Annals Of The Labouring Poor Social Change And Agrarian England 1660 19:

Annals of the Labouring Poor K. D. M. Snell, 1985 The Non-Representation of the Agricultural Labourers in 18th and 19th Century English Paintings Penelope McElwee, 2016-02-08 The life of the poor rural worker appears to have been one of unmitigated toil within an unequal society a reality seldom endorsed in paintings of the eighteenth and early nineteenth centuries The contemporary viewer who constituted less than three per cent of the population wished to see visions of the idyllic golden landscapes of Merrie England peopled by happy contented workers or alternatively images of the Big House a feature and phenomenon now marching over the countryside fed by a new building frenzy This particular element would soon evolve into an all consuming preoccupation for the wealthy throughout the period Members of the upper echelons of society with their families all attired in fine silks and satins look out at their audience from ornately framed canvases as individuals Yet the rural poor the rabble at the gates the unseen workforce who toiled at the behest of the Master are virtually unknown They have left few records Enclosure came at a price The Poorhouse beckoned And still the agricultural labourer did virtually nothing for most of the eighteenth century to protest or rebel against the inequalities of his downtrodden existence Only the dreaded behemoth of the nineteenth century the threshing machine would stir him into action How would it end A False Tree of Liberty Susan Marks, 2019 This book is concerned with the history of the idea of human rights It offers a fresh approach that puts aside familiar questions such as Where do human rights come from and When did human rights begin for the sake of looking into connections between debates about the rights of man and developments within the history of capitalism The focus is on England where at the end of the eighteenth century a heated controversy over the rights of man coincided with the final enclosure of common lands and the momentous changes associated with early industrialisation Tracking back still further to sixteenth and seventeenth century writing about dispossession resistance and rights the book reveals a forgotten tradition of thought about central issues in human rights with profound implications for their prospects in the world today **The Working Class at Home, 1790-1940** Joseph Harley, Vicky Holmes, Laika Nevalainen, 2022-02-17 This book examines life in the homes inhabited by the working class over the long nineteenth century These working class homes are often imagined as distinctly unhomely spaces which the inhabitants struggled to fill with even the most basic of furniture let alone acquire the comforts associated with middle class domestic space The concerned reformers of industrialising towns and cities painted a picture of severe deprivation of rooms that were both cramped yet bare at the same time and disease ridden spaces from which their subjects required rescue It is an image which is not only inadequate but which also robs working class people of their agency in creating domestic spaces which allowed for the expression of personal and familial feeling Bringing together emerging scholars who challenge these ideas and using a range of innovative sources and approaches this edited collection presents a new understanding of working class homes **Migration, Settlement and Belonging in Europe, 1500-1930s** Steven King, Anne Winter, 2013-11-01 The issues around settlement

belonging and poor relief have for too long been understood largely from the perspective of England and Wales This volume offers a pan European survey that encompasses Switzerland Prussia Belgium the Netherlands and Britain It explores how the conception of belonging changed over time and space from the 1500s onwards how communities dealt with the welfare expectations of an increasingly mobile population that migrated both within and between states the welfare rights that were attached to those who belonged and how ordinary people secured access to welfare resources What emerged was a sophisticated European settlement system which on the one hand structured itself to limit the claims of the poor and yet on the other was peculiarly sensitive to their demands and negotiations

The Picturesque John Macarthur, 2013-03-07 In this fresh and authoritative account John Macarthur presents the eighteenth century idea of the picturesque when it was a risky term concerned with a refined taste for everyday things such as the hovels of the labouring poor in the light of its reception and effects in modern culture In a series of linked essays Macarthur shows what the concept of picture does in the picturesque and how this relates to modern theories of the image how the distaste that might be felt today at the sentimentality of the picturesque was already at play in the eighteenth century how visual values such as irregularity become the basis of modern architectural planning how the concept of appropriating a view moves from landscape design into urban design why movement is fundamental to picturing the stillness of buildings cities and landscapes Drawing on examples from architecture art and broader culture John Macarthur's account of this key topic in cultural history makes engaging reading for all those studying architecture art history cultural history or visual studies

