Animism and Philosophy of Religion Tiddy Smith, 2023-02-25 Mainstream philosophy of religion has persistently failed to engage seriously or critically with animist beliefs and practices The field that is now called philosophy of religion could quite easily be renamed philosophy of theism with few lecturers on the subject having to change their lecture notes It is the aim of this volume to rectify that failure and to present animism as a live option among the plethora of religious worldviews The volume addresses four major questions 1 What is this thing called animism 2 Are there any arguments for or against animist belief and practice 3 What is the relationship between animism naturalism and the sciences And 4 Should we take animism seriously *Animism and Philosophy of Religion* is intended to be the first authoritative scholarly volume on the issue of animism and its place in the philosophy of religion Ambitiously it aims to act as the cornerstone volume for future work on the subject and as a key text for courses engaging with the subject

Wyrd Ecology Barbara Jane Davy, 2025-05-06 Within contemporary Heathen communities the Old English term *wyrd* is used to refer to the web of relations that connect all threads of existence Inspired by pre-Christian traditions of Northern Europe Heathens give gifts toasts and offerings to foster

a sense of connection with other humans and the more than human world In Wyrld Ecology author Barbara Jane Davy posits that these ritual activities are not merely isolated exchanges but rather a means of sustaining entire relational systems in turn inspiring givers and receivers to participate out of a desire for meaningful connection Davy utilizes research from two years of participant observation in a Heathen community in Ontario Canada to show how ritual activities deepen practitioners sense of appreciation for what they have already received and instil a desire to give back Davy illustrates how making offerings and giving gifts is important not only because of what people might believe about the gods but because it gives people a sense of relatedness with their world Ritual practices may thus play a critical role in instilling an ecological conscience and can encourage ethical relations and pro environmental behavior **Roberto Esposito** Inna

Ødemark, Åmund Norum Resløyken, Ida Lillehagen, Eivind Engebretsen, 2024-01-24 This book uses sustainability to explore the interfaces between translation studies the cultural history of knowledge and Science and Technology studies STS The volume examines various material cultural and epistemic translation practices where sustainability serves as a boundary object between natural and cultural inquiry By turning to the intellectual traditions that influenced but were left behind by STS and actor network theory ANT we aim to challenge and expand the Sociology of Translation developed in ANT Concepts such as inscription Derrida actant narrative Greimas and world worlding Heidegger Spivak were reemployed translated in the canonical STS texts What networks of meaning were left behind in this reemployment The book showcases a combination of cultural and knowledge historical perspectives on the construction of the Sociology of Translation and practical experiments across the registers of nature and culture is novel There have been brilliant individual attempts to realign the Sociology of Translation with narratives and modes of enunciation but none has related the Sociology of Translation to the

Science and Religion Lucas F. Johnston, Whitney Bauman, 2014-02-05 This collection offers new perspectives on the study of science and religion bringing together articles that highlight the differences between epistemological systems and call into question the dominant narrative of modern science The volume provides historical context for the contemporary discourse around religion and science detailing the emergence of modern science from earlier movements related to magic and other esoteric arts the impact of the Reformation on science and the dependence of Western science on the so called Golden Age of Islam In addition contributors examine the impacts of Western science and colonialism on the ongoing theft of the biological resources of traditional and indigenous communities in the name of science and medicine The volume's multi-perspectival approach aims to refocus the terms of the conversation around science and religion taking into consideration multiple rationalities outside of the dominant discourse

Crafting Contemporary Pagan Identities in a Catholic Society Kathryn Rountree, 2016-05-13 Contemporary western Paganism is now a global religious phenomenon with Pagans in many parts of the world sharing much in common from a nature revering worldview and lifestyle to a host of chants invocations ritual tools and magical practices But there are also locally specific differences Local religious contexts landscapes histories traditions politics values and norms all impact on local Paganisms This is nowhere more evident than in a strongly Catholic society where religion and culture are deeply entwined Taking the Mediterranean society of Malta as a case study this book invites readers inside the world of a small hidden sub culture Showing what it is like being Pagan in a society where the vast majority of the population is Roman Catholic and Catholicism permeates every sphere of public and domestic social and political life Rountree reveals that Paganism here is a unique brew of indigenous and global influences Pagans employ both creativity and borrowing in constructing identities within a cultural context characterized by antagonism as well as continuity This book explores the intersections of religious and cultural identity the global and local Paganism and Christianity with insights grounded in rich ethnographic detail based on long term fieldwork Rountree makes invaluable comparisons with other studies of modern Pagans and their various worlds

