Annalisa Cima:

Creativity and Universality in Language Mirko Degli Esposti, Eduardo G. Altmann, Francois Pachet, 2016-05-18 This book collects research contributions concerning quantitative approaches to characterize originality and universality in language. The target audience comprises researchers and experts in the field but the book may also be beneficial for graduate students. Creativity might be considered as a morphogenetic process combining universal features with originality. While quantitative methods applied to text and music reveal universal features of language and music, originality is a highly appreciated feature of authors, composers and performers. In this framework, the different methods of traditional problems of authorship attribution and document classification provide important insights on how to quantify the unique features of authors, composers and styles. Such unique features contrast and are restricted by universal signatures such as scaling laws in word frequency distribution, entropy measures, long range correlations, among others. This interplay between innovation and universality is also an essential ingredient of methods for automatic text generation. Innovation in language becomes relevant when it is imitated and spread to other speakers and musicians. Modern digital databases provide new opportunities to characterize and model the creation and evolution of linguistic innovations on historical time scales, a particularly important example of the more general problem of spreading of innovations in complex social systems. This multidisciplinary book combines scientists from various different backgrounds interested in quantitative analysis of variations, synchronic and diachronic in language and music. The aim is to obtain a deeper understanding of how originality emerges, can be quantified and propagates.

MEET the meeting model DANIELE DAVI, 2022-05-22 How can a book about effective and efficient meetings be life changing? If you spend a considerable part of your life in meetings and they are unsatisfactory or frustrating, that will impact the quality of your time. Every day. Every time. Time is money. Time is limited. Time is the most expensive currency and it can't be traded. Time is your life passing by. Most of the time, meetings are unnecessary or boring. One big issue in current workplaces is that most of the people are not trained to organize successful meetings. Another big issue is that most attendees do not know how to approach a meeting and how to participate to produce a valuable output. Meetings are broken and no one seems to know why or how to fix them. Learning how to improve the quality of collaborative moments is more sustainable and pays better in the long term. The MEET model for successful meetings, defined and explained in this book, provides the needed shift of paradigm and a wide range of tools, principles and techniques to organize and attend meetings, achieving more results in less time. What you will get from this book: After reading this book, you will be more conscious of how you are spending your precious time. Using the MEET Motivational Effective Efficient Transformational meeting model, you will have tools to improve the quality of your time and your life before, during and after meetings.
