Babylonian Ceremonial Script in Its Scholarly Context Carole Roche-Hawley, 2024-03-15 Since the advent of Assyriology in the early nineteenth century it has been known that two distinct scripts were used in ancient Mesopotamian inscriptions and documents One usefully characterized as cursive was used for the ephemeral documents of daily life as well as on most library and archival texts The other was a deliberately archaizing script reserved for ceremonial use This ceremonial script of Babylonian origin contained both archaic and archaizing signs and was in productive use for over two millennia not only in Babylonia but occasionally also in Assyria and beyond Yet to date there has been no systematic study devoted specifically to this ceremonial script nor any published syllabary of the archaic and archaizing signs it employs This volume attempts to rectify this deficiency by providing a substantive introduction to Babylonian ceremonial script along with a history of its modern study and several case studies of how the script was actually used The introduction is supplemented by an edition of the paleographic lists of the second and first millennia BCE which contain pedagogical inventories of the archaic and archaizing cuneiform signs illustrating how the ceremonial script was taught learned and transmitted in scholarly contexts

, 2018-11-30 The Apocalypse of Enoch and Bhu unda The Apocalypse of Enoch and Bhu unda challenges the underlying assumptions of the classical roots of civilization by restoring the original context of creation mythology In this second volume of A Chronology of the Primeval Gods and the Western Sunrise ancient myths from multiple geographies are correlated to spikes in cosmic rays over the past 120 000 years as documented in ice core data The chronology and content of these myths tell us that the primary forces behind these cataclysms were the most ancient gods hyper nova at the Galactic Center associated with Sgr A The Dragon Sgr West The Beast and Sgr East Hirany ksha and

Hiranyakas ipu with secondary supernova seen as the birth of new destructive gods Ancient myth has documented the cataclysmic destruction of the world on at least twenty occasions with four major geo polar migrations which has resulted in a shift of the earth's equator on at least one occasion Multiple myths are shown to represent a view of the sky that can only be seen from the Antarctic region Multiple versions of the myths of Orion are analyzed showing clear linkages between the Vedic myth of Trisanku the Book of Genesis Senmut's Tomb and the myths of Prajapati Daksa representing the oldest version of the Orion myth older than Trishanku and Genesis by 20 000 years The stunning conclusion explains how the Watchers of Enoch were the Vedic descendants of Ila and Ikshvaku These descendants of the seventh Manu had been observing and recording the stars as a source of cataclysm for at least 15 000 years prior to Enoch thus allowing Enoch to prophesize a new heaven That prophecy became the foundation for St John's Book of Revelations which is shown to be a description of a series of cataclysms attributed to Sgr West The book offers a new theory for explaining geo polar migration That theory suggests small shifts in the location of the earth's center of gravity underlie each migration but that there are multiple causes for the shifts *International Review of Biblical Studies, Volume 51 (2004-2005)* Bernhard Lang, 2006-02-01 Formerly known by its subtitle Internationale Zeitschriftenschau für Bibelwissenschaft und Grenzgebiete the International Review of Biblical Studies has served the scholarly community ever since its inception in the early 1950's Each annual volume includes approximately 2 000 abstracts and summaries of articles and books that deal with the Bible and related literature including the Dead Sea Scrolls Pseudepigrapha Non canonical gospels and ancient Near Eastern writings The abstracts which may be in English German or French are arranged thematically under headings such as e.g. Genesis Matthew Greek language text and textual criticism exegetical methods and approaches biblical theology social and religious institutions biblical personalities history of Israel and early Judaism and so on The articles and books that are abstracted and reviewed are collected annually by an international team of collaborators from over 300 of the most important periodicals and book series in the fields covered

Ur in the Twenty-First Century CE , 2021-01-25 The city of Ur now modern Tell el Muqayyar in southern Iraq also called Ur of the Chaldees in the Bible was one of the most important Sumerian cities in Mesopotamia during the Early Dynastic Period in the first half of the third millennium BCE The city is known for its impressive wealth and artistic achievements evidenced by the richly decorated objects found in the so called Royal Cemetery which was excavated by the British Museum and the University of Pennsylvania from 1922 until 1934 Ur was also the cult center of the moon god and during the twenty first century BCE it was the capital of southern Mesopotamia With contributions from both established and rising Assyriologists from ten countries and edited by three leading scholars of Assyriology this volume presents thirty two essays based on papers delivered at the 62nd Rencontre Assyriologique

Internationale held in Philadelphia in 2016 Reflecting on the theme Ur in the Twenty First Century CE the chapters deal with archaeological artistic cultural economic historical and textual matters connected to the ancient city of Ur Three of the chapters are based on plenary lectures by senior scholars Richard Zettler Jonathan Taylor and Katrien De Graef The remainder of the essays arranged alphabetically by author highlight innovative new directions for research and represent a diverse array of topics related to Ur in various periods of Mesopotamian history Tightly focused in theme yet broad in scope this collection will be of interest to Assyriologists and archaeologists working on Iraq *God in Translation* Mark S. Smith, 2010-06-28 *God in Translation* offers a substantial extraordinarily broad survey of ancient attitudes toward deities from the Late Bronze Age through ancient Israel and into the New Testament Looking closely at relevant biblical texts and at their cultural contexts Mark S Smith demonstrates that the biblical attitude toward deities of other cultures is not uniformly negative as is commonly supposed He traces the historical development of Israel s one god worldview linking it to the rise of the surrounding Mesopotamian empires Smith s study also produces evidence undermining a common modern assumption among historians of religion that polytheism is tolerant while monotheism is prone to intolerance and violence
