Volume of the Who's Who Series The previous five volumes 2003-2007 have been very well received indeed with 1000's of copies being distributed around the world through conferences and workshops as well as through internet book sites. Recently the WWiF Volume was disseminated at the 10th MAFS conference in Salzburg Austria. The Volume was very well received indeed. We subsequently thank Professor Otto Wolfbeis for help in disseminating the Volume at the MAFS venue. This new 2008 Volume features some 418 entries from no fewer than 38 countries worldwide as compared to 405 entries in 35 different countries in 2007 and 366 entries in the 2006 volume respectively. We have received 31 new entries this year and deleted 18 entries that were not updated by contributors from past years. In 2007 some 106 AIM numbers were submitted and listed 88 the year before. This year the number submitted has risen again to 129 entries greater than 30% of all contributors. In addition the Volume has a continued strong company support which will enable us to further disseminate the Volume in 2008-2009. In this regard we especially thank the instrumentation companies for their continued support where without their financial contributions it is likely that the Volume would not be the success it is today. The new WWiF website was also launched in August 2007. The website features all the latest WWiF templates and submission information. *The Publishers Weekly*, 2005. *Who's Who in Fluorescence 2005* Chris D. Geddes, Joseph R. Lakowicz, 2007-12-24. The Who's Who in Fluorescence 2005 is the 3rd volume of the Who's Who series. The previous two volumes 2003 and 2004 have been very well received indeed with many copies being distributed around the world through conferences and workshops as well as through internet book sites. In the last 2 years a great many of you have sent comments and suggestions we thank you all. We have tried to accommodate many of these into the new 2005 volume. This new 2005 volume features some 382 entries from no fewer than 32 countries an increase from 312 entries in the 2003 volume. In addition we have a continued strong company support which will enable us to further disseminate the volume in 2005. In this regard we especially thank the instrumentation companies for their continued support where without their financial contributions it is likely that the volume would not be the success it is today. We have introduced a new author publication statistic into this volume the Author Impact Measure AIM number. While voluntary this number is intended to reflect an author's progress in past years. The AIM number simply summates the impact number from the ISI database of Journals published in in that year multiplied by the frequency of those publications. From those who chose to participate we can see most impressive AIM numbers in some instances greater than 80 for an individual year. **Rebel Crossings** Sheila Rowbotham, 2016-10-11.