William Cobbett and Rural Popular Culture Ian Dyck, 1992-04-02 The first major study of the rural and cultural career of William Cobbett engages Cobbett's own writings and other innovative sources such as popular songs to tie Cobbett's radical politics to rural society

Family Fortunes Leonore Davidoff, Catherine Hall, 2013-04-15 *Family Fortunes* has become a seminal text in class and gender history Published to wide critical acclaim in 1987 its influence in the field continues to be extensive It has cast new light on the perception of middle class society and gender relations between 1780 and 1850 This revised edition contains a substantial new introduction placing the original survey in its historiographical context Leonore Davidoff and Catherine Hall evaluate the readings their text has received and broaden their study by taking into account recent developments and shifts in the field They apply current perceptions of history to their original project and see new motives and meanings emerge that reinforce their argument

The Royal Prerogative and the Learning of the Inns of Court Margaret McGlynn, 2004-12-20 Margaret McGlynn examines legal education at the Inns of Court in the late fifteenth early sixteenth century

Ecology, Economy and State Formation in Early Modern Germany Paul Warde, 2006-06-29 This is an innovative analysis of the agrarian world and growth of government in early modern Germany through the medium of pre industrial society's most basic material resource wood Paul Warde offers a regional study of south west Germany from the late fifteenth to the early eighteenth century demonstrating the stability of the economy and social structure through periods of demographic pressure

warfare and epidemic He casts light on the nature of wood shortages and societal response to environmental challenge and shows how institutional responses largely based on preventing local conflict were poor at adapting to optimise the management of resources Warde further argues for the inadequacy of models that oppose the market to a natural economy in understanding economic behaviour This is a major contribution to debates about the sustainability of peasant society in early modern Europe and to the growth of ecological approaches to history and historical geography Making a Medical Living Anne Digby,2002-06-06 A socio economic history of medical practice from the first voluntary hospital to national health insurance Centuries of Child Labour Marjatta Rahikainen,2017-07-05 Centuries of Child Labour argues that some of the conventional wisdom on child labour can be qualified and even questioned if we turn from the experiences of leading 19th century countries such as Britain and France to economically and politically weaker countries of Northern Europe Taking a long term perspective from the seventeenth to the twentieth century Marjatta Rahikainen conveys a richer sense of child labour by comparing the experiences of the Northern European Scandinavian periphery to the paradigmatic cases of Britain and France **American Exceptionalism, American Anxiety** Jonathan A. Glickstein,2002 What then was the supposed role of poverty the fear of poverty and other negative work incentives in the era of early industrial capitalism and escalating sectional conflict over slavery American Exceptionalism American Anxiety examines a wide spectrum of antebellum American thought on these and related issues including slavery and cheap immigrant and female sweated labor BOOK JACKET

Marriage Law and Practice in the Long Eighteenth Century Rebecca Probert,2009-07-02 This book uses a wide range of primary sources legal literary and demographic to provide a radical reassessment of eighteenth century marriage It disproves the widespread assumption that couples married simply by exchanging consent demonstrating that such exchanges were regarded merely as contracts to marry and that marriage in church was almost universal outside London It shows how the Clandestine Marriages Act of 1753 was primarily intended to prevent clergymen operating out of London s Fleet prison from conducting marriages and that it was successful in so doing It also refutes the idea that the 1753 Act was harsh or strictly interpreted illustrating the courts pragmatic approach Finally it establishes that only a few non Anglicans married according to their own rites before the Act while afterwards most save the exempted Quakers and Jews similarly married in church In short eighteenth century couples complied with whatever the law required for a valid marriage **Portrait of the Family Within the Total Economy** Graeme Donald Snooks,1994-07-18 The household sector is the forgotten economy of the Western world Yet it is an institution that has always played a central role in the operation of economic systems and in the way these systems have changed through time This book which focuses on the Australian case looks at the role of the household economy in the process of economic change It considers the household within the context of the total economy and also identifies and analyses longrun dynamic processes in Western society since the Industrial Revolution This is the first attempt to analyse the dynamics of the total economy over such a long period of time Soundly based on new estimates of

household and market economic activity for Australia the book challenges accepted theoretical and empirical notions in this area Professor Snooks pioneering book makes an important contribution to economics economic measurement and economic history
