Animating Maria:

Animation in Spain Maria Pagès Rovira, 2025-08-12 This book provides a comprehensive account of Spanish animation history from its early days through to the arrival of CGI. It examines the two main centers of production, Barcelona and Madrid, as well as evolving animation hubs in the Basque Country and Galicia. This book also pays tribute to the women who were significant to the animation industry and had been invisible for many years, highlighting more recent attempts to achieve equality in the Spanish animation industry thanks to help from the government and women's associations looking to balance the inequality in this domain. This book will be of great interest to academics, students and professionals working and researching in the field of animation.

Animation in Austria Florian Schmidlechner, 2025-05-23 This book provides a comprehensive account of Austrian animation history as well as an analysis of the current state of the industry in competition with American and cheaper international products in the face of dwindling budgets. The book outlines the history of Austrian animated film from the actual beginnings at the time of the First World War. It looks at the reconstruction of the animation industry during the 1950s and 60s and covers experimental animation from the 1970s onwards. The final part of the book explores modern Austrian animation and looks ahead to the future of animation production within the country. This book will be of great interest to academics, students and professionals working and researching in the field of animation.

ANIMATING MARIA M. C. BEATON., *Eighteenth-Century Vitalism* C. Packham, 2012-01-31 This book offers an important account of the relationship between science and culture in the eighteenth century. It examines the vitalist turn in physiology and natural philosophy and its presence and effect in the burgeoning of philosophical and scientific inquiry of the Scottish Enlightenment and the radical politics and culture of the 1790s.

(Re)Creating Language Identities in Animated Films Vincenza Minutella, 2020-11-02 This book describes the dubbing process of English language animated films produced by US companies in the 21st century, exploring how linguistic variation and multilingualism are used to create characters and identities and examining how Italian dubbing professionals deal with this linguistic characterisation. The analysis carried out relies on a diverse range of research tools: text analysis, corpus study and personal communications with dubbing practitioners. The book describes the dubbing workflow and dubbing strategies in Italy and seeks to identify recurrent patterns and therefore norms as well as stereotypes or creativity in the way multilingualism and linguistic variation are tackled. It will be of interest to students and scholars of translation, linguistic variation, film and media.

Animation Behind the Iron Curtain Eleanor Cowen, 2020-09-22 *Animation Behind the Iron Curtain* is a journey of discovery into the world of Soviet era animation from Eastern Bloc countries. From Jerzy Kucia's brutally exquisite *Reflections* in Poland to the sci-fi adventure of *Ott in Space* by Estonian puppet master Elbert Tuganov to the endearing *Gopo's little man* by Ion Popescu. *Gopo* in Romania, this excursion into Soviet era animation brings to light magnificent art, ruminations on the human condition and celebrations of innocence and joy. As art reveals the spirit of the times, animation art of Eastern Europe during the Cold

War funded by the Soviet states allowed artists to create works illuminating to their experiences hopes and fears The political ideology of the time ironically supported these artists while simultaneously suppressing more direct critiques of Soviet life Politics shaped the world of these artists who then fashioned their realities into amazing works of animation Their art is integral to the circumstances in which they lived which is why this book combines the unlikely combination of world politics and animated cartoons The phenomenal animated films shared in this book offer a glimpse into the culture and hearts of Soviet citizens who grew up with characters as familiar and beloved to them as Mickey Mouse and Bugs Bunny are to Americans This book lays out the basic political dynamics of the Cold War and how those political tensions affected the animation industry in both the US and in the Eastern Bloc And for animation novices and enthusiasts alike Animation Behind the Iron Curtain also offers breakout sections to explain many of the techniques and aesthetic considerations that go into this fascinating art form This book is a must read for anyone interested in the Cold War era and really cool animated films

Sequels Janet G. Husband,Jonathan F. Husband,2009-07-30 A guide to series fiction lists popular series identifies novels by character and offers guidance on the order in which to read unnumbered series **Animation between Magic, Miracles and Mechanics** Hans Henrik Lohfert Jørgensen,Laura Katrine Skinnebach,Henning Laugerud,2023-08-18 When it comes to images we are all animists Deep down we all know that images can at least potentially be alive or come to life Nowadays we may tend to rationalize our ingrained animism and explain it away as a mere projection only happening in the space between image and viewer In the Middle Ages however imagery made enthusiastic use of magical miraculous and mechanical means of animation empowered and ensouled by both natural and supernatural principles of life This animist book investigates magic miracles and mechanics as motors of animation and seeks to understand the living image in solidarity with medieval experience rather than dismissive alienation of it Effigies did bleed weep or lactate either through divine intervention or through hydraulic machinery Statues did move or speak either as demonic oracles or as talking heads with implanted speaking tubes Marvels made by magic or by miracles were real as real as the wonders of physical mechanics moving bodily matter We just need to look and listen more carefully to comprehend these fluid realities even when especially when they challenge our received worldview Animation was by no means uncontested or uncontradicted but even its stiffest critics knew that gods and demons could intervene in inanimate matter to set it in motion to speak in tongues and exude the liquids of life Explanatory Animations in the Classroom Brendan Jacobs,2020-03-06 This book provides groundbreaking evidence demonstrating how student authored explanatory animations can embody and document learning as an exciting new development within digital pedagogy Explanatory animations can be an excellent resource for teaching and learning but there has been an underlying assumption that students are predominately viewers rather than animation authors The methodology detailed in this book reverses this scenario by putting students in the driver s seat of their own learning This signals not just a change in perspective but a complete change in activity that to continue the analogy will forever change the

conversation and make redundant phrases like Are we there yet and How much longer The digital nature of such practices provides compelling evidence for reconceptualising explanatory animation creation as a pedagogical activity that generates multimodal assessment data Tying together related themes to advance approaches to evidence based assessment using digital technologies this book is intended for educators at any stage of their journey including pre service teachers

The Crafty Animator Caroline Ruddell,Paul Ward,2019-04-03 This collection is a study of the value of craft as it can be understood within the study and practice of animation The book reconsiders the position of craft which is often understood as inferior to art with a particular focus on questions of labour in animation production and gendered practices The notion of craft has been widely investigated in a number of areas including art design and textiles but despite the fact that a wide range of animators use craft based techniques the value of craft has not been interrogated in this context until now Seeking to address such a gap in the literature this collection considers the concept of craft through a range of varying case studies Chapters include studies on experimental animation computer animation trauma and memory children s animation and silhouette animation among others The Crafty Animator also goes some way to exploring the relationship craft has with the digital in the context of animation production Through these varied discussions this book problematizes simplistic notions about the value of certain methods and techniques working to create a dialogue between craft and animation

Politically Animated Jennifer Nagtegaal,2023-10-12 Politically Animated studies the convergence of animation and actuality within films television series and digital shorts from across the Spanish speaking world It interrogates the many ways in which animation as a stylistic tool and storytelling device participates in political projects underpinning an array of non fiction works The case studies in the book cover a diverse geographical scope including Spain Argentina Colombia and Mexico They critically analyse different works such as feature length animated documentary films a work of animated journalism a short animated essay and micro short episodes from a televised animated documentary series Jennifer Nagtegaal employs the term politically animated in reference to the ideological implications of choosing specific techniques and styles of animation within certain socio historical and cultural contexts Nagtegaal illuminates the creative union of animated documentary and the comics medium currently being exploited by Spanish and Latin American cartoonists and filmmakers alike By paying particular attention to cultural production beyond the big screen Politically Animated continues to stretch the bounds of animated documentary scholarship
