Animals And The Maya In Southeast Mexico:

Animals and the Maya in Southeast Mexico Eugene Newton Anderson, Felix Medina Tzuc, 2005-01-01 In Mexico's southeastern frontier state of Quintana Roo game animals and other creatures that depend on old growth forest are disappearing in the face of habitat destruction and overhunting. Traditionally the Yucatec Maya have regarded animals as fellow members of a wider society and in their religion animals enjoy the status of spiritual beings. But in recent years the breakdown of cultural restraints on hunting has spiraled so far out of control that almost everything edible within easy reach of a road has become fair game. This book combines the insights of an anthropologist with the hands on experience of a Maya campesino with the aim of improving the management of Quintana Roo's wild lands and animal resources. E. N. Anderson and Felix Medina Tzuc pool their knowledge to document Yucatec Maya understanding and use of animals and to address practical matters related to wider conservation issues. Although the Yucatec Maya's ethnobotany has been well documented until now little has been recorded about their animal lore. Anderson and Medina Tzuc have compiled a wealth of information about traditional knowledge of animals in this corner of the Maya world. They have recorded most of the terms widely used for several hundred categories of animals in west central Quintana Roo, mapped them onto biological categories and recorded basic information about wildlife management and uses. The book reflects a wealth of knowledge gathered from individuals regarded as experts on particular aspects of animal management whether hunting, herding or beekeeping. It also offers case studies of conservation successes and failures in various communities pointing to the need for cooperation by the Mexican government and Maya people to save wildlife. Appendixes provide an extensive animal classification and a complete list of all birds identified in the area. Even though sustainable forestry has finally come to the Yucatán, sustainable game use is practiced by only a few communities. **Animals and the Maya in Southeast Mexico** is a complete ethnozoology for the region offered in the hope that it will encourage the recognition of Quintana Roo's forests and wildlife as no less deserving of protection than ancient Maya cities.

Respect and Responsibility in Pacific

Coast Indigenous Nations E. N. Anderson, Raymond Pierotti, 2022-10-12 This book examines ways of conserving managing and interacting with plant and animal resources by Native American cultural groups of the Pacific Coast of North America from Alaska to California These practices helped them maintain and restore ecological balance for thousands of years Building upon the authors and others previous works the book brings in perspectives from ethnography and marine evolutionary ecology The core of the book consists of Native American testimony myths tales speeches and other texts which are treated from an ecological viewpoint The focus on animals and in depth research on stories especially early recordings of texts set this book apart The book is divided into two parts covering the Northwest Coast and California It then follows the division in lifestyle between groups dependent largely on fish and largely on seed crops It discusses how the survival of these cultures functions in the contemporary world as First Nations demand recognition and restoration of their ancestral rights and resource management practices
