. Baker, 2013-11-11
This volume and its companion to be published as Volume 9 in the Annals series had their origin in a visit by the first editor to our Center in 1983 a year prior to our initiating publication of the Annals Some three years later Hans Rappard formally proposed to edit together with the historian of psychology in the Netherlands Pieter van Strien an Annals volume devoted to history and theory Rappard emphasized however that it was to be not just a volume on the relation between history of psychology and theoretical psychology but rather a volume on the relevance of history to theory or psychology in general In other words how and what could doing history contribute to theoretical problems that face contemporary psychology Another four years passed before commitments from the twenty seven contributors were received The plan was to publish a single volume devoted to history and theory however the length of six major papers eighteen commentaries and replies to commentaries necessitated a decision to publish the manuscript in two volumes It was not an easy decision especially as the contributors and editors had achieved an integrity of theme and content that is unusual for edited volumes Moreover in view of the manuscript's long past we felt little inclination to extend its history **Annals of Theoretical Psychology** Leendert Mos, 2012-12-06 Some one hundred years ago the founding fathers optimistically launched psychology as a science The premise was that the new science must break away from its parental ties to philosophy and confine itself to gathering data preferably in the psychology laboratory There is little doubt that this early commitment to an observation and accumulation of data only policy was helpful in the launching of the new science Some idea of how critical this move to empiricism was can be gathered from the following quotation taken from Wolman 1973 p 32 It was not an easy task to transform the old mental philosophy into a natural science Natural science used observation and experimentation they observed their subject matter as it were from without Wundt's psychology was supposed to study observable stimuli and responses but there was so much that was unobservable in psychology Although the launching was eventually a success there is little doubt that the high hopes of the founding fathers have not materialized *Annals of Theoretical Psychology* Leendert Mos, 1984-02-01

Annals of Theoretical Psychology K.B. Madsen, Leendert P. Mos, 2013-11-11 As a follow up to Volume 7 contributors continue to explore the latest developments in developmental psychology Here researchers focus on the integration of theory and research and evaluates theoretical progress and advanced research Continuing with the successful format of previous volumes in Annals of Theoretical Psychology Volume 10 presents four major contributions each accompanied by commentaries and replies to commentaries *Annals of Theoretical Psychology* Arthur W. Staats, Leendert P. Mos, 2012-12-06 I have been involved in constructing a unified theory for many years in considering the state of psychology's unity disunity and in generally attempting to persuade our profession to work on its unification In this work I have had the opportunity to become acquainted with the works of a number of other psychologists whose statements indicated that they

had something to say on these topics I saw also that it would be very productive for psychology to have these individuals address themselves to psychology's disunity considered as a problem that should be confronted and addressed In 1983 I began to indicate that it was my intention to devote a book to the topic as seen through the eyes of a group of prominent psychologists concerned with related issues It was very fortunate from my standpoint that Joseph Royce and later Leendert Mos who were editing this series were interested in this book I accepted the former's invitation to do within the present series the book I had planned Although I must assume responsibility for selection of the contributors for the book's organization and for the first editing of their papers for substance Professor Mos offered to help in an editorial capacity and I am most grateful for his contributions to the formal editing The volume is much improved as a result of his careful efforts which in one case involved rewriting material

Annals of Theoretical Psychology. -- Vol. 1, 1984 **Annals of Theoretical Psychology** Paul Van Geert, Leendert P. Mos, 2013-11-11 This is the first of a two volume work in the Annals series devoted to developmental psychology The project was originally conceived in 1985 when Paul van Geert who had just completed his Theory building in developmental psychology North Holland 1986 agreed to collaborate on an Annals volume examining foundational issues pertaining to the concept of development The project attracted considerable interest and in view of the length of the resulting manuscript a decision was made to publish it in two volumes Fortunately the contributors provided coherent perspectives on two relatively distinct developmental themes which served to facilitate our task of dividing their contributions into two volumes The first volume deals with the foundations of developmental theory and methodology the second volume to appear as Volume 8 of the Annals with theoretical issues in developmental psychology In this first volume the contributions by Willis Overton and Joachim Wohlwill were completed in 1988 those by Roger Dixon Richard Lerner and David Hultsch and Paul van Geert in 1989 Commentaries followed quickly and replies to commentaries were completed in 1990 Paul van Geert provides a general framework within which the foundational issues of development are discussed He is especially concerned with the nature of transition models and the structure of time in developmental theory The relationship between methods and framework or theory is the topic of Joachim Wohlwill's contribution

