nearly 700 books representing 73 countries is a valuable resource for librarians teachers and anyone else seeking to promote international understanding through children s literature It is the third volume sponsored by the United States Board on Books for Young People The first Carl M Tomlinson s Children s Books from Other Countries 1998 is a compendium of international children s literature with annotations of both in and out of print books published between 1950 and 1996 Susan Stan s The World Through Children s Books 2002 was the second and it included books published between the years 1997 and 2000 Crossing Boundaries includes international children s books published between 2000 and 2004 as well as selected American books set in countries other than the United States Editor Doris Gebel has compiled an important tool for providing stories that will help children understand our differences while simultaneously demonstrating our common humanity

Pop-up and Movable Books Ann Rothwell Montanaro,1993 For historians of printing and book design students of children s literature and book collectors this record of 19th and 20th century English language books containing movable illustrations identifies indexes and describes some 1 600 titles The volume is arranged alphabetically by title and has three separate indexes sorted by publication date personal names of contributors and series titles Annotation copyright by Book News Inc Portland OR **Meaningful Flesh** Whitney Bauman,2018 Religion is much queerer than we ever imagined Nature is as well These are the two basic insights that have led to this volume the authors included here hope to queerly go where no thinkers have gone before The combination of queer theory and religion has been happening for at least 25 years People such as John Boswell began to examine the history of religious traditions with a queer eye and soon after we had the indecent theology of Marcella Althaus Ried Jay Johnston one of the authors in this issue is among those who have used the queer eye to interrogate authority within Christian theological traditions At the same time there have been many queer interrogations of nature perhaps most notably in the works of Joan Roughgarden and Ann Fausto Sterling and more recently in the works of Catriona Sandilands and Timothy Morton an author in this volume However the intersections of religion nature and queer theory have been largely left untouched With the exception of Dan Spencer who writes the introduction for this volume and is one of the early pioneers in this realm of thought with his book Gay and Gaia Pilgrim Press 1996 and the work of Greta Gaard in developing a queer ecofeminist thought religion and nature or religion and ecology have largely ignored the realm of queer theory In part the blinders to queer theory on the part of eco thinkers religious or otherwise are similar to the blinders eco thinkers have when it comes to postmodern thought in general namely if there are no absolute foundations how does one create an environmental ethic and a nature to save For this reason and many others this volume on religion nature and queer theory is groundbreaking Though these essays span many different disciplines and themes they are all held together by the triple focus on religion nature and queer theory Each of these essays offers a unique contribution to the intersection of religion nature and queer theory and all of them challenge strict boundaries proposed in religious rhetoric and many discourses surrounding nature Carol Wayne White s essay draws from a queer reading of James Baldwin to develop an

African American religious naturalism which highlights humans as polyamorous bastards Jacob Erickson s essay examines Isabella Rossellini s Green Porno and Martin Luther s work to develop an irreverent theology Jay Johnston draws from personal relationships with his late dog and Master Pup fetish play to blur the boundaries between humans and other animals specifically within ethical and theological discourse Whitney Bauman reflects on how the very processes of globalization and climate change queer our identities and call for a queer and versatile planetary ethic Finally Timothy Morton leads us through a reflection on queer green sex toys to challenge the ontology of agrologistics Each of these essays in their own way is concerned with fleshing out more meaningful encounters with the planetary community Without being too ambitious we hope that these sets of essays will help to open up a new trajectory of conversations at the intersection of religion nature and queer theory
