Thinking Like a Political Scientist Christopher Howard, 2022-12-22 A compelling case for transforming how research methods are taught to undergraduate students of political science London School of Economics Review of Books Each year tens of thousands of students who are interested in politics go through a rite of passage they take a course in research methods Many find the subject to be boring or confusing and with good reason Most of the standard books on research methods fail to highlight the most important concepts and questions Instead they brim with dry technical definitions and

focus heavily on statistical analysis slighting other valuable methods This approach prevents students from mastering the skills they need to engage more directly and meaningfully with a wide variety of research With wit and practical wisdom Christopher Howard draws on more than a decade of experience teaching research methods to transform a typically dreary subject and teach budding political scientists the critical skills they need to read published research more effectively and produce better research of their own The first part of the book is devoted to asking three fundamental questions in political science What happened Why Who cares In the second section Howard demonstrates how to answer these questions by choosing an appropriate research design selecting cases and working with numbers and written documents as evidence Drawing on examples from American and comparative politics international relations and public policy *Thinking Like a Political Scientist* highlights the most common challenges that political scientists routinely face and each chapter concludes with exercises so that students can practice dealing with those challenges

[Surviving the Islamic State](#) Austin Knappe, 2024-07-02 How did ordinary Iraqis survive the occupation of their communities by the Islamic State How did they decide whether to stay or flee to cooperate or resist Based on an original survey from Baghdad alongside key interviews in the field this book offers an insightful account of how Iraqis in different areas of the country responded to the rise and fall of the Islamic State Austin J Knappe argues that people adopt survival repertoires a variety of social practices tools organized routines symbols and rhetorical strategies to navigate wartime violence and detect threats He traces how repertoires varied among different communities over the course of the conflict In areas insulated from insurgent control such as cosmopolitan Baghdad local residents had the flexibility to support coalition forces while also voicing opposition to government policies For Iraqis in rural communities confronting insurgent control collaboration and resistance entailed significant risks In Sunni majority communities in the western desert passive acquiescence and active cooperation temporarily insulated Iraqis from insurgent victimization For ethnic and religious minorities in the north however flight or resistance proved the only viable options In many communities local residents mobilized neighborhood self defense groups and militias loosely aligned with coalition forces once the tides turned against the Islamic State Beyond contributing to academic and policy debates about civilian

protection during wartime Surviving the Islamic State foregrounds everyday people s experiences while modeling an ethical approach for conducting field research in conflict affected communities Annual Report New Jersey State Library,1893
