A History of African Archaeology Peter Robertshaw, 1990 Archaeologists have been excavating in Africa for over 200 years Contributors place the subject within the broader political social and economic context Not only have the attitudes and aspirations of both colonialism and nationalism been important influences on the development of African archaeology but certain discoveries have also had considerable political impact Contributors include J D Clark Thurstan Shaw and Peter Shinnie who have been at the forefront of African archaeology for 50 years **The Cambridge History of Africa** J. D. Fage, Roland Anthony Oliver, 1975 Volume I examines African prehistory from the time of the first hominids in the Plio Pleistocene up to the spread of iron technology after c 500 BC **Background to Evolution in Africa. (Systematic Investigation of the African Later Tertiary and Quaternary. Proceedings of the Symposium Held at Burg Wartenstein, Austria, July-August, 1965.) Edited by Walter W. Bishop and J. Desmond Clark. [With Plates and Illustrations.]** Wenner-Gren Foundation for Anthropological Research (NEW YORK), Walter William BISHOP (and CLARK (John Desmond)), John Desmond CLARK, 1967 **General History of Africa** International Scientific Committee for the drafting of a General History of Africa, 1981-12-31 One of UNESCO's most important publishing projects in the last thirty years the General History of Africa marks a major breakthrough in the recognition of Africa's cultural heritage Offering an internal perspective of Africa the eight volume work provides a comprehensive approach to the history of ideas civilizations societies and institutions of African history The volumes also discuss historical relationships among Africans as well as multilateral interactions with other cultures and continents **African Paleoecology and Human Evolution** Sally C. Reynolds, René Bobe, 2022-06-09 A comprehensive account of hominin fossil sites across Africa including the environmental and ecological evidence central to our understanding of human evolution UNESCO General History of Africa, Vol. I, Abridged Edition Jacqueline Ki-Zerbo, Unesco. International Scientific Committee for the Drafting of a General History of Africa, 1990 This volume covers the period from the end of the Neolithic era to the beginning of the seventh century of our era This lengthy period includes the civilization of Ancient Egypt the history of Nubia Ethiopia North Africa and the Sahara as well as of the other regions of the continent and its islands Publisher's description *Evolutionary History of the Robust Australopithecines* Frederick E. Grine, 2017-09-29 In paleoanthropology the group of hominids known as the robust australopithecines has emerged as one of the most interesting Through them we have the opportunity to examine the origin

natural history and ultimate extinction of not just a single species but of an entire branch in the hominid fossil record. It is generally agreed that the human lineage can be traced back to this group of comparatively small-brained, large-toothed creatures. This volume focuses on the evolutionary history of these early hominids with state-of-the-art contributions by leading international authorities in the field. Although a case can be made for a robust lineage, the functional and taxonomic implications of the morphological features are subject to vigorous disagreement. An area of lively debate is the possible causal relationship between the presence of early *Homo* and the origin, evolution, and virtual extinction of robust australopithecines. This volume summarizes what has been learned about the evolutionary history of the robust australopithecines in the 50 years since Robert Broom first encountered the visage of a new kind of ape man from Kromdraai. New discoveries from Kromdraai to Lomekwi have served to keep us aware that the paleontological record for hominid evolution is hardly exhausted. Because of such finds, no single volume can hope to stand as a summary on the robust australopithecines for very long, but this classic volume comes close to achieving this goal. The book sheds new light upon some old questions and also acts to provide new questions. The answers to those questions bring us closer to a fuller understanding and appreciation of the origins, evolution, and ultimate demise of the robust australopithecines. Since the robust australopithecines most likely stand as our closest relatives, a better understanding of their origin, history, and demise serves to provide heightened appreciation of the course of human evolution itself. This definitive volume addresses the questions and problems surrounding this important lineage.

The *TiEL* series features volumes that present interesting new data and analyses and above all fresh approaches that contribute to the overall aim of the series which is to further outstanding research in English linguistics.

