Treatise on Geophysics, Volume 9 David

Stevenson,2010-05-18 Evolution of the Earth focuses on the formation of Earth Topics include the differentiation of the core mantle and crust the formation of the ocean basins and continents outgassing and volcanism the initiation of plate tectonics the origin and persistence of Earth s magnetic field the growth of the inner core changes in mantle convection through time and the impact of life on the planet The volume takes an interdisciplinary viewpoint that emphasizes the interplay of geophysics other aspects of earth science and biological evolution Some outstanding questions are identified and debated Self contained volume starts with an overview of the subject then explores each topic with in depth detail Extensive reference lists and cross references with other volumes to facilitate further research Full color figures and tables support the text and aid in understanding Content suited for both the expert and non expert *CMB Polarization Workshop* Scott Dodelson,2009-06-24 The workshop brought together experts in astronomy and particle physics to make the science case for a satellite mission to measure the polarization of the cosmic microwave background CMB Detailed maps of the CMB polarization will potentially reveal clues about the origin of the universe An early epoch of inflation typically produces a spectrum of gravitational waves and these leave a distinctive imprint on the CMB polarization field The workshop addressed all theoretical aspects of this science which inflationary models predict an amplitude that will be detected and which do not What do alternatives to inflation predict Apart from the gravitational wave signal what other science can be gleaned from these measurements High resolution maps should have traces of gravitational lensing which in turn is affected by dark energy and massive neutrinos How well will a satellite mission be able to measure these effects CMB polarization also speaks to the end of the Dark Ages the constraints on reionization are discussed in the context of all other probes Finally several articles based on many talks and follow up work probe the science of and removal of Galactic foregrounds **Annual Review of Nuclear and Particle Science** Annual Reviews,2006 *International Who's Who of Authors and Writers 2008* Europa Publications,2007-08-23 An invaluable source of information on the personalities and organizations of the literary world Dod's Parliamentary Companion ,2004
