Scale in Conscious Experience Joseph S. King,Karl H. Pribram,2013-04-15 This volume is the result of the third Appalachian Conference on Behavioral Neurodynamics which focused on the problem of scale in conscious experience Set against the philosophical view of eliminative materialism the purpose of this conference was to facilitate communication among investigators who approach the study of consciousness and conscious phenomena from a variety of analytical levels One speculative outcome of the conference is that the columnar arrangement within primary sensory cortices may provide the local isolation necessary for nonlocal interactions to occur In addition the relationship between unit activity and field potentials within a circumscribed region of cortex may provide the other enigmatic aspect of neurophysiological nonlocality namely the common context in the macro scale So instead of a problem looking for a solution scale becomes a solution to a problem Only further research will determine the utility of the ideas expressed here

Mechanical Choices Michael S. Moore, 2020 This book assays how the remarkable discoveries of contemporary neuroscience impact upon our conception of ourselves and our responsibility for our choices and our actions Dramatic and indeed revolutionary changes in how we think of ourselves as agents and as persons are commonly taken to be the implications of those discoveries of neuroscience Indeed the very notions of responsibility and of deserved punishment are thought to be

threatened by these discoveries Such threats are collected into four groupings 1 the threat from determinism that neurosciences shoes us that all of our choices and actions are caused by events in the brain that precede choice 2 the threat from epiphenomenalism that our choices are shown by experiment not to cause the actions that are the objects of such choice but are rather mere epiphenomena co effects of common causes in the brain 3 the threat from reductionist mechanism that we and everything we value is nothing but a bunch of two valued switches going off in our brains and 4 the threat from fallibilism 5 that we are not masters in our own house because we lack the privileged knowledge of our own minds needed to be such masters The book seeks to blunt such radical challenges while nonetheless detailing how law morality and common sense psychology can harness the insights of an advancing neuroscience to more accurately assign moral blame and legal punishment to the truly deserving