Handbook of Pleistocene Archaeology of Africa Amanuel Beyin, David K. Wright, Jayne Wilkins, Deborah I. Olszewski, 2023-08-17

This handbook showcases an Africa-wide compendium of Stone Age archaeological sites and methodological advances that have improved our understanding of hominin lifeways and biogeography in the continent. The focal time spans the Pleistocene Epoch c. 2.5 million to 11,700 years ago during which important human traits such as obligate bipedalism that freed the hands to engage in creative activities, a large brain relative to body size, language, and social complexity developed in the general forms that they are found today. The handbook is the first of its kind and it is expected to play a significant role in human evolutionary research by collating the African Stone Age record which exists in a fragmented state along the lines of national boundaries and colonial experiences. Showcasing emerging conceptual and methodological advances in African Pleistocene archaeology. Providing reference datasets for teaching and researching African prehistory. Making Africa's Stone Age record

accessible to researchers and students based in Africa who may not have access to journal publications where most new field discoveries are published The Handbook features 128 chapters of which 116 are site entries grouped by the host countries and presented in an alphabetical order A number of those site related entries examine multiple archaeological localities lumped under specific projects or study areas The rest of the contributions deal with methodological topics such as luminescence and radiocarbon dating field data recovery lithic analysis micromorphology and hominin fossil and zooarchaeological records of Pleistocene Africa The introductory chapter provides an historical overview of the development of Stone Age Paleolithic archaeology in Africa beginning in the mid 19th century and paleoenvironmental and chronological frameworks commonly used to structure the continent's Pleistocene record By making a good amount of African Stone Age literature accessible to researchers and the public we wish to promote interest in human evolutionary research in the continent and elsewhere Awarded the 2025 The Best Book Award by The Society of Africanist Archaeologists

Major Events in the History of Life J. William Schopf, 1992 Major Events in the History of Life present six chapters that summarize our understanding of crucial events that shaped the development of the earth's environment and the course of biological evolution over some four billion years of geological time The subjects are covered by acknowledged leaders in their fields span an enormous sweep of biologic history from the formation of planet Earth and the origin of living systems to our earliest records of human activity Several chapters present new data and new syntheses or summarized results of new types of analysis material not usually available in current college textbooks

The Evolution of Modern Humans in Africa Pamela R. Willoughby, 2007 Pamela Willoughby provides a wide ranging synthesis of current knowledge about the evolution of fully modern humans in Africa during the Middle Palaeolithic Middle Stone Age According to most scholars our modern ancestors first emerged in Africa and then spread throughout the habitable world Willoughby brings evidence from mitochondrial DNA ancient fossils and archaeological remains including her own research in Tanzania to bear on questions regarding the place of human species in nature the specific origins of Homo Sapiens and the dispersal of these modern humans throughout Africa and around the globe She confronts straightforwardly the problems of dating the earliest modern humans and she discusses the various alternative models of modern human origins which will be debated for years to come The Evolution of Modern Humans in Africa is a compelling thought provoking book for both students and scholars

Olduvai Gorge: Volume 3, Excavations in Beds I and II, 1960-1963 M. D. Leakey, 1971-11-30 The third volume of the definitive publication of the remains of early man found at Olduvai Gorge in northern Tanzania

Cenozoic Mammals of Africa Lars Werdelin, William Joseph Sanders, 2010-07-20 This impressively comprehensive volume is a long awaited and worthy successor to the now outdated 1978 classic Evolution of African Mammals A must have reference work for everyone interested in mammalian evolution David Pilbeam Harvard University and the Peabody Museum of Archaeology and Ethnology

Neogene Paleontology of the Manonga Valley, Tanzania Terry Harrison, 2013-11-11 Contributions to this volume detail paleontologic

research in Manonga Valley and shed important light on the evolutionary development of eastern Africa. Chapters provide novel insights into the taxonomy, paleobiology, ecology, and zoogeographic relationships of African faunas, as well as lay the foundation for future geological, paleontological, and paleoecological studies in this important area. The book concludes with a discussion of the importance of investigations on broader geographical sites, including the Manonga Valley, for human evolution research. The text is supported by 143 illustrations.
