## **Back Road To Crazy Stories From The Fiel:**

**Island** Dr. James Lazell, 2005-11-01 Guana in the British Virgin Islands is home to a remarkably diverse assortment of animal and plant life mangroves flamingos iguanas frogs birds snakes spiders tortoises grasshoppers and bats to name but a few What is so surprising about Guana s astonishing panoply is that according to prevailing ecological theories the island s diversity should be much lower than it actually is This provocative book describes Guana s flora and fauna against the backdrop of islands worldwide and their ecology evolution and conservation Much more than a book about one island it raises important challenges to prevailing dogma of island biogeography and theoretical ecology James Skip Lazell demonstrates that meaningful conservation and avoiding tragic loss of biodiversity demand we know far more about biological interactions physiographic and geological structure meteorology and other factors He presents compelling evidence that high levels of natural biodiversity underpin ecosystem resilience and stability Lazell s engaging narrative containing many entertaining asides and personal reflections widens into an evocative commentary about the nature of life on earth

**Americans Do Their Business Abroad** Jake Fawson, 2008-12 Herein reside seventeen stories and one poem written by Peace Corps Volunteers from across the generations and across the planet Such writing often brings expectations for a certain type of book heartwarming uplifting nice Many books give you that experience And we like those books They are good books The world needs those books This is not that book Americans Do Their Business Abroad is a collection of stories a little too goofy a little too personal and maybe a little too gross to belong anywhere else Latrines Goat eyeballs Pickpockets Whimsy Wisdom And arson in the name of hygiene Enjoy

**Mousy Cats and Sheepish Coyotes** John A. Shivik, 2017-11-07 A wildlife expert explores what science tells us about animals as unique individuals and why animal personality matters for the human animal bond and for adaptation in nature Why are some cats cuddly and others standoffish Why are some dogs adventuresome others homebodies As any pet owner can attest we feel that the animals we ve formed bonds with are unique as particular and peculiar as any human friend or loved one Recent years have brought an increased understanding of animal intelligence and emotion But is there a scientific basis for animal personality and individuality or is this notion purely sentimental It turns out that science has been reluctant to even broach the subject of individuality until recently But now a fundamental shift in scientific understanding is underway as mainstream scientists begin to accept the idea that animals of all kinds from beloved beasts like apes and birds to decidedly less cuddly creatures like crabs and spiders do indeed have individual personalities In Mousy Cats and Sheepish Coyotes veteran wildlife expert Dr John A Shivik brings us stories from the front lines of this exciting new discipline Drawing on his scientific training as well as his storytelling gifts Shivik serves as an accessible humorous guide to the emerging body of research on animal personalities Shivik accompanies researchers who are discovering that each wolf bear and coyote has an inherent tendency to favor either its aggressive nature or to shyly avoid conflicts Some bluebirds are lovers others are fighters And some spiders prefer to be loners while others are sociable

Unique personalities can be discovered in every corner of the animal kingdom even among microscopic organisms The array of personality types among all species is only beginning to be described and understood As Shivik argues animals unique personalities are important not only because they determine which animals we bond with Individual animal traits are also fundamental but still inadequately understood drivers of evolution adaptation and species diversity Ultimately Mousy Cats and Sheepish Coyotes offers insight into the similarities humans share with animals and presents evidence of an unbroken biological connection from the smallest organisms to Homo sapiens Crazy Stories, Sane God John Alan Turner,2014 From a woman tricking her father in law into having a child together to a talking donkey and demons being cast into pigs theologian John Alan Turner explains what these odd stories are doing in the Bible and why they matter STRANGE Stories Alexander Galica,2014-06-16 Talking animals and past experience taken from memory and real life experiences situations Wind in the Cotton Fields Carol C.