Monstrous Ontologies: Politics Ethics Materiality Caterina Nirta, Andrea Pavoni, 2021-06-01 While the presence of monsters in popular culture is ever increasing their use as an explicit or implicit category to frame stigmatise and demonise the other is seemingly on the rise At the same time academic interest for monsters is ever growing Usually monstrosity is understood as a category that emerges to signal a transgression to a given order this approach has led to the demystification of the insidious characterisations of the racial sexual physical other as monstrous While this effort has been necessary its collateral effects have reduced the monstrous to a mere socio cultural construction of the other a dialectical framing that de facto deprives monstrosity from any reality *Monstrous Ontologies Politics Ethics Materiality* proffers the necessity of challenging these monstrous otherings and their perverse socio political effects whilst also asserting that the monstrous is not simply an epistemological construct but that it has an ontological reality There is a profound difference between monsters and monstrosity While the former is an often sterile political and social simplification the end product of rhetorical and biopolitical apparatuses the latter may be understood as a dimension that nurtures the un definable that is that shows the limits of these apparatuses by embodying their material excess not a cultural frame but the limit to the very mechanism of framing The monstrous expresses the combining hybridising becoming and creative potential of socio natural life albeit colouring this powerful vitalism with the dark hue of a fearful disgusting and ultimately indigestible reality that cannot simply be embraced with multicultural naivety As such it forces us towards radically changing not the categories but the very mechanisms of categorisation through which reality is framed and acted upon Here lies the profound ethical dimension that monstrosity forces us to acknowledge here lies its profoundly political potential one that cannot be unfolded by merely deconstructing monstrosity and rather requires to engage with its uncomfortable appalling and revealing materiality This book will appeal to postgraduate students PostDocs and academics alike in the fields of philosophy critical theory humanities sociology and social theory criminology human geography and critical legal theory **Human-Animal Relationships in**

Human-Animal Relationships in San and Hunter-Gatherer Cosmology, Volume II Mathias Guenther, 2019-08-21 Exploring a hitherto unexamined aspect of San cosmology Mathias Guenther's two volumes on human animal relations in San cosmology link new Animism with Khoisan Studies providing valuable insights for Khoisan Studies and San culture but also for anthropological theory relational ontology folklorists historians literary critics and art historians Building from the examinations of San myth and contemporary culture in Volume I Volume II considers the experiential implications of a cosmology in which ontological mutability ambiguity and inconstancy hold sway As he considers how people experience ontological mutability and deal with profound identity issues mentally and affectively Guenther explores three primary areas general receptiveness to ontological ambiguity the impact of the experience of transformation both virtual vicarious and actual direct and the intersection of the mythic spirit world with reality Through a comparative consideration of animistic cosmology amongst the San Bantu speakers and the Inuit of Canada's eastern Arctic alongside a discussion of animistic currents in Western humanities and ethology Guenther clearly paints the relative strengths and weaknesses of New Animism discourse particularly in relation to San ontology and cosmology but with overarching relevance

Food, Sex and Strangers Graham Harvey, 2014-09-11 Religion is more than a matter of worshipping a deity or spirit For many people religion pervades every part of their lives and is not separated off into some purely private and personal realm Religion is integral to many people's relationship with the wider world an aspect of their dwelling among other beings both human and other than human and something manifested in the everyday world of eating food having sex and fearing strangers Food Sex and Strangers offers alternative ways of thinking about what religion involves and how we might better understand it Drawing on studies of contemporary religions especially among indigenous peoples the book argues that religion serves to maintain and enhance human relationships in and with the larger than human world Fundamentally religion can be better understood through the ways we negotiate our lives than in affirmations of belief and it is best seen when people engage in intimate acts with themselves and others

Materiality and the Study of Religion Tim Hutchings, Joanne McKenzie, 2016-12-01 Material culture has emerged in recent decades as a significant theoretical concern for the study of religion This book contributes to and evaluates this material turn presenting thirteen chapters of new empirical research and theoretical reflection from some of the leading international scholars of material religion Following a model for material analysis proposed in the first chapter by David Morgan the contributors trace the life cycle of religious materiality through three phases the production of religious objects their classification as religious or non religious and their circulation and use in material culture The chapters in this volume

consider how objects become and cease to be sacred how materiality can be used to contest access to public space and resources and how religion is embodied and performed by individuals in their everyday lives Contributors discuss the significance of the materiality of religion across different religious traditions and diverse geographical regions paying close attention to gender age ethnicity memory and politics The volume closes with an afterword by Manuel V squez *Oxford Textbook of Spirituality in Healthcare* Mark Cobb,Christina Puchalski,Bruce Rumbold,2012-08-09 The relationship between spirituality and healthcare is historical intellectual and practical and it has now emerged as a significant field in health research healthcare policy and clinical practice and training Understanding health and wellbeing requires addressing spiritual and existential issues and healthcare is therefore challenged to respond to the ways spirituality is experienced and expressed in illness suffering healing and loss If healthcare has compassionate regard for the humanity of those it serves it is faced with questions about how it understands and interprets spirituality what resources it should make available and how these are organised and the ways in which spirituality shapes and informs the purpose and practice of healthcare These questions are the basis for this resource which presents a coherent field of enquiry discussion and debate that is interdisciplinary international and vibrant There is a growing corpus of articles in medical and healthcare journals on spirituality in addition to a wide range of literature but there has been no attempt so far to publish a standard text on this subject Spirituality in Healthcare is an authoritative reference on the subject providing unequalled coverage critical depth and an integrated source of key topics Divided into six sections including practice research policy and training the project brings together international contributions from scholars in the field to provide a unique and stimulating resource
