theorising play as a pedagogical activity Whenever a cultural historical approach is applied to understanding pedagogical play the whole context of the playful event is always included Further the child s cultural environment is taken into account in order to better understand their play Children from different countries play differently for many reasons which may include their resources local cultural beliefs about play and specific pedagogical practices The inclusion and acknowledgement of social cultural and historical contexts gives credence and value to understanding play from both child and adult perspectives which the authors believe is important for the child s learning and development As such the relationships that children and adults have with human and non human others as well as any connections with artefacts and the material environment are included in all considerations of pedagogical play
