Animals In Translation:

Animals in Translation Temple Grandin, Catherine Johnson, 2009-08-11 Now with a Q A and new foreword by the author With unique personal insight experience and hard science *Animals in Translation* is the definitive groundbreaking work on animal behavior and psychology Temple Grandin's professional training as an animal scientist and her history as a person with autism have given her a perspective like that of no other expert in the field of animal science Grandin and coauthor Catherine Johnson present their powerful theory that autistic people can often think the way animals think putting autistic people in the perfect position to translate animal talk Exploring animal pain fear aggression love friendship communication learning and even animal genius Grandin is a faithful guide into their world *Animals in Translation* reveals that animals are much smarter than anyone ever imagined and Grandin standing at the intersection of autism and animals offers unparalleled observations and extraordinary ideas about both *Animals in Translation* Temple Grandin, Catherine Johnson, 2005 Profoundly attracted to animals from childhood Temple Grandin began early on to make links between the autistic and the animal views of the world Farmers and breeders were baffled that she could come in and invariably pinpoint the cause of any aberrant or troublesome behaviour in their animals Grandin in turn was baffled that they couldn't spot the problems themselves until she realized that they just weren't visually oriented the way she and the animals were and that meant really taking in ALL of the details of the scene Normal people as she consistently calls them might use their more prominent frontal lobes to tidy experience into language and concepts but miss a whole register of visual data that didn't fit their expectations *Animals in Translation* is an astonishing tale of curing rapist roosters honouring the genius of squirrels the rhyming schemes of whale song or diagnosing why a horse might be afraid of all men in black hats Full of specific practical advice as well as startling information with *A Behaviour Troubleshooting Guide* for animals at the end this book will be treasured by animal handlers farmers and breeders pet owners and all animal lovers and it is as much a revelation about life with autism as it is about life with animals *Animals in Translation* Temple Grandin, Catherine Johnson, 2006 *Animals in Translation* is the culmination of Temple Grandin's extraordinary life's work drawing upon the latest research her distinguished career as an animal scientist and her own experience of being autistic With co author Catherine Johnson Grandin argues that while normal people convert experience into words and abstractions animals and autistics process the world as sensory information specific pictures sights and sounds This difference is the key to understanding how animals see think and feel As much a revelation about life with autism as it is about life with animals *Animals in Translation* explores pain fear aggression love friendship communication and learning in a startling book that will change the way you think about animals **Animals in translation : using the mysteries of autism to decode animal behaviour** Catherine Johnson, 2005 Temple Grandin has been known to crawl through slaughterhouses to get a sense of what the animals there are experiencing An autistic woman who as a child was recommended for institutionalisation Grandin has managed not only to enter society's mainstream but

ultimately to become prominent in animal research An associate professor at Colorado State University she designs facilities used worldwide for humane handling of livestock She also invented a hug machine based on a cattle holding chute that calms autistic children In *Animals in Translation* co authored with science writer Catherine Johnson Grandin makes an intriguing argument that psychologically animals and autistic people have a great deal in common and that both have mental abilities typically underestimated by normal people The book is a valuable if speculative contribution to the discussion of both autism and animal intelligence two subjects on which there is little scientific consensus *Animals in Translation* Temple
