**Social Psychology of Pictures** Pascal Moliner,2020-03-02 We see and represent our social environment not as it is but as we believe it to be This is the thesis defended in this book supported by conceptual elements and illustrated by numerous examples drawn from anthropology developmental psychology cognitive psychology and social psychology These examples show that people sharing different beliefs about the same object produce different images of that object such as drawings or photos and highlight that such people interpret the same image of this object differently Finally they show that when these people communicate through images they find it difficult to understand each other On the basis of these observations the book proposes a psychosocial theory of the link between beliefs and iconography This book is mainly intended for students and researchers in the humanities and social sciences interested in the problematic of images However it will also be of interest to communication practitioners and the general public

**Words about Pictures** Perry Nodelman,1990-08-01 A pioneering study of a unique narrative form Words about Pictures examines the special qualities of picture books books intended to educate or tell stories to young children Drawing from a number of aesthetic and literary sources Perry Nodelman explores the ways in which the interplay of the verbal and visual aspects of picture books conveys more narrative information and stimulation than either medium could achieve alone Moving from baby books alphabet books and word books to such well known children s picture books as Nancy Ekholm Burkert s Snow White and the Seven Dwarfs Gerald McDermott s Arrow to the Sun Maurice Sendak s Where the Wild Things Are and Chris Van Allsburg s The Garden of Abdul Gasazi Nodelman reveals how picture book narrative is affected by the exclusively visual information of picture book design and illustration as well as by the relationships between pictures and their complementary texts
