Lawrence,2019-11-27 The Grieving Child in the Classroom integrates the latest research on children s bereavement and adapts it for use in the classroom Chapters tackle the neurological cognitive emotional and social effects of childhood grief and demonstrate the ways in which those reactions can manifest in the classroom By recognizing individual differences in coping styles and considering variables such as developmental stage nature of the loss and availability of support teachers and staff can become better equipped to respond to the bereaved child s needs The book incorporates theoretical explanations of grief responses as well as practical suggestions for supporting bereaved children in real world settings Whether the loss affects one child or the entire student body educators can turn to this comprehensive guidebook for ways to support grieving students in their classrooms *Children Mourning, Mourning Children* Kenneth J. Doka,2014-01-21 Based on the Hospice Foundation of America s second annual teleconference this book explores three basic themes in children s grief Firstly it maintains that children are always developing therefore their understanding of death and their reactions to

illness and loss are also multifaceted and constantly undergoing change Secondly children grieve in ways that are both different from and similar to adults While they may need different therapeutic approaches from their elders each loss is different and the grief experience will be affected by many of the same factors that affect adults Thirdly it holds that they need significant support as they grieve Talking to children about loss and illness is too important to wait until a crisis rather it is essential to provide opportunities to discuss loss in times that are not so Emotionally Laden This Book Aims To Demonstrate That Open Communication between parents and children will lead to skills and understanding that are essential to the child for coping with loss and reaffirming that death is part of the process of living
