JEKYLL, 2018 *Annuals Biennials, the Best Annual and Biennial Plants and Their Uses in the Garden, 1916* Gertrude Jekyll, 2015-06-15 Excerpt from *Annuals Biennials the Best Annual and Biennial Plants and Their Uses in the Garden* 1916 A favourite annual with soft blue flowers it should be sown in autumn and also in spring and summer in succession About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **A Beginner's Guide to Annuals and Biennials - Essential Guide for a Beautiful Garden** Dueep Singh, John

Davidson, Mendon Cottage Mendon Cottage Books, 2015-01-16 Table of Contents A Beginner's Guide to Annuals and Biennials Introduction Choosing the Right Soil Soil Color and Fertility Humus Preparation of the Soil Best Time for Seed Sowing The Thinning Process Staking Your Annuals Why Mulch Cultivation and Maintenance Watering your Plants List of Hardy annuals Half Hardy Annuals Annuals Suitable for Cutting Purposes Annuals for autumn blooming Half Hardy Annuals for Edging Your Border Knowing More about Biennials Sowing the seeds Preparing the Ground List of Popular Biennials Conclusion Author's Bio Publisher Introduction There are far too many people out there who are under the impression that you cannot have a beautiful garden without spending huge amounts of money That is so not true A little bit of planning and this fallacy is going to fall to pieces by the wayside Those who are grown annuals for years are going to give this statement the lie gladly Their initial investment must have been just a packet of seeds The next year the plants were grown from the seeds collected from the previous years crop Do not forget that the life of an annual is limited to just 12 months and so you must not expect them to grow up and bloom again the next year unless of course you allowed the seeds to lie in the bed without collecting them That is when they are going to bloom up just like weeds with a little bit of rain and with the coming of the spring One of the great advantages of annuals is that they are quite easy to grow and flourish in your garden over a long period The most common are well known to even amateur gardeners who can recognize a cornflower nasturtiums Virginia stock and Candytuft These are very beautiful in themselves but every gardener is growing them in his garden So be a little adventurous and grow annuals that are lesser known whose names you will find in seed catalogs nursery catalogs and in nurseries online There are two kinds of annuals the hardy kind and the half hardy kind The hardy annuals are sown out of doors either in the autumn or in the spring The half hardy annuals are normally raised in frames or under cloches if you are subject to a continuous frost Half hardy annuals may need a little bit more of extra care and coddling but that extra is going to be worth it when you see the blossoms in your garden Annual and Biennial Garden Plants, Their Value and Uses, 1911 A. E. Speer, 2015-06-17 Excerpt from Annual and Biennial Garden Plants Their Value and Uses 1911 With Full Instructions for Their Cultivation Annuals and Biennials are plants with limited lives An Annual is a plant that is raised from seed which germinates grows comes to maturity seeds and dies irrespective of frost all within the period of a year In Nature these seeds are scattered broadcast in the Autumn by the winds and other agents and quickly germinate thus reproducing themselves year by year Hardy Annuals are those which need no protection There are numerous Hardy Annuals that will stand a great amount of frost and bad weather if as Nature dictates they are sown in the Autumn But this is not the common practice For one thing a gardener usually is far too busy at that time of the year digging sweeping up leaves potting up geraniums attending to the glass houses and frames and many other duties that he is not justified in spending his time in sowing Annuals when he considers the Spring will do as well Neither does he wish to risk the Winter when he has enemies enough to contend with So in spite of Nature's teachings he sows in early Spring when he considers the risks are over Nevertheless
