A multiplicity of spaces produced and re configured. The book looks to be a heterotopic production with different chapters and spaces of genre production, mediums, technologies, homes, bodies etc reflecting, refracting and colliding to offer insight into spatial relationships and the implications of these spaces for a society that increasingly inhabits the world through the space of the screen. A focus on American science fiction offers further spatial focus for this study, a question of geographical and cultural borders and influence not only in terms of American science fiction but American television and streaming services. The contested hegemonic nature of American science fiction television will be discussed alongside a nation that has significantly been understood even produced through the television screen. Essays will examine the various re configurations or productions of space as they collapse into the science fiction heterotopia of television since 1987 the year *Star Trek: Next*
