Genocide Adam Jones, 2006-09-27 An invaluable introduction to the subject of genocide explaining its history from pre modern times to the present day with a wide variety of case studies Recent events in the former Yugoslavia Rwanda East Timor and Iraq have demonstrated with appalling clarity that the threat of genocide is still a major issue within world politics The book examines the differing interpretations of genocide from psychology sociology anthropology and political science and analyzes the influence of race ethnicity nationalism and gender on genocides In the final section the author examines how we punish those responsible for waging genocide and how the international community can prevent further bloodshed

The Historiography of Genocide Anton Weiss-Wendt, Robert Krieken, Alfred A. Cave, Ben Kiernan, Doris Bergen, David Moshman, Victoria Sanford, John Docker, Robert Hitchcock, 2008-02-13 The Historiography of Genocide is an indispensable guide to the development of the emerging discipline of genocide studies and the only available assessment of the historical literature pertaining to genocides

The Politics of Annihilation Benjamin Meiches, 2019-03-19 How did a powerful concept in international justice evolve into an inequitable response to mass suffering For a term coined just seventy five years ago genocide has become a remarkably potent idea But has it transformed from a truly novel vision for international justice into a conservative even inaccessible term The Politics of Annihilation traces how the concept of genocide came to acquire such significance on the global political stage In doing so it reveals how the concept has been politically contested and refashioned over time It explores how these shifts implicitly impact what forms of mass violence are considered genocide and what forms are not Benjamin Meiches argues that the limited conception of genocide often rigidly understood as mass killing rooted in ethno religious identity has created legal and political institutions that do not adequately respond to the diversity of mass violence In his insistence on the concept's complexity he does not undermine the need for clear

condemnations of such violence But neither does he allow genocide to become a static or timeless notion Meiches argues that the discourse on genocide has implicitly excluded many forms of violence from popular attention including cases ranging from contemporary Botswana and the Democratic Republic of Congo to the legacies of colonial politics in Haiti Canada and elsewhere to the effects of climate change on small island nations By mapping the multiplicity of forces that entangle the concept in larger assemblages of power The Politics of Annihilation gives us a new understanding of how the language of genocide impacts contemporary political life especially as a means of protesting the social conditions that produce mass violence

The Specter of Genocide Robert Gellately, Ben Kiernan, 2003-07-07 Genocide mass murder and human rights abuses are arguably the most perplexing and deeply troubling aspects of recent world history This collection of essays by leading international experts offers an up to date comprehensive history and analyses of multiple cases of genocide and genocidal acts with a focus on the twentieth century The book contains studies of the Armenian genocide the victims of Stalinist terror the Holocaust and Imperial Japan Several authors explore colonialism and address the fate of the indigenous peoples in Africa North America and Australia As well there is extensive coverage of the post 1945 period including the atrocities in the former Yugoslavia Bali Cambodia Ethiopia Rwanda East Timor and Guatemala The book emphasizes the importance of comparative analysis and theoretical discussion and it raises new questions about the difficult challenges for modernity constituted by genocide and other mass crimes

Warning Signs of Genocide E.N. Anderson, Barbara A. Anderson, 2012-10-26 Genocide occurs when a government attempts to exterminate systematically a large percentage of its own citizens or subjects simply because they fall into a particular group defined by religion ethnicity political affiliation or rarely other group identification ranging from occupation to gender status Genocide has been a major cause of death worldwide over the last 100 years or more and is far from being eliminated Through examining available cases Warning Signs of Genocide An Anthropological Perspective shows that genocide becomes a live danger when group hatreds especially religious ethnic and political are exploited by political regimes as major ways of seizing and maintaining power Genocide is actually invoked however only when such regimes feel they are threatened usually either because they are new and not consolidated in power or because they are challenged by local rebellions civil war or less often international war or major economic decline Knowing these warning signs should make the international community take note that genocide is virtually certain to occur and take action to stop it This book joins others in noting that the international community has rarely intervened in time and in the hope that these findings will encourage more prompt action

Living in Death Richard Rechtman, 2021-11-02 Winner Prix Litt raire Paris Li ge 2021 Winner French Voices Award for Excellence in Publication and Translation When we speak of mass killers we may speak of radicalized ideologues mediocrities who only obey orders or bloodthirsty monsters Who are these men who kill on a mass scale What is their consciousness Do they not feel horror or compassion Richard Rechtman s Living in Death offers new answers to a question that has haunted us at least since the

Holocaust For Rechtman it is not ideologies that kill but people This book descends into the ordinary life of people who execute hundreds every day the same way others go to the office Bringing philosophical sophistication to the ordinary the book constitutes an anthropology of mass killers Turning away from existing psychological and philosophical accounts of genocide s perpetrators Rechtman instead explores the conditions under which administering death becomes a job like any other Considering Cambodia Rwanda and other mass killings Living in Death draws on a vast array of archival research psychological theory and anecdotes from the author s clinical work with refugees and former participants in genocide Rechtman mounts a compelling case for reframing and refocusing our attempts to explain and preempt acts of mass torture rape killing and extermination What we must see Rechtman argues is that for genocidaires those who carry out acts that are or approach genocide there is nothing extraordinary unusual or world historical about their actions On the contrary they are preoccupied with the same mundane things that characterize any other job interactions with colleagues living conditions a drink and a laugh at the end of the day To understand this is to understand how things came to be the way they are and how they might be different

Annihilation Mark Levene, 2013-12-19 From the years leading up to the First World War to the aftermath of the Second Europe experienced an era of genocide As well as the Holocaust this period also witnessed the Armenian genocide in 1915 mass killings in Bolshevik and Stalinist Russia and a host of further ethnic cleansings in Anatolia the Balkans and Eastern Europe Crisis of Genocide seeks to integrate these genocidal events into a single coherent history Over two volumes Mark Levene demonstrates how the relationship between geography nation and power came to play a key role in the emergence of genocide in a collapsed or collapsing European imperial zone the Rimlands and how the continuing geopolitical contest for control of these Eastern European or near European regions destabilised relationships between diverse and multifaceted ethnic communities who traditionally had lived side by side An emergent pattern of toxicity can also be seen in the struggles for regional dominance as pursued by post imperial states nation states and would be states Volume II Annihilation covers the period from 1939 to 1953 particularly focussing on the Second World War and its aftermath the Holocaust and its lasting impact and the latter part of the Stalinist regime Levene demonstrates that while the attempted Nazi mass murder of the entirety of European Jewry represents the most thoroughgoing and extreme consequence of efforts aimed at political and social reformulation of the Rimlands arena in particular the accumulation and concentration of genocidal violence against many minority groups would suggest that anti Semitism or racism alone is insufficient to provide a comprehensive explanation for genocide

The Oxford Handbook of Genocide Studies Donald Bloxham, A. Dirk Moses, 2010-04-15 The first book to subject both genocide and this young discipline to systematic in depth analysis Thirty four renowned experts study genocide world wide through the ages by taking regional thematic and disciplinary approaches
