Indo-Iranian Languages and Peoples Nicholas Sims-Williams, 2003-01-23 The exciting recent developments in our understanding of the history of the Indo Iranian languages and their speakers are surveyed and assessed by a group of internationally renowned linguists and archaeologists In the last few years the materials available for the study of the older Indo Iranian languages have increased dramatically there have been sensational discoveries of texts in the ancient languages of north west India and northern Afghanistan Previously known data has been exploited in new ways

using innovative techniques for compiling manipulating and disseminating electronic text and digital images And archaeological finds in India Pakistan and Central Asia have given rise to new hypotheses concerning the history and pre history of the Indo Iranian peoples *The Idea of Writing* Alexander J. de Voogt,Irving L. Finkel,2010 This exploration of the versatility of writing systems highlights their complexity when they are used to represent loanwords solve problems of polysemy or when they are adapted to be used for another language The approaches from different academic traditions provide a varied but expert account *Heritage and Identity in the Turkic World* Alva Robinson,Kağan Arık,Elmira Köchümkulova,Jonathan North Washington,2023-10-24 This volume builds on the work of Ilse Laude Cirtautas 1926 2019 a pioneering Turkologist who introduced the field of comparative Turkic studies to the US in the 1960s It presents an ongoing dialogue whereby scholars from central and inner Asia and the West engage on issues of Turkic heritage identity language and literature The discussions enrich scholarship in Central and Inner Asian Studies and explore the question Who are the Turks Archaeology of Logic Andrew Schumann,2023-04-27 The question arises whether logic was given to us by God or whether it is the result of human evolution I believe that at least the modus ponens rule A and if A then B implies B is inherent in humans but probably many other modern systems e g resource logic non monotonic logic etc are the result of humans adapting to the environment It is therefore of interest to study and compare the way logic is used in ancient cultures as well as the way logic is going to be used in our 21st century This welcome book studies and compares the way formation of logic in three cultures Ancient Greek 4th century B C Judaic 1st century B C 1st century A D and Indo Buddhist 2nd century A D The book notes that logic became especially popular during the period of late antiquity in countries covered by the international trade of the Silk Road This study makes a valuable contribution to the history of logic and to the very understanding of the origins and nature of logical thinking Prof Dov Gabbay King s College London UK Andrew Schumann in his book demonstrates that logic step by step arose in different places and cultural circles He argues that if we apply a structural genealogical method as well as turn to various sources particularly religious philosophical linguistic etc then we can obtain a more general and more adequate picture of emergence and development of logic This book is a new and very valuable contribution to the history of logic as a manifestation of the human mind Prof Jan Wolenski Jagiellonian University Poland The author of the Archaeology of Logic defends the claim calling it logic is after all which sees logical competence as a practical skill that people began to learn in antiquity as soon as they realized that avoiding cognitive biases in their reasoning would make their daily activities more successful The in depth reading of the book with its diving into the comparative quotations in the long dead or hardly known to most of us languages like Sumerian Akkadian Aramaic Hebrew and etc will be rewarded by the response that the logical competence is diverse and it can be trained despite the inevitability of the reasoning fallacies and that critical discussions and agonial character of the social life are the necessary tools for that Prof Elena Lisanyuk **Procopius of Caesarea: The Persian Wars** Geoffrey Greatrex,2022-11-10 Procopius was the major

historian of the reign of Justinian and one of the most important historians of Late Antiquity This is the first extensive commentary on his Persian Wars since the nineteenth century The work is among the most varied of the author incorporating the history and geography not only of Mesopotamia and the Caucasus but also of southern Arabia and Ethiopia Iran and Central Asia and Constantinople itself Each major section is introduced by a section on the history of the events concerned and on the treatment of these events by Procopius and other sources The volume is equipped with an introduction three appendices and numerous maps and plans All sections of the work that are commented on are translated The book will therefore be of use to specialists and the general reader alike A complete translation of the work with lighter annotation is being published separately
