A Nation of a Hundred Million Idiots? Jayson Makoto Chun, 2006-12-06 This book offers a history of Japanese television audiences and the popular media culture that television helped to spawn In a comparatively short period the television industry helped to reconstruct not only postwar Japanese popular culture but also the Japanese social and political landscape During the early years of television Japanese of all backgrounds from politicians to mothers debated the effects on society The public discourse surrounding the growth of television revealed its role in forming the identity of postwar Japan during the era of high speed growth 1955 1973 that saw Japan transformed into an economic power and one of the world's top exporters of television programming

Japanese Language and Soft Power in Asia Kayoko Hashimoto, 2017-07-26 This cutting edge collection considers how the Japanese language functions as a key element of Japanese soft power in Asia Within Japanese culture itself the promotion of language has been an area of ambivalence This interdisciplinary book looks across the fields of language policy language teaching socio linguistics cultural studies and history to identify the links between Japan's language policies and broader social economic and political processes It examines the challenges that undermine Japan's potential soft power by identifying a gap between the official Japan portrayed by the Japanese government and the cultural Japan that foreigners perceive It also reveals historical continuity in the way Japanese language is perceived and promoted by policy makers and how the current practices of Japanese language teaching in Asian countries have been shaped within the framework of international exchange which has been a key concept in Japanese foreign policies since the 1970s It particularly considers the concept of Cool Japan as a symbol of Japan's

interpretation of its cultural power and offers a thoughtful assessment of the future of Japanese as a form of soft power in Asia as the country prepares for the 2020 Tokyo Olympics **Identified Flying Objects** Dr. Michael P. Masters, 2019-03-22 Could UFOs and Aliens simply be us but from the future This provocative new book cautiously examines the premise that extraterrestrials may instead be our distant human descendants using the anthropological tool of time travel to visit and study us in their own hominin evolutionary past Dr Michael P Masters a professor of biological anthropology specializing in human evolutionary anatomy archaeology and biomedicine explores how the persistence of long term biological and cultural trends in human evolution may ultimately result in us becoming the ones piloting these disc shaped craft which are likely the very devices that allow our future progeny to venture backward across the landscape of time Moreover these extraterrestrials are ubiquitously described as bipedal large brained hairless human like beings who communicate with us in our own languages and who possess technology advanced beyond but clearly built upon our own These accounts coupled with a thorough understanding of the past and modern human condition point to the continuation of established biological and cultural trends here on Earth long into the distant human future Japan , Beyond The Chinese Connection Crystal S. Anderson, 2013-06 Examines the rise of post 1970s Afro Asian cultural production that embodied the aspirations and contradictions entailed in forging Black Asian identification and solidarity **Asian Cinema** Tom Vick, 2007 This is the first book to provide a concise engaging overview of the part present and future of the world s most dynamic and influential filmmaking region Includes historical backgrounds from Iran to Thailand India and Japan and a guide for further research