Annals of Theoretical Psychology Joseph R. Royce, Leendert Mos, 1984-11-30 As such things happen several manuscripts in the present volume were under review prior to the ones that appeared in Volume I of the Annals A major difficulty encountered in the preparation of these volumes apart from working up to three years in advance of publication is eliciting appropriate commentary If this format is to succeed the commentary must be both engaging to the reader and satisfying to the author It is not yet clear how successful we have been in this regard and indeed we do not feel bound to publish commentary with each manuscript that is accepted for publication Nevertheless we do invite readers' commentaries on published materials The contributions by Jan Smedslund and Benjamin Wolman in this volume have been through an inordinately long publication lag We have been in receipt of both manuscripts since early in 1981 and Dr Smedslund especially has since clarified and

advanced his views elsewhere in print K B Madsen and Joseph Rychlak submitted their manuscripts in the fall of 1981 while Michael Hyland and J Philippe Rushton had first drafts of their manuscripts accepted for publication in the fall of 1982 We are grateful to our contributors for their expressed commitment to the Annals and assure potential contributors that the delay in publication is a mere matter of getting the series off the ground *Annals of Theoretical Psychology* Joseph R. Conference, Wolfgang Maiers, 1999 Annals of Theoretical Psychology ,1984 **Recent Trends in Theoretical Psychology** W.J. Baker, Leendert P. Mos, Hans V. Rappard, Henderikus J. Stam, 2012-12-06 This volume constitutes the proceedings of the second biannual conference of the International Society for Theoretical Psychology see Epilogue held in Banff Alberta Canada April 20-25 1987 Thirty nine papers were presented during the four days of the conference including an invited address by Kenneth Gergen Unfortunately even after severely restricting the length of the written papers the required limitation on printed space permitted only 34 of these to be included in these proceedings While most of the papers required editorial adjustment the authors had final word on style and content The classification of conference papers tends to be somewhat arbitrary but we decided to structure the chapters under four headings philosophy metatheory methodology and theory By philosophy we refer primarily to issues in the philosophy of science as these pertain to the discipline of psychology Metatheory refers to theory drawing on the philosophy of science and having implications for methodology about psychological theories Methodology refers to both theory of inquiry and specific methods of investigation as these derive from philosophical and meta-theoretical considerations By theory we refer to both analyses of the foundations of extant theory including historical and sociological analyses and the advancement of substantive theory **Re-envisioning Theoretical Psychology** Thomas Teo, 2019-05-29 This volume presents a re

envisioning of the field of theoretical psychology and offers unique visions for its present and future from leaders of North American philosophical psychology. It contends that theoretical psychology has reached middle age and must consider new directions to renew its growth. Rooted in a range of research traditions and the intellectual biographies of its authors, it paves the way toward this necessary revitalization of the content, activities, responsibilities, and hopes of theoretical psychology. The authors situate their analyses in the context of the increasing gap between alternative and mainstream and between the discipline and the profession of psychology. They demonstrate that changes in society, culture, and technology, the internationalization of the psychological humanities, and the cross fertilization of intellectual innovations from other disciplines now afford possibilities for new orientations in theoretical psychology. The volume aims to do justice to psychological topics, human beings, and the intellectual problems that psychologists encounter while also providing space for meta-theoretical engagement often neglected in the discipline. Together, the chapters in this collection make the case that a renewal of the discipline and practice of psychology is a task that is best accomplished collectively and despite significant disagreements, in solidarity.

Recent Trends in Theoretical Psychology Henderikus J. Stam, Leendert P. Mos, Warren Thorngate, Bernie Kaplan, 2012-12-06. I was asked and alas with little reflection on the magnitude of the task, thoughtlessly consented to take on the simple job of writing a preface to the collection of essays comprising this volume. That I was asked to carry out this simple task was probably due to one consideration: I was the main representative of the host institution, Clark University, for the 1991 ISTP Conference at which the talks foreshadowing and outlining the extended remarks here printed were originally presented and hence, as a token of gratitude, I was vouchsafed the honor of setting the stage. It did not dawn on me until I began piecemeal to receive and accumulate over a period of months the remarkably diverse and heterogeneous essays precipitated by the conference how mind-boggling it would be to pen a preface pertinent to such an aggregate of *prima facie* unrelated articles. Typically, prefaces to collections of essays from different hands are attempts by the prefator or a pride of prefators to provide an overview, a concise map of the complex terrain which readers are invited to enter or to direct the attention of potential readers to what the editors take to be the essential or central themes of each of the variegated articles, a practice which not infrequently and often not unjustifiably irritates and even enrages individual authors who object to the complexity, profundity, and nuanced character of their thought being reduced to clichs and editorial equivalents of sound bites.

Handbook of Child Psychology, Theoretical Models of Human Development William Damon, Richard M. Lerner, 2006-05-19. Part of the authoritative four-volume reference that spans the entire field of child development and has set the standard against which all other scholarly references are compared. Updated and revised to reflect the new developments in the field, the Handbook of Child Psychology, Sixth Edition, contains new chapters on such topics as spirituality, social understanding, and non-verbal communication. Volume 1: Theoretical Models of Human Development, edited by Richard M. Lerner, Tufts University, explores a variety of theoretical approaches including life span, life course theories, socio-culture
