Adams, Josephine Donovan, 1995-11-14 *Animals and Women* is a collection of pioneering essays that explores the theoretical connections between feminism and animal defense Offering a feminist perspective on the status of animals this unique volume argues persuasively that both the social construction and oppressions of women are inextricably connected to the ways in which we comprehend and abuse other species Furthermore it demonstrates that such a focus does not distract from the struggle for women's rights but rather contributes to it This wide ranging multidisciplinary anthology presents original material from scholars in a variety of fields as well as a rare early article by Virginia Woolf Exploring the leading edge of the species gender boundary it addresses such issues as the relationship between abortion rights and animal rights the connection between woman battering and animal abuse and the speciesist basis for much sexist language Also considered are the ways in which animals have been regarded by science literature and the environmentalist movement A striking meditation on women and wolves is presented as is an examination of sexual harassment and the taxonomy of hunters and hunting Finally this compelling collection suggests that the subordination and degradation of women is a prototype for other forms of abuse and that to deny this connection is to participate in the continued mistreatment of animals and women

**The Accommodated Animal** Laurie Shannon, 2024-05-31 Shakespeare wrote of lions shrews horned toads curs mastiffs and hellhounds But the word animal itself only appears very rarely in his work which was in keeping with sixteenth-century usage As Laurie Shannon reveals in *The Accommodated Animal* the modern human-animal divide first came strongly into play in the seventeenth century with Descartes's famous formulation that reason sets humans above other species I think therefore I am Before that moment animals could claim a firmer place

alongside humans in a larger vision of belonging or what she terms cosmopolity With Shakespeare as her touchstone Shannon explores the creaturely dispensation that existed until Descartes She finds that early modern writers used classical natural history and readings of Genesis to credit animals with various kinds of stakeholdership prerogative and entitlement employing the language of politics in a constitutional vision of cosmic membership Using this political idiom to frame cross species relations Shannon argues carried with it the notion that animals possess their own investments in the world a point distinct from the question of whether animals have reason It also enabled a sharp critique of the tyranny of humankind By answering the question of the animal historically *The Accommodated Animal* makes a brilliant contribution to cross disciplinary debates engaging animal studies political theory intellectual history and literary studies     [Animal Virology V4](#) David Baltimore,2012-12-02 *Animal Virology* consists of papers presented in a meeting which considered broad issues and advances in animal virology and tumor viruses This book is divided into nine parts representing the nine sessions of the meeting Five of the nine sections deal particularly with viruses known to be oncogenic in animals and one of these covers explicitly human oncornaviruses The other four sections describe the processes common to all viruses replication protein synthesis and persistence wherein emphasis is given to negative strand viruses and plant viruses     [Young Adult Literature: Magical Worlds](#) Torrey Maloof,Christina Hill,2018-03-29 *Read Along or Enhanced eBook* Why is the magical world so mighty and alluring How does it cast such a powerful spell over readers Explore the themes and elements found in young adult fantasy fiction novels and series including *Eragon* the *Lord of the Rings* *Harry Potter* *Percy Jackson* *Narnia* and more Developed by Timothy Rasinski and Lori Oczkus and featuring TIME content this book builds reading skills and includes essential text features like an index captions glossary and table of contents The detailed sidebars fascinating images and Dig Deeper section prompt students to connect back to the text and encourage multiple readings Check It Out includes suggested resources for further reading Aligned with state standards this title features complex content appropriate for students preparing for college and career readiness     ***Creating a Habitat*** Saskia Lacey,2019-10-03 Take a virtual tour of the Smithsonian National Zoo s Small Mammal House with this high interest STEAM book Along the way learn how zookeepers designed a habitat for the black footed ferret an animal once thought to be extinct You ll also learn about the many factors the keepers take into consideration when designing zoo enclosures Created in collaboration with the Smithsonian Institution this STEAM book will ignite a curiosity about STEAM topics through real world examples It features a hands on STEAM challenge that is perfect for makerspaces and that guides students step by step through the engineering design process Make STEAM career connections with career advice from Smithsonian employees working in STEAM fields This STEAM book is ideal for ages 6 8 and is especially appealing to reluctant readers     ***The Intrinsic Value of Nature*** Leena Vilkkä,1997 What is intrinsic value What is the origin of value Are people always superior to nature This book is a philosophical analysis of the human relationship to the non human world It is a pioneering study of the philosophy of nature
