**Perceptions of Childhood in the Victorian Fin-de-Siècle** Jennifer Sattaur, 2011-01-18 This book reads Victorian fin de siècle literature through the medium of perceptions of childhood. It examines the connection between monstrous and idealistic symbolic representations of childhood represented by key cultural discourses of the Victorian fin de siècle. Specifically, anxieties about change are linked closely to anxieties about childhood, procreation, and maturation in a range of Children's and Adults' texts from the 1860s to the 1890s. The book demonstrates the ways in which the emergent social movements, which have come to define and represent change in the fin de siècle period, were inherently concerned with the ideas of childhood and parenthood and the ways in which they represented both the promise and the threat of the future. The texts

are arranged by theme and grouped according to whether they are seen primarily as intended for children or for adults In texts intended for adult readers images of childhood are more covert and more metaphorical than those texts aimed at child readers in which overt pedagogical concerns are often brought to bear Nothing embodies the idea of the future more than the children who stand as a bridge between now and then This book analyses the connections between Victorian perceptions of childhood and the anxieties and upheavals of the Victorian Fin de Si cle *International Companion Encyclopedia of Children's Literature* Peter Hunt,2004-08-02 Children s publishing is a huge international industry and there is ever growing interest from researchers and students in the genre as cultural object of study and tool for education and socialization

Ethics in British Children's Literature Lisa Sainsbury,2013-08-29 Featuring close readings of selected poetry visual texts short stories and novels published for children since 1945 from Naughty Amelia Jane to Watership Down this is the first extensive study of the nature and form of ethical discourse in British children s literature Ethics in British Children s Literature explores the extent to which contemporary writing for children might be considered philosophical tackling ethical spheres relevant to and arising from books for young people such as naughtiness good and evil family life and environmental ethics Rigorously engaging with influential moral philosophers from Aristotle through Kant and Hegel to Arno Leopold Iris Murdoch Mary Midgley and Lars Svendsen this book demonstrates the narrative strategies employed to engage young readers as moral agents **Conscience and Other Virtues** Douglas C. Langston,2001 Conscience once a core concept for ethics has mostly disappeared from modern moral theory In this book Douglas Langston traces its intellectual history to account for its neglect while arguing for its still vital importance if correctly understood In medieval times Langston shows in Part I the notions of conscientia and synderesis from which our contemporary concept of conscience derives were closely connected to Greek ideas about the virtues and practical reason although in Christianized form As modified by Luther Butler and Kant however conscience later came to be regarded as a faculty like will and intellect and when faculty psychology fell into disrepute so did the role of conscience in moral philosophy A view of mature conscience that sees it as relational with cognitive emotional and conative dimensions can survive the criticisms of conscience as faculty In Part II through discussions of Freud Ryle and other modern thinkers Langston proceeds to reconstruct conscience as a viable philosophical concept Finally in Part III this better grounded concept is connected with the modern revival of virtue ethics and Langston shows how crucial conscience is to a theory of virtue because it is fundamental to the training of any morally good person

*Publishers' Circular and Booksellers' Record of British and Foreign Literature* ,1896 **Victorian Alphabet Books and the Education of the Eye** A. Robin Hoffman,2024-10-22 Victorian Alphabet Books and the Education of the Eye shows how the familiar genre went beyond mere reading instruction to offer nineteenth century British writers illustrators and publishers a site for representing and re thinking literacy itself This interdisciplinary study traces how individuals throughout

the Victorian era deployed alphabet books to promote visual literacy or oral culture as a vital complement to textual literacy. Their strategies ranged from puns and political allusions to elaborate designs that addressed adult audiences alongside or even instead of children. As the format became more familiar in the first part of Victoria's reign, George Cruikshank, William Makepeace Thackeray, Henry Cole, and Edward Lear were quick to recognize its critical potential. This history pivots around the mid 1860s and 1870s when the production of illustrated alphabet books exploded thanks to evolving printing technology and national education reform. Case studies of individual works and makers show how a revolution in picture books reflected and responded to laws assuring children's access to schooling. On the one hand, Socialist artist Walter Crane was able to develop alphabetical illustration from a utilitarian mid-century product into an aesthetically rich yet accessibly priced education of the eye. On the other hand, Kate Greenaway, Hablot Knight Browne, Phiz, and their publishers tended to leverage commercialized nostalgia against pedagogy. This survey concludes by showing how market-oriented trends and the development of photographic reproduction toward the end of the century fed into interpretations of the alphabet, including works by Rudyard Kipling and Hilaire Belloc that reflected growing ambivalence about industrialized print culture.
