Animals Anne Innis Dagg,2009-02-02 A groundbreaking study on the lives of senior mammals and birds from the aging of alphas to the role of grandmothers by the author of Animal Friendships How do young and old social animals view each other Are aged animals perceived by others as weaker Or wiser What is the relationship between age and power among social animals Taking a cue from Frans de Waal s seminal work examining the lives of chimpanzees Anne Innis Dagg in this pioneering study probes the lives of older mammals and birds Synthesizing the available scientific research and anecdotal evidence she explores how aging affects the lives and behavior of animals ranging from elk to elephants and gulls to gorillas examining such topics as longevity how others in a group view senior members in regard to leadership wisdom and teaching mating success interactions with mates and offspring how aging affects dominance changes in aggressive behavior and adaptability and death and dying At once instructive and compelling this theme spanning book reveals the complex nature of maturity in scores of social species and shows that animal behavior often displays the same diversity we find in ourselves Dagg s book should be a corrective to us all species that lose or ignore the contributions of their older members do so at their peril Literary Review of Canada Humans and chimps it turns out value age in sexual partners very differently In our species youth is prized but among chimps the reverse is the case The New York Review of Books *Nature's Prisoners: Behind the Bars of Animal Ownership* Pasquale De Marco,2025-05-21 In a world where animals are often treated as commodities this book unveils the hidden suffering behind the seemingly innocent act of animal ownership Through a series of chapters the author takes readers on a journey into the dark underbelly of the pet industry exposing the true cost of our desire for companionship The book begins by delving into the hidden world of animal breeding facilities where animals are reduced to mere breeding machines forced to endure endless cycles of reproduction in cramped and unsanitary conditions The physical and emotional toll on these animals is immense resulting in a litany of health problems and behavioral issues From the breeding facilities the book follows the animals to pet stores where they are displayed like objects on a shelf waiting to be chosen by a new owner Some may find loving homes but many others will face a life of neglect abuse or abandonment The pet industry driven by consumer demand perpetuates a cycle of suffering that traps countless animals in a life of misery The book also shines a light on the dark corners of the entertainment industry where animals are forced to perform unnatural and dangerous acts for our amusement From circuses to rodeos to marine parks animals are subjected to harsh training methods inadequate living conditions and the constant stress of performing The glamour of the show conceals the suffering endured by these creatures who are denied their freedom and dignity Furthermore the book explores the devastating impact of animal

agriculture on both the animals themselves and the environment Factory farms with their intensive confinement and inhumane practices are a breeding ground for disease suffering and environmental degradation Animals raised for food are denied basic necessities like fresh air sunlight and the ability to engage in natural behaviors The mass production of meat dairy and eggs comes at a great cost to animal welfare and the health of our planet This book is a powerful indictment of our treatment of animals and a call to action for change It challenges readers to confront the ethical implications of animal ownership and consumption and to make more compassionate choices in their daily lives If you like this book write a review on google books
