Kind of Danger Dr. Rowan Blogg, 2012-08-01 Know the animals respect the planet love thy neighbor Rowan Blogg is an  
 Australian veterinarian of the highest distinction and I greatly admire his professionalism which I observed for years at close  
 range In Any Kind of Danger he has extended his work into the environment and moral philosophy by tackling the complex  
 issue of how we exploit animals In the 19th Century William Wilberforce and other pioneers argued that our treatment of  
 animals is a measure of our humanity Peter Singers Animal Liberation 1975 stimulated international interest in the subject  
 Dr Bloggs book should do the same Rowan Blogg examines the role of wildlife on the planet millions of years before our  
 species became dominant but how much habitat do we reserve for their natural life How many species are under threat The  
 worlds population will stabilise at about nine billion in 2050 and this raises the fundamental issues of how much land water  
 and energy we will devote to raising animals for food Is grazing an efficient or humane way of feeding our species Industrial  
 farming out of sight and out of mind involves inescapable cruelty Chickens are raised on an A4 size of smaller scratching area  
 confined in multi layered cages Do animals have a right of access to sunlight and paddock for at least the great part of their  
 lives How does a cow giving birth cope with a crowded cattle truck Do we turn our eyes away from the inevitable suffering  
 involved in animal transport especially live sheep exports There are profound moral lessons to be learned from observing how  
 we treat animals and yet the issue will not be on the agenda for the next Federal or State elections We are in Dr Bloggs debt
