

Backyard Foundry

John Gloag, Derek Bridgwater

Backyard Foundry:

Backyard Foundry for Home Machinists B. Terry Aspin, 2015 Undertake casting with confidence This informative resource is a go to guide to learn everything you need to know to create your own home foundry for custom casting Providing a wealth of useful information on materials and techniques pattern making molding boxes cores and core boxes and melting metals each stage and subject is thoughtfully photographed and illustrated for a comprehensive look to get started in foundry

Metal Casting Steve Chastain, 2004 In volume one 1 the author shows the beginner how to make a sand mold and then how to hone your skills to produce high quality castings Written in non technical terms the sand casting manuals begin by melting aluminium cans over a charcoal fire and end by casting a cylinder head Volume two 2 continues the sand casting manual by describing more advanced techniques

The Backyard Foundry B. Terry Aspin, 1997 For small casting jobs by model engineers how to set up a home foundry and explaining the basic principles of foundrywork **Foundry**, 1899 Living Materials Oliver Andrews, 1988-09-23 Every material has an active presence and every material is susceptible to change The task of the sculptor is to understand the natural properties of a chosen material to know in the process of creation how best to work with or against its characteristics In this generously illustrated studio manual sculptor Oliver Andrews takes a new approach to sculpture focusing on how the innate assertiveness of materials affects the complex act of making a sculpture

Crowdfunding The New York Times Editorial Staff, 2019-07-15 In the age of social media networking and personal brands a new form of fundraising is gaining significant traction Whether you are a paleontologist seeking financial assistance for fossil excavation or a musician looking to fund your first album people are turning to crowdfunding as a way to realize projects spread awareness about a cause or even cover medical expenses The New York Times articles collected in this volume give a sense of the great variety of crowdfunded projects the particular advantages or drawbacks of the method and the potential challenges and controversies that can arise from crowdfunding Features such as media literacy questions and terms help readers understand how the reporting of the topic has developed **america, inc. who owns and operates the**

united states Jerry S. Cohen, 1971 The Great Regeneration Dorn Cox, Courtney White, 2023-03-16 In the age of climate change food scarcity and increasing industrialization can a few visionary farmers find global solutions through technology and create networked open source regenerative agriculture at a truly transformative scale In The Great Regeneration farmer technologist Dorn Cox and author activist Courtney White explore unique groundbreaking research aimed at reclaiming the space where science and agriculture meet as a shared human endeavor By employing the same tools used to visualize and identify the global instability in our climate and our communities such as satellite imagery they identify ways to accelerate regenerative solutions beyond the individual farm The Great Regeneration also explores the critical function that open source tech can have in promoting healthy agroecological systems through data sharing and networking If these systems are brought together there is potential to revolutionize how we manage food production around the world decentralizing and

deindustrializing the structures and governance that have long dominated the agricultural landscape and embrace the principles of regenerative agriculture with democratized open source technology disseminating high quality information not just to farmers and ranchers but to all of us as we take on the role of ecosystem stewards In this important book the authors present a simple choice we can allow ourselves to be dominated by new technology or we can harness its potential and use it to understand and improve our shared environment The solutions we need now they write involve a broader public narrative about our relationship to science to each other and to our institutions And we all need to understand that the choices made today will affect the generations to come The Great Regeneration shows how together we can create positive and lasting change

When Technology Fails Matthew Stein, 2008-08-18 There's never been a better time to be prepared This book is an indispensable basic manual for the real life issues that await us in the decades to come A treasure trove of practical wisdom James Howard Kunstler author of The Geography of Nowhere Matthew Stein's comprehensive primer on sustainable living skills from food and water to shelter and energy to first aid and crisis management skills prepares you to embark on the path toward sustainability But unlike any other book Stein not only shows you how to live green in seemingly stable times but to live in the face of potential disasters lasting days or years coming in the form of social upheaval economic meltdown or environmental catastrophe When Technology Fails covers the gamut Inside you'll learn The basics of installing a renewable energy system for your home or business How to find and sterilize water in the face of utility failure How to keep warm if you've been left temporarily homeless Practical information for dealing with water quality issues Alternative health and first aid techniques Each chapter describes skills for self reliance in good times and bad Chapters Include A survey of the risks to the status quo Supplies and preparation for short and long term emergencies Emergency measures for survival Prepping water food shelter and clothing First aid low tech medicine and healing Securing energy heat and power Metalworking Utensils and storage Low tech chemistry engineering machines and materials Fully revised and expanded When Technology Fails ends on a positive proactive note with a chapter on Making the Shift to Sustainability which offers practical suggestions for changing our world on personal community and global levels When Technology Fails is a massive project done well First the book gives a superb presentation of WHY one should be more aware and prepared and then HOW one should go about this The scope of this book is thorough John McPherson author Primitive Wilderness Living and Survival Skills

Robotics Engineering Information, Inc, 1984

Biological Metal Recovery from Wastewaters Sabrina Hedrich, Oliver Wiche, 2025-01-28 This book reviews the latest research on innovative and sustainable biotechnologies for metal recovery from various process streams emphasising the fundamentals and applications of biosystems Divided into 7 chapters it clarifies many topics including biological iron and aluminum recovery from wastewaters precious metal recovery Pt Pd Au Ag algal based metal recovery selenium and tellurium recovery phytoextraction options and arsenic removal by sulfate reducing bacteria Expert contributors explore microbial metabolisms such as iron oxidation sulfate sulfur reduction and selenite reduction through the

lens of environmental sustainability In this book readers will discover various case studies and commercial applications of these biotechnologies Particular attention is given to combinations of biological systems with electrochemistry to enhance metal recycling from complex and diluted streams This book is a valuable resource for researchers in the field of environmental biotechnology and scholars of environmental science chemical engineering and microbiology Waste management and resource recovery professionals will benefit greatly from the insights provided This book is a must read for anyone interested in sustainable solutions for critical metal supply within a circular economy framework
