Animals And Other People:

Animals and Other People Heather Keenleyside, 2016-11-21 In *Animals and Other People* Heather Keenleyside argues for the central role of literary modes of knowledge in apprehending animal life. Keenleyside focuses on writers who populate their poetry, novels and children's stories with conspicuously figurative animals, experiment with conventional genres like the beast fable and write the lives of mice as well as men. From such writers including James Thomson, Daniel Defoe, Jonathan Swift, Laurence Sterne, Anna Letitia Barbauld and others, she recovers a key insight about the representation of living beings: when we think and write about animals, we are never in the territory of strictly literal description, relying solely on the evidence of our senses. Indeed, any description of animals involves personification of a sort; if we understand personification not as a rhetorical ornament but as a fundamental part of our descriptive and conceptual repertoire, essential for distinguishing living beings from things. Throughout the book, animals are characterized by a distinctive mode of agency and generality: they are at once moving and being moved, at once individual beings and generic or species figures. Every cat is also The Cat. Animals thus become figures with which to think about key philosophical questions about the nature of human agency and of social and political community. They also come into view as potential participants in that community, as one sort of people among others. Demonstrating the centrality of animals to an eighteenth-century literary and philosophical tradition, *Animals and Other People* also argues for the importance of this tradition to current discussions of what life is and how we might live together.

The Internet of Animals Deborah Lupton, 2023-03-07 The internet is made of cats is a half-jokingly made claim. Today, animals of all shapes and sizes inhabit our digital spaces, including companion animals, wildlife, feral animals and livestock. In this book, Deborah Lupton explores how digital technologies and datafication are changing our relationships with other animals. Playfully building on the concept of The Internet of Things, she discusses the complex feelings that have developed between people and animals through the use of digital devices, from social media to employing animal-like robots as companions and carers. The book brings together a range of perspectives, including those of sociology, cultural geography, environmental humanities, critical animal studies and internet studies, to consider how these new digital technologies are contributing to major changes in human-animal relationships at both the micropolitical and macropolitical levels. As Lupton shows, while digital devices and media have strengthened people's relationships to other creatures, these technologies can also objectify animals as things for human entertainment, therapy or economic exploitation. This original and engaging book will be of interest to scholars and students across the social sciences and humanities.

Marian Dawkins,2012-12-06 I wrote this book because I believe that the welfare of animals is a very important subject but one about which there is a of confusion and muddled thinking I wanted to great deal write a book which straightened out some of the confusion by looking in detail at one particular problem how to recognize animal suffering The book is written for anyone interested in animals and the controversies over how human beings should treat them I have tried to convince people who might otherwise feel that science had only a rather sinister connection with animal welfare that the scientific study of animal suffering has in fact a major and positive contribution to make It can give us an insight into what animals experience and this in tum may help us to alleviate their suffering At the same time I have tried to write a book that will be of at least some use to scientists The chapters which follow pro vide an outline of the biological approach to animal welfare I have also attempted to show sceptics that it is possible to study animal suffering without sacrificing standards of scien tific procedure Perhaps some may even come to share my belief that the study of the subjective experiences of animals is one of the most fascinating areas in the whole of biology as well as being of great practical and ethical importance **Limpopo**

Suffering and Moral Responsibility Jamie Mayerfeld Associate Professor of Political Science University of Washington, 1999-08-06 In this original study Jamie Mayerfeld undertakes a careful inquiry into the meaning and moral significance of suffering Understanding suffering in hedonistic terms as an affliction of feeling he addresses difficulties associated with its identification and measurement He then turns to an examination of the duty to relieve suffering its content its weight relative to other moral considerations and the role it should play in our lives Among the claims defended in the book are that suffering needs to be distinguished from both physical pain and the frustration of desire that interpersonal comparisons of the intensity of happiness and suffering are possible that several psychological processes hinder our awareness of other people's suffering and that the prevention of suffering should often be pursued indirectly Mayerfeld concludes his discussion by arguing that the reduction of suffering is morally more important than the promotion of happiness and that most of us greatly underestimate the force of the duty to prevent suffering As the first systematic book length inquiry into the moral significance of suffering Suffering and Moral Responsibility makes an important contribution to moral philosophy and political theory and will interest specialists in each of these areas
