Animal Territories:

Naturalistic Environments in Captivity for Animal Behavior Research Edward F. Gibbons, 1994-01-01 This book addresses theoretical and pragmatic issues concerning naturalistic environments in captivity for animals The multidisciplinary orientation of the volume will help regulatory personnel administrators and researchers to understand each other's roles and responsibilities in the design construction and real time operation of these facilities The book also highlights the important value of naturalistic environments in captivity to the scientific study of animal behavior The authors provide insights into identifying physical environmental features not in compliance with existing regulations and that may have a negative impact on the physical health and psychological well being of animals

The Topography of Ancient Idalion and its Territory

Stephan G. Schmid, Will M. Kennedy, 2024-06-18 The question of how to define the territories of the ancient polities city kingdoms of Iron Age Cyprus is a fascinating but also a very difficult one While this topic has already been widely explored by previous scholarship recent investigations that include both modern approaches such as the application of landscape archaeological methodologies as well as a re evaluation of the available archaeological evidence from a new perspective now offers a fresh take on such questions A workshop organized in Berlin in 2018 aimed at discussing additional information on the topography of the ancient city of Idalion and its hinterland This volume therefore includes unique contributions that deal with a wide array of relevant aspects They provide new information on the location chronology and character of settlements necropoleis and sanctuaries from the wider area of Idalion and discuss important issues such as the continuity or discontinuity of settlement activities from the Late Bronze Age to the Iron Age and how this is reflected by material culture They address questions concerned with the physical control of territories and communication networks by considering Idalion's resource availability and the overall development of its rural settlement pattern in contrast to that of its neighbouring polities

Geographical Imaginations

Indranil Acharya, Ujjwal Kumar Panda, 2022 The book is aimed at providing a short introduction to the divergent ways in which space and place evince themselves in literature With suitable illustrations from some very well known canonical texts the book offers a brief survey of the possible ways of looking at the seemingly impossible relationship between Literature and Geography

The Basics of Ecology

Anne Wanjie, 2013-07-15 Studying ecology today is more valuable than it has ever been because of pollution and other environmental factors continuing to be a mainstream issue of concern across the globe This volume engages the reader with bright images of animals and other life in their natural settings and informs on what is being done to preserve life It is a valuable resource for any reader concerned about the environment

Home Ranges of Animals

Roger A. Powell, 2025-10-21 Animals have tremendous agency to understand the world around them and to plan how to take best advantage of that world to meet their requirements Their perception of the world differs from humans and includes knowledge emphasizing different senses This book argues that to understand animals home ranges which are integral to the behavior and ecology of animals biologists

must understand their cognition of their environments Presenting diverse complementary approaches to studying home ranges this book shows how using multiple approaches sheds a broad light on how and why animals behave as they do The book also provides many examples showing how hypothesis driven research provides strong insights into animal behavior and ecology

Wild Animal Skins in Victorian Britain Ann C. Colley, 2016-02-11 What did the 13th Earl of Derby his twenty-two year old niece Manchester's Belle Vue Zoo and even some ordinary laborers all have in common All were avid collectors and exhibitors of exotic and frequently unruly specimens In her study of Britain's craze for natural history collecting Ann C Colley makes extensive use of archival materials to examine the challenges preoccupations and disordered circumstances that attended the amassing of specimens from faraway places only vaguely known to the British public As scientific institutions sent collectors to bring back exotic animals and birds for study and classification by anatomists and zoologists it soon became apparent that collecting skins rather than live animals or birds was a relatively more manageable endeavor Colley looks at the collecting exhibiting and portraying of animal skins to show their importance as

trophies of empire and representations of identity While a zoo might display skins to promote and glorify Britain's colonial achievements Colley suggests that the reality of collecting was characterized more by chaos than imperial order For example Edward Lear's commissioned illustrations of the Earl of Derby's extensive collection challenge the colonial's or collector's commanding gaze while the Victorian public demonstrated a yearning to connect with their own wildness by touching the skins of animals Colley concludes with a discussion of the metaphorical uses of wild skins by Gerard Manley Hopkins and other writers exploring the idea of skin as a locus of memory and touch where one's past can be traced in the same way that nineteenth century mapmakers charted a landscape Throughout the book Colley calls upon recent theories about the nature and function of skin and touch to structure her discussion of the Victorian fascination with wild animal skins
