 Introduction Nanotechnology and its underpinning sciences are progressing with unprecedented rapidity With technical
 advances in a variety of nanoscale fabrication and manipulation technologies the whole topical area is maturing into a vibrant
 field that is generating new scientific research and a burgeoning range of commercial applications with an annual market
 already at the trillion dollar threshold The means of fabricating and controlling matter on the nanoscale afford striking and
 unprecedented opportunities to exploit a variety of exotic phenomena such as quantum nanophotonic and
 nanoelectromechanical effects Moreover researchers are elucidating new perspectives on the electronic and optical
 properties of matter because of the way that nanoscale materials bridge the disparate theories describing molecules and bulk
 matter Surface phenomena also gain a greatly increased significance even the well known link between chemical reactivity

and surface to volume ratio becomes a major determinant of physical properties when it operates over nanoscale dimensions Against this background this comprehensive work is designed to address the need for a dynamic authoritative and readily accessible source of information capturing the full breadth of the subject Its six volumes covering a broad spectrum of disciplines including material sciences chemistry physics and life sciences have been written and edited by an outstanding team of international experts Addressing an extensive cross disciplinary audience each chapter aims to cover key developments in a scholarly readable and critical style providing an indispensable first point of entry to the literature for scientists and technologists from interdisciplinary fields The work focuses on the major classes of nanomaterials in terms of their synthesis structure and applications reviewing nanomaterials and their respective technologies in well structured and comprehensive articles with extensive cross references It has been a constant surprise and delight to have found amongst the rapidly escalating number who work in nanoscience and technology so many highly esteemed authors willing to contribute Sharing our anticipation of a major addition to the literature they have also captured the excitement of the field itself in each carefully crafted chapter Along with our painstaking and meticulous volume editors full credit for the success of this enterprise must go to these individuals together with our thanks for largely adhering to the given deadlines Lastly we record our sincere thanks and appreciation for the skills and professionalism of the numerous Elsevier staff who have been involved in this project notably Fiona Geraghty Megan Palmer and Greg Harris and especially Donna De Weerd Wilson who has steered it through from its inception We have greatly enjoyed working with them all as we have with each other

The Rare Earths in Modern Science and Technology J. McCarthy, 2012-12-06 The Fifteenth Rare Earth Research Conference was held June 15-18 1981 on the Rolla campus of the University of Missouri The conference was hosted by the Graduate Center for Materials Research the College of Arts and Science and the School of Mines and Metallurgy It was expected that the conference would provide a forum for critical examination and review of the current and important trends in rare earth science and technology To this end over 170 papers were presented in both oral and poster sessions by researchers representing some nineteen countries The program committee was particularly gratified to see the diversity of effort being devoted to rare earth research by different disciplines all over the world The collection of refereed papers in this volume attests to the fact that the objectives of the program committee were indeed realized A high point of the meeting was the presentation of the Frank H Spedding Award to a most distinguished colleague Professor Georg Busch Eidgenössische Technische Hochschule Zurich Professor W Edward Hall University of Pittsburgh recipient of the first Frank H Spedding Award made the presentation to Professor Busch who then gave the Plenary Address
