Teaching Young Children: Choices In Theory And Practice Mac Naughton, Glenda, Williams, Gillian, 2008-11-01 This book presents early childhood students and staff with a broad and diverse range of teaching techniques to support children's learning. It examines 26 techniques ranging from simple ones such as describing and listening to more complex methods such as deconstruction and scaffolding. The strategies selected are derived from the best current research knowledge about how young children learn. A detailed evaluation of each strategy enables childcare staff, early childhood teachers and students to expand their repertoire of teaching strategies and to critically evaluate their own teaching in early childhood settings. Vignettes and examples show how early childhood staff use the techniques to support children's learning and help to bring the discussion of each technique to life. Revised and updated in light of the latest research, new features include: Coverage of the phonics debate; Addition of ICT content; Questions for further discussion; Revision to the chapter on problem solving; Updated referencing throughout. *Teaching Young Children* is key reading for students and experienced early childhood staff working in diverse settings with young children. *Health and Wellbeing for Babies and Children* Jackie Musgrave, 2022-11-04

This evidence-based text explores children's health and wellbeing from birth to adolescence, taking into account the familial, cultural, social, economic, environmental and global contexts of their lives. Divided into three parts, this book draws on an international body of research and theoretical perspectives on the determinants of health, such as hereditary, socioeconomic, environmental, geopolitical, gender and cross-cultural factors. It begins with an overview of child health and wellbeing, before exploring global influences on health. The second part of the book focuses on health promotion and safeguarding. The final part looks at a range of health conditions that may impact children's health, including infectious diseases, chronic health conditions and mental health. The book ends with a discussion of the role and contribution of families, carers, health professionals, hospitals, the wider community, charities and government, and examines how children with health needs and their families can best be supported. Each chapter includes critical questions, case studies and reflection points, all followed by a commentary to help the reader to think through the issues. Designed for all those working with children or studying to work with children, *Health and Wellbeing for Babies and Children: Contemporary Issues* is ideal for students undertaking courses on public health, nursing, children's nursing, early years education, childhood studies and social work, among others.
