Back To Reform Values Markets And The Health Care System:

Medicine, Health Care, & Ethics John F. Morris, 2007-04 From its earliest beginnings the Catholic Church has cared for the sick and dying of the world as an extension of the healing ministry of Jesus As a natural consequence Catholics have regularly addressed moral issues relating to health care long before the term bioethics was coined Beginning with a deeply nuanced holistic understanding of the human person as their foundation Catholic scholars have developed a person centered ethic with which to approach ethical dilemmas that is understandable and defensible in the light of natural human reason yet which is compatible with the teachings and doctrine of the Church emphasizing the harmony of faith and reason within the Catholic moral tradition Medicine Health Care and Ethics adds to this rich tradition with a collection of contemporary essays that represent the very best efforts of current Catholic scholarship in the field of health care and medical ethics The book begins with an introductory section that explains the basic foundations of the personalist approach to ethics and its development within Catholic thought The remaining parts of the book address timely topics such as artificial reproduction contraception abortion euthanasia genetic engineering stem cell research cloning and health care reform Each author brings a fresh perspective and a wealth of knowledge on these issues that will benefit Catholics as well as non Catholics With general overviews for each section and topic specific bibliographies to guide further study this volume is designed to provide a greater understanding and deeper appreciation of the Catholic perspective on health care and medicine for both newcomers and seasoned students of bioethics alike In today s culture of pluralism and diversity the Catholic tradition has much wisdom to contribute to society s consideration of contemporary problems in medicine and health care This collection of essays is offered in the spirit of open and honest dialogue for all who are seeking to understand that tradition ABOUT THE EDITOR John F Morris associate professor of philosophy at Rockhurst University has published numerous articles on the subject of medical ethics In addition to Morris contributors to the volume are Benedict M Ashley O P Gregory R Beabout John Berkman Clarke E Cochran Catherine Green John F Kavanaugh S J William E May Kevin O Rourke O P Michael D Place Jeanne Schindler and Brendan Sweetman PRAISE FOR THE BOOK Morris intends his book to be used as a supplementary text for courses in bioethics and by members of hospital ethics committees A number of the volume s features recommend it for these audiences Each of the 5 parts of the book has an introduction that is informative lucid and relatively comprehensive These introductions offer an overview of the issue or issues addressed by the essays and briefly describe each presentation Unlike so many collections of multiauthored essays this volume s offerings are consistent in quality and are accessible to the readers for whom they are intended Finally each part of the book concludes with a short but helpful bibliography for further reading or research These qualities of the book recommend it not only for the audiences for which it is intended but also for all educated laypersons clergy and health care professionals who are interested in learning more about a Catholic approach to a variety of controversial issues in bioethics In all likelihood readers will also come away with some valuable insights and

wisdom contained in the Catholic tradition and will acquire a better appreciation of the contribution of Catholic voices to debates in bioethics The excellent section introductions and the high quality of each of the essays make this volume a must for anyone wishing to better understand a traditional Catholic approach to bioethics Ronald P Hame **The Ethics of Managed Care** Mary R. Majumder, 2001-07-27 The Ethics of Managed Care A Pragmatic Approach Mary R Anderlik A breakthrough reappraisal of the managed healthcare debate Discussions of managed care frequently begin and end with an opposition between the Hippocratic ethic of dedication to patient welfare and a business ethic of self interest in the service of efficiency Mary R Anderlik approaches managed care as a problem of organizations Rejecting a simple medicine vs business analysis she directs attention to management as manipulation the neglect of such personal goods as satisfaction in professional accomplishment and organizational moral myopia In this account pragmatic suggests practical idealism not the jettisoning of principle in the interests of expediency In The Ethics of Managed Care Anderlik favors a broad empiricism and a moral vision centered on values of democracy and community She describes how organizations can nourish or destroy openness creativity cooperation and faithfulness and display virtues such as justice integrity responsiveness and efficiency rightly understood She uses community care clinics asthma outreach programs and new contexts for participatory decision making to show the promise of managed care She also explains the complexities of financial arrangements arguing for an end to schemes that reward clinicians for providing less care and profiting from avoiding people who need a lot of it The book concludes with a look at the future of managed care proposing a program for reform Mary R Anderlik is Research Professor at the Health Law and Policy Institute University of Houston Law Center Medical Ethics Series David H Smith and Robert M Veatch editors April 2001 352 pages 6 1 8 x 9 1 4 cloth 0 253 33848 4 39 95 s 30 50 *The Oxford Handbook of Bioethics* Bonnie Steinbock, 2007-02-15 Bonnie Steinbock presents the authoritative state of the art guide to current issues in bioethics covering 30 topics in original essays by some of the world s leading figures in the field as well as by some newer up and comers Anyone who wants to know how the central debates in bioethics have developed in recent years and where the debates are going will want to consult this book Revisioning Women, Health and Healing Adele E. Ethics and Economics of Assisted Reproduction Maura A. Ryan, 2003-06-11 For those who undergo it infertility treatment is costly time consuming invasive and emotionally and physically arduous yet technology remains the focus of most public discussion of the topic Drawing on concepts from medical ethics feminist theory and Roman Catholic social teaching Maura A Ryan analyzes the economic ethical theological and political dimensions of assisted reproduction Taking seriously the experience of infertility as a crisis of the self the spirit and the body Ryan argues for the place of reproductive technologies within a temperate affordable sustainable and just health care system She contends that only by ceasing to treat assisted reproduction as a consumer product can meaningful questions about medical appropriateness and social responsibility be raised She places infertility treatments within broader commitments to the common good thereby understanding reproductive rights as an inherently social rather than individual issue Arguing for some limits on access to reproductive technology Ryan considers ways to assess the importance of assisted reproduction against other social and medical prerogatives and where to draw the line in promoting fertility Finally Ryan articulates the need for a compassionate spirituality within faith communities that will nurture those who are infertile
