Naturalistic Environments in Captivity for Animal Behavior Research Edward F. Gibbons, 1994-01-01 This book addresses theoretical and pragmatic issues concerning naturalistic environments in captivity for animals The multidisciplinary orientation of the volume will help regulatory personnel administrators and researchers to understand each other's roles and responsibilities in the design construction and real time operation of these facilities The book also highlights the important value of naturalistic environments in captivity to the scientific study of animal behavior The authors provide insights into identifying physical environmental features not in compliance with existing regulations and that may have a negative impact on the physical health and psychological well being of animals      *Effect of Environment on Nutrient Requirements of Domestic Animals* National Research Council, Board on Agriculture, Subcommittee on Environmental Stress, 1981-02-01

world and the possibilities that relationships with non humans offer for enriching that world Watch our talk with the editors Erika Quinn and Holly Yanacek here [https://youtu.be/RBMwXah\\_Om8](https://youtu.be/RBMwXah_Om8)

From factory farming to invasive experimentation to the use of animals in the entertainment industry human interactions with animals frequently involve unjustifiable forms of exploitation violence and death Activists have put significant effort into limiting or abolishing such problematic forms of human animal interactions For philosopher Matthew Calarco this critical focus on restrictions while vitally important does not go far enough in reforming our relationships with animals Instead we need to interrogate the values that structure our lives as a whole to ask What might a good life in common with animals look like The Three Ethologies articulates positive ideals of human interactions with animals and offers an affirmative approach to constructing human animal relations anew Calarco develops three distinct but interrelated ethological lenses to this end 1 ethos as individual character the self 2 ethos as shared practices and relations the social and 3 ethos as the typical dwelling places of animals and human beings the environment This three pronged framework leads us to an inspiring vision of how ethological living can help us to reimagine philosophical ideals of goodness truth and beauty Victorian Writers and the Environment

**Ethics and Justice for the Environment** Adrian C. Armstrong, 2012 Examining the issues of ethics and justice as they apply to the environment this book starts from the observation that the parallel expositions of environmental ethics and environmental justice appear to have few points of contact Environmental justice is highly politicized and concerned with human access to the environment and the unequal exposure to environmental pollution It grew out of the US civil rights movement the liberal tradition of rights and Rawls description of justice as fairness It is thus almost exclusively anthropocentric and does not address the question of justice for the environment By contrast environmental ethical studies are a wide ranging collection of approaches that are concerned with caring for the earth and the justifications for it but rarely consider the issue of justice Although the two movements do not come together at the theoretical level they do so at the grass roots activist level An essential component of this study is thus to consider both the issues of grass roots action and the application of the methods to actual case studies This book finds a common ground between these two strands and so to develop a unified statement of justice for the environment that includes the insights of both approaches particularly based on the capability ideas of justice developed by Martha Nussbaum
